Errata for Pascal Reference Manual A210027 030-0101-00

=====

The following are errata for Apple Pascal Language Reference
Manual # A2L0027 030-0101-00.

Page 22

There is no mention of the CHR (X) function.

Page 86

ORD will accept any ordinal type (integer, character, or user defined type)
and return the ordinate of the argument. NOTE: The most common use for ORD is
to return the ASCII value of a character.

Page 148

The two-step boot cannot use APPLE1: for the first step, since RESET does a
cold boot in Version 1.1. Use APPLE3: for the first part of the boot
instead.
