## Dedication

This book is dedicated to my loving computer widow who, during the play of these games, was only once compelled to attack the Apple with a large knife. It is also dedicated to the world of frustrated adventurers who have for so long wondered where their next clue was coming from.

# PREFACE

The world of adventure awaits you within these covers. The solutions to these adventure games were obtained through many hours of enjoyable, often frustrating, and sometimes tedious labor. Because the games' creators provided neither the adventure maps nor the puzzle answers, this book remains subject to variable solutions as well as human error.

The purpose in *The Book of Adventure Games* is to make the games described more fun to play by helping you to overcome frustration points—not to lay out the solutions, which would lessen the enjoyment of discovery. I have made every effort to insure the accuracy of the maps and solutions contained in the book. In all cases, I played through the Apple II version at least twice to verify the specific solutions and their correct syntax. Spot checks on game versions for other microcomputers augment vendor statements that the versions for other microcomputers indeed match the Apple II version.

Nevertheless, because of the involved nature of many of these games and the possibility of minor variations between versions for different machines, neither the author nor the publisher can assume responsibility for the infallibility of these maps and solutions. While a solution as presented has solved a game, alternative approaches may open a new location (although that room would have no bearing on the ultimate solution). Similarly, I made no attempt to detail the many nuances and alternate computer responses that make these games so much fun to play. To do so would require several volumes and materially detract from the enjoyment inherent in these games. Enjoyment, after all, is the real name of the game.

— K.R.S.

# INTRODUCTION

“You are standing at the end of a road before a small brick building.” So begins what has perhaps caused a revolution in the home computer field—the adventure game!

In its simplest form, an adventure game is one in which the computer provides an alter ego for you, the game player. You can sit back and fantasize about danger and deeds of great daring while the alter ego takes the risks and the bruising beatings. The challenge usually involves solving many puzzles in pursuit of the final reward.

The popularity of adventure games stems largely from their providing each player with something a little different. Some enjoy the pure escapism from dirty realities. Others are drawn by the mental challenge and stimulation attendant upon their play. Some simply take pleasure in overcoming a particular hurdle, while others enjoy the mapping of a game and finding a logical presentation for the map—quite often no mean feat. The search for surprises and a little humor in unexpected places make up another key factor, as do the side issues and involvement within a game.

Unfortunately, beginning adventurers may throw in the towel on their first game, due perhaps to a frustrating puzzle, poor vocabulary in the game, or having chosen too difficult a game to start on. Others may find that they can't seem to start “thinking” like the game's author, but are intrigued by what they see. Still others wonder what all the hullabaloo is about. This book is intended for all of these players, as well as for adventurers of all skill levels looking for that specific answer to speed them on their way to finding the surprise, humor, challenge, and delight in these games.

Puzzles present situations in which you have to figure out what action you need to take in order to proceed to the next part of the game. You may have to choose a direction, manipulate some object on the screen, or even figure out how to slay a dragon! You will need to determine which objects—treasures, devices, etc—you should acquire and carry with you, and which to leave behind or store until later, a process commonly referred to as “inventory management.” Maps show the layout of the game; they should give a plan view of all the game's locations. Sometimes you will encounter a maze, where many identical or nearly identical locations seem to exist.

You will discover that when trying to solve a puzzle you sometimes use words rejected by the game because the vocabulary of every game is unique and often limited. You will also learn the syntax, or command parser, acceptable to each game. You may have to type in two-word only commands or commands which require that you type a verb first and then a noun: e.g., GET CHEST. In general, the more synonyms allowed and the more flexible the command parser, the better the game. The popularity of an adventure game increases in proportion to its sophistication.

# CATEGORIES OF ADVENTURES

Adventure games may be broadly separated into two categories, puzzle adventures and fantasy adventures. Either may be further divided into all-text adventures or games making use of the computer's high resolution (Hi-Res) graphics capabilities. The obvious visual difference between the two lies in the display, either a neatly formatted text page, or a display dominated by a graphics scene with but a few words of text.

Of the major categories, puzzle games emphasize logical solutions and demand mental agility, ranging from pure guesswork to inductive and deductive reasoning. They usually present a mission or objective, be it rescuing the fair maiden, ridding the kingdom of an evil force or creature, or recovering a long lost treasure. Quite often, the objective doesn't become clear until well into the game. You encounter obstacles to progress in the form of puzzles which you must resolve before you can realize the objective. You must find and use a multitude of objects in various locations or use them on other objects to achieve a desired result. The games can often, therefore, become the source of considerable frustration when the proper answer eludes you. Some of the pleasure of these games derives from succeeding after repeated failure.

Fantasies, on the other hand, generally have a clearly defined objective at the outset, fewer or much simpler puzzles, and usually trade off frustration against sheer determination. Fantasy games generally are less "real." The player often assumes the identity of a character, such as an Elf, Gnome, or Dwarf, which may further break down to Fighter, Wizard, Mage, or Priest, to name but a few. Fantasies invariably require a multitude of battles with various and sundry monsters. Here, frustration can arise, as initially your fledgling character may have trouble surviving long in the world of beasties. To survive, your character must defeat enough innocent monsters to gain experience and gold, the elements necessary to build him or her to a state of near invincibility where he or she functions efficiently and can attain the ultimate goal.

## HISTORY OF ADVENTURES

Once upon a time (isn't that the way all good literature starts?), when 16K computers were still the size of a house, there were adventure games. Even in the 1960s, large and complex games such as *Life* and the original *Adventure* appeared on these mainframes long before the advent of home computers. The people using these computers employed their imaginations during their spare time searching for new ways to play with a new "toy."

Thus, adventures evolved essentially parallel to the computers themselves. But when the home computer first came out, the games initially available were fantasies. *Super Dungeon* and *Dungeon Campaign*, for example, required your carefully tailored alter ego to march around in a multi-level dungeon seeking various treasures, and encountering and whomping monsters before they whopped you. One of these, *Beneath Apple Manor*, published in 1979, became one of the first fantasy classics.

Early adventure history was made when the first of Scott Adams' all-text adventures appeared in late 1979 and the early 1980s. Initially available only on cassette, these relatively compact games consisted of some thirty-five or so rooms, and were among the first programs written in Assembly language. This speeds a game considerably, which adds immeasurably to its continuity and playability. As programming sophistication increased, these popular games were transformed into Hi-Res versions; but in the case of puzzle games, whether or not this is a true upgrading still sparks debate.

At about the same time, in early 1980, *Adventure* (sometimes referred to as the *Colossal Cave*), which begins "You are standing at the end of a road," was translated into BASIC language for the Apple computer. This was a major accomplishment considering the size and complexity of the programs being mashed into Applesoft. At least five different companies have put out a version of this game, including faster playing Assembly language versions. Although nearly identical, Microsoft's version adds an interesting twist with an additional room, the "Software Den," and a two scenario save-game capability.

Roberta Williams “took a small step for man and a large step for adventurers” with the release of the first Hi-Res adventure, *Mystery House*, late in 1981. Colorful pictures replaced much of the text, leaving only a few necessary words in the bottom four lines of the screen display. Some soothsayers stated that this game would sound the death knell of the all-text games, and indeed such graphics games have become immensely popular. However, as to ending the reign of all-text games, such predictions were considerably premature.

Many players prefer a good all-text game to even the best Hi-Res game. They like the imagination required to visualize the surroundings and elements of the puzzles. Often an image appears in your mind’s eye that no on-screen graphic can match for vividness and pleasure. Some all-text games provide screens of text that rival real literature in terms of their use of allegories and descriptions, even purple prose which can boggle the imagination. On the other hand, if you simply read that you are in a cave-pocked hillside, would you immediately respond “Go Cave” as you would if you saw some caves staring you in the face?

Infocom has perhaps done the most to keep the all-text adventures alive and thriving with two significant breakthroughs. The command parser originally developed for *Zork*, which was released in 1981 on the Apple (another game originally written on a large computer and subsequently converted), permits the use of conversational English. You can enter complex commands (complete with adjectives and adverbs) rather than two-word-only commands such as “Go Cave.” Tables of equivalencies and synonyms added tremendously to the playability of these games, removing much of the unnecessary “puzzle” of having to guess the exact word to use in order to accomplish a specific task.

*Deadline*, published in 1982, provided the second breakthrough by permitting the independent actions of characters within the game; you could interrupt the actions of characters to ask questions and to alter their future course of action. This game also used a feature first seen in Scott Adams’ *The Count*: objects and descriptions of locations could change as the days or hours progressed, with new objects appearing in old locations. Since then, independence of action and change over “time” have evolved even further. In *Labyrinth of Crete*, the two alter ego characters, Jason and Hercules, can receive separate commands and behave cooperatively. The same holds true for the six independent robots of *Suspended*, another Infocom game. Any one of the characters, once given a command, will dutifully carry it out in the background, reporting back to you upon the completion of its assignment while you manipulate other robots in the foreground on separate tasks.

An equally noteworthy breakthrough in fantasy games became visually apparent in *Ultima*, wherein your character roams over a landscape considerably larger than the immediate area of the visible screen. As you move “off the edge,” new graphics smoothly scroll onto the screen, giving the player a feeling of great scope and expansiveness.

As the games evolve, the distinction between the two general types blurs. For example, the fantasy games *Ultima III* and *Legacy of Llylgamyn* (1983) both include numerous puzzles, such as riddles or extensive searching requirements, to find objects. Nevertheless, the primary emphasis remains monster whomping, searching, and exploration. While Hi-Res graphics have become a large part of the puzzle-type adventure, a graphics *tour de force* such as *Ultima* or *Wizardry* still commands an enthusiastic following.

Today’s adventures, always searching for something new, employ a better usage of sound, animation, Real-time response requirements, and arcade game tasks (e.g., skiing between trees in order to proceed on to the next puzzle element). Some include major arcade game tasks between elements of a puzzle adventure. What will appear in tomorrow’s adventure is anyone’s guess. Like the games themselves, the answer lies only in the imagination of the programmer of that yet unwritten game. As the games’ sophistication increases, so too will their popularity, as these two factors are synergistically related, each providing fuel for the other’s growth.

# WHAT MAKES A GOOD ADVENTURE?

Beauty is in the eye of the beholder. Just what sets a good game apart depends on each player. While my personal favorites are the original *Adventure* and the *Zork* series, I didn't know that until I had finished playing them. Unfortunately, you cannot tell how well you like something until you've tried it, particularly since most adventure games are packaged with snazzy covers that have little or no bearing on the game inside.

Regardless of which game you consider your favorite, you should consider the following types of questions to determine the relative quality of any given game:

Are the puzzles imaginative and logical, or old hat? Are they simply souped-up guessing games?

Are there alternative approaches or more than one area to work on at a time, or must you solve one specific puzzle before approaching the next? Such in-series-only puzzle games usually offer little inspiration, only a maximum of frustration.

Is the text bright, descriptive, and well-written, or sparse and matter-of-fact, without anything to stimulate the imagination? Elements of humor and side issues, while they may have no direct bearing on the game, materially enhance the game and make it enjoyable.

Have you ever taken out your frustrations on the game and sworn at it or given an obscene command? Try it, you might be pleasantly surprised—and it gives you a rather strange feeling to apologize to a computer.

It won't take too long to find out about the command parser. Will it accept only two words or an entire sentence of multiple commands? Do you have to use a specific word to get a response? A good game will have good vocabulary and a reasonable number of equivalent nouns and verbs. Nothing is more frustrating than using words like "open," "unlock," "break," "move," "lift," "shake," "twist," and "unwrap" only to find that "use" is the only correct word.

Take a look at your map. Is it logically laid out? Do the mazes have a reason for existence, or are they pointless? Are there too many mazes for the size and complexity of the game? Are there many pointless one-way moves?

Does the game get you killed off unnecessarily without even a chance to defend yourself or escape? How do you get killed? Was it clever and quick, or was it unnecessarily sick and graphically gruesome? Did you learn from it?

Does the "save game" feature permit you to save a game at any time, or only when you quit? When you re-enter a game, is that the only time you can use a saved game? Must you endure a long boot-up cycle to reload the entire game just to load a saved position? Will the game support two drives, eliminating unnecessary disk changes?

What of the game's speed? How fast does it play? Slow color fills and a lot of disk interaction detract from the game's continuity and playability.

Does your Hi-Res game permit you to look at the last sequence of text you entered, or even to play the game as an all-text adventure?

Finally, when you have finished the game, are you sorry it's over, or simply relieved?

Another way of getting an idea about the quality of an adventure game is to check the ratings in *The Book of Apple Software*. For now, why not grab an adventure that's fun, but has been giving you problems, and take another whack at it?

# HOW TO TACKLE AN ADVENTURE GAME

Each game has its own flavor and idiosyncrasies. To be successful, the player must try to think the way the author did when writing the game. When starting a game for the first time, try beating around it for a while, without even trying to map it or solve any puzzles. Simply try to get the feeling of the game. Pick up anything you can, and try to do something—anything—to or with it. Next, start over and map as much of it as you can, without trying to solve anything. Don't even "touch" anything just now—be patient. Annotate your map with the objects you find and any clues, like signs that you can read or things you shouldn't do (for example, try not to get killed the same way twice).

At this point, you're finally ready to play the game for real. Look at your map, as much of it as you have so far. What can be pieced together? Where did you get blocked or clobbered, and why? Use what you've got and try to develop something, anything. Many times, the initial puzzle isn't too tough (*Savage Island Part II* being an exception). As soon as you make a breakthrough, save the game and push your map forward, if possible. Try to anticipate where the puzzles occur and what you might need to solve them, then go look for those items.

## Mapping the Game

Mapping a game is a necessary element in adventure play. Mapping refers to making a road map to tell where you are, where you've been, and how to get back to a given location. More importantly, you should annotate the map with what you find, how it's used (once you find out), and, later, the key words to the solution of the puzzle at any given point. One of the best games for beginners is *Birth of the Phoenix*, which includes one of the best tutorial manuals on mapping and a beginner's approach to adventures. The game itself, as you'd suspect, isn't difficult; but it contains examples of all the aspects common to most adventure games.

Start your map with a rectangle to represent the location at which you first find yourself. Methodically go North, then back (hopefully) South, drawing as you go. Bear in mind that leaving a room to the North does not mean that you necessarily enter the next room from the South. Concentrate on "finishing" all possible directions for that initial location. Remember that some games have ten possible directions out of any location: the four cardinal headings; NE, NW, SE, SW; and up and down. Some games tell you possible exits—just don't always believe them; draw in a short straight line to mark those directions.

Develop your own shorthand. If you can't go in a particular direction, put an "x" there; if you can't return to the start by reversing direction, put a one-way arrow on the last line. You can simplify the map later when and if you find two lines with arrows between two locations. Should a scene seem repetitious, make sure that you are not in a loop. Drop an object and keep going. If you come across the object again, obviously you've looped back.

If you find yourself in a maze, be it an open ocean, underground, or a field, use the same technique as you did to find "loops." Develop your maze on a separate sheet of paper. Drop an object and name your present location (the rectangle) with the name of the object. Move somewhere, drop another object, and name that location with the name of the newly dropped object. Draw an arrow from the first object in the direction that you moved and name it as the second object. Continue moving and dropping objects, and soon you'll find yourself in familiar locations.

When you've finished, you'll have a number of rectangles equal to the number of locations in the maze, plus arrows pointing from one location to another, showing directions. You can redraw the maze now, using the named locations as the basis for your map.

Some mazes are tougher to map. Creatures may come along and pick up what you've dropped, or your object may sink into the mud and disappear forever. Some mazes (like the ones in *The Mask of the Sun*) don't show your object (even though it's really there) unless you "LOOK." Other mazes have a lot of one-way trips; that is, once you reach a second location, you cannot to return to the first one.

## Inventory Management

In many games, inventory management proves a problem. You may find more objects to carry than you can handle at any one time. Occasionally, you can obtain minor relief by putting smaller objects into larger ones. The problem may be compounded by the multiplicity of objects often encountered early in the game, before you have determined their relative uses. A second complication arises because some objects have several uses in widely separated locations. You have to figure out what to carry, where, and when.

Two suggestions for inventory management are: first, avoid picking up treasures until you are heading back to the storage area. Take them back in bunches. In some games, such as *Kabul Spy*, treasures are secondary to the real object of the game (but do add to the score); they are seemingly there primarily to reduce your ability to carry objects you really need.

Second, establish a centrally located depository, sort of a temporary treasure storage area. Don't leave objects lying all over the place, as you may have a miserable time finding them again. As the game develops and you probe deeper, bring your objects closer to your "working area" and establish a new temporary depository.

Be patient, you may be only a few keystrokes away from success. When you really get stuck, marshal all your objects and forces at that point, and dig in. Keep a dictionary and thesaurus near at hand. Quite often, having two people tackle one game will produce faster results. What one misses may be intuitively obvious to the other. When all else fails, look in *The Book of Adventure Games*.

## USING THIS BOOK

This book contains the maps for over seventy of the most popular electronic adventure games. The purpose of the book is to make these adventures more enjoyable and less frustrating, but not less challenging. Thus, even though explicit solutions to the games appear in the back of the book, *please* don't take the coward's way out. Looking up the answers before you try to solve the game on your own could ruin the game for you.

Use the maps as you play, and if you really get stuck, look for a number by that location. In the back of the book you can find corresponding numbers with solutions for that particular problem. Use these solutions only when you have been stumped for some time. This book is designed to help you find just the hint you need to keep playing, without giving away the whole game.

Don't worry if the maps show locations that you have not yet found. You may have to solve certain puzzles to uncover particular locations. These objects may not be visible or accessible on your initial visit to the location.

This book won't tell you everything. The maps don't specify, for example, when or if you should take an object. They don't help you with inventory management. You will have to read the signs and plaques, examine and consider the objects and locations, and, most importantly, use your imagination. These side issues provide much of the fun of the game.

# THE GAMES

2

# ADVENTURE

**Company:** Several

**Suggested Retail:** \$29.95

**Type:** The original all-text adventure—a classic.

**Description:**

The first message in *Adventure* consists of the words known to all adventurers: “You are standing at the end of a road before a small brick building.” The last message describes your being borne off on the shoulders of elves. Between those two lie 130 rooms, fifteen treasures, some forty objects, and a variety of cave inhabitants for you to deal with and outsmart.

**Playability:**

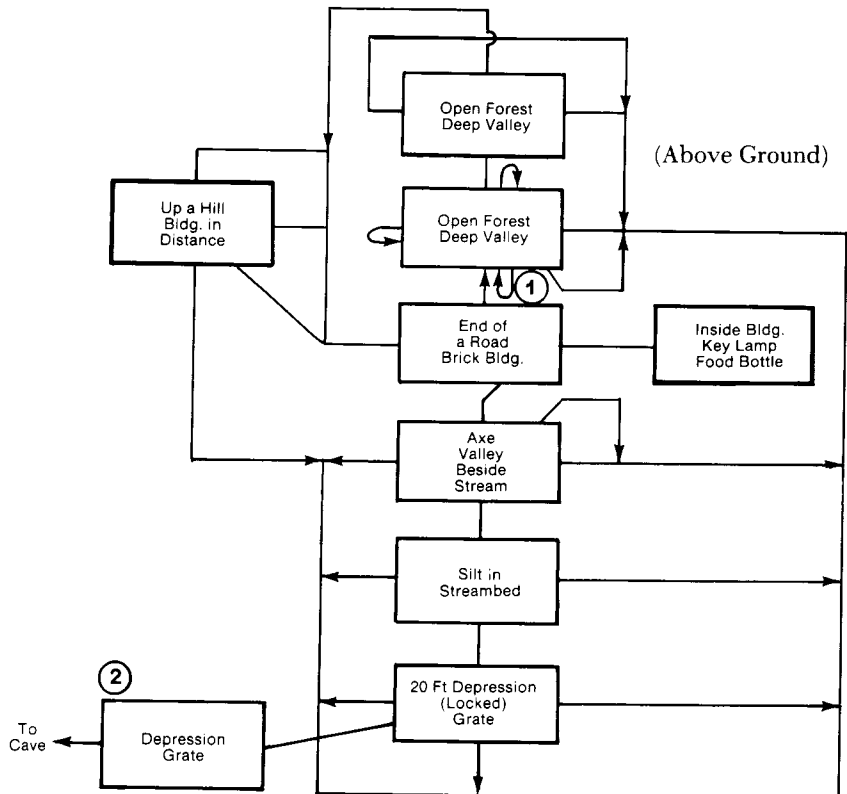

If this is your first adventure, you’ve picked the one that hooked me! The story flows well, and the text reads like a novel in its expansiveness and descriptions. Most versions are disk interactive and a little slow, except for the Scott Adams version in Assembly language. The Microsoft version, perhaps the most faithful, has two saved-game positions and adds a room, the Software Den, with its own special twist.

# ADVENTURE

## The Repository (End Game)

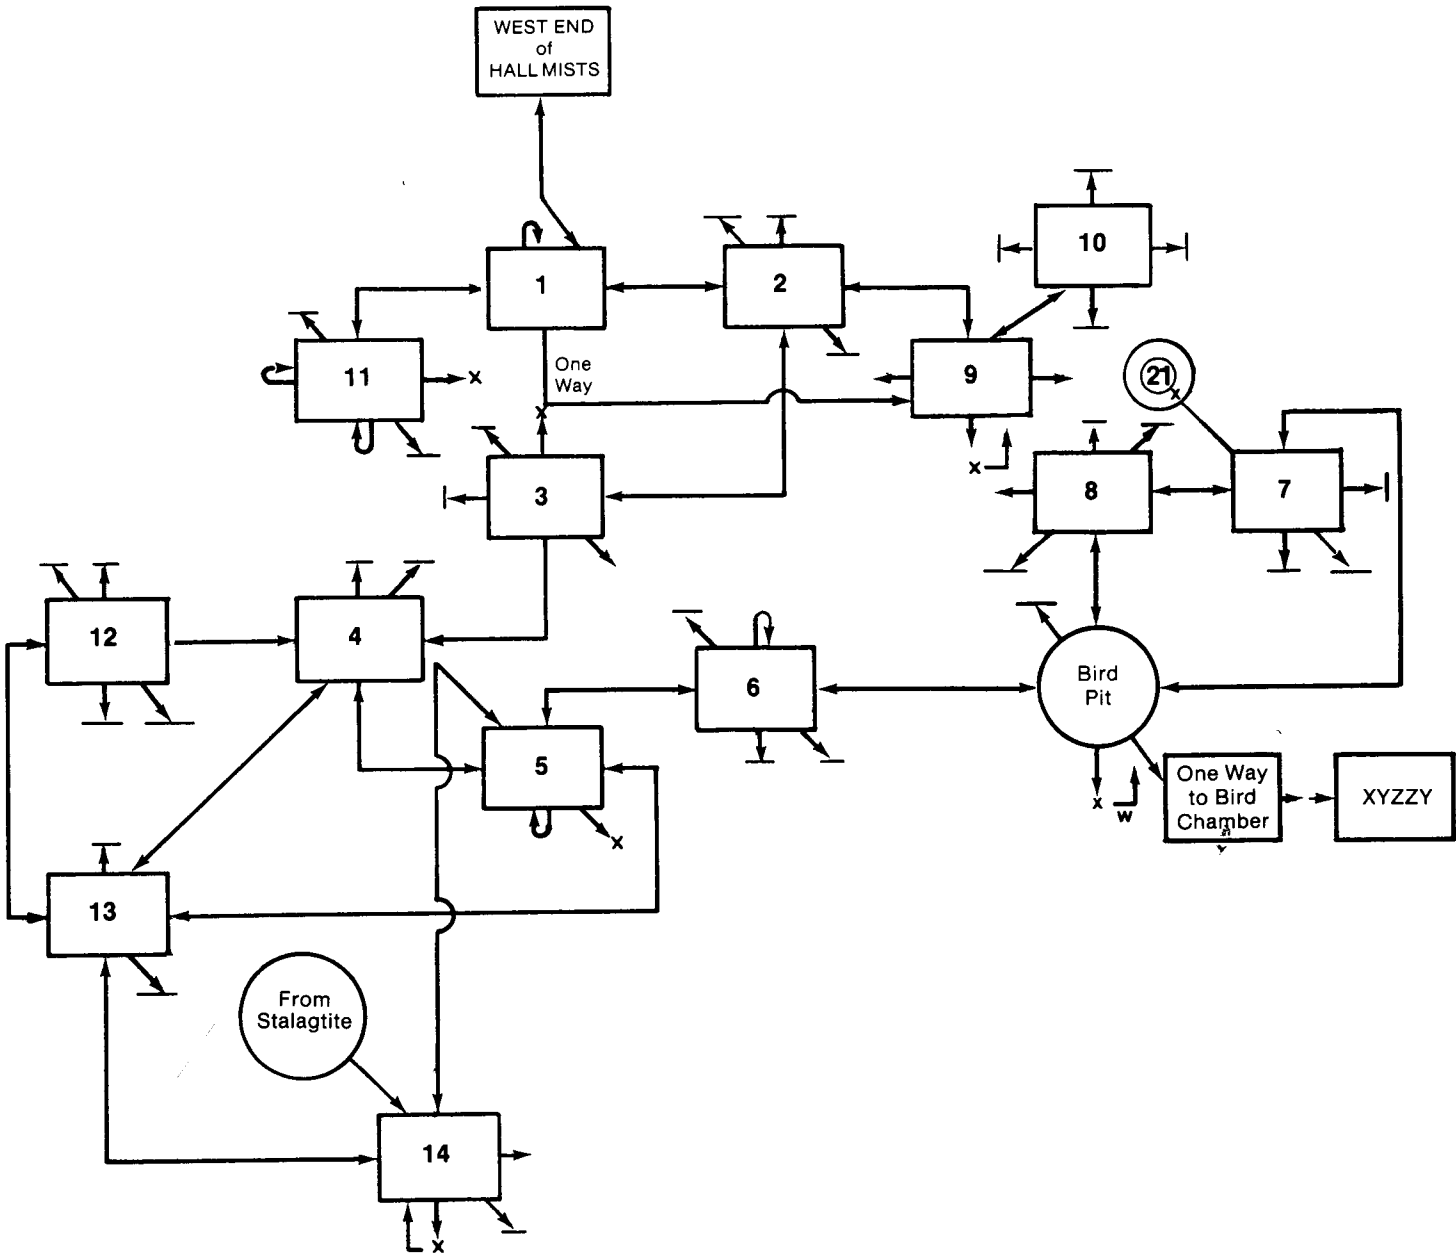

# ADVENTURE

## Vending Machine Maze

# ADVENTURE

## Pirate's Maze

# ADVENTURELAND

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** Originally an all-text game, recently re-released in Hi-Res form.

**Description:**

This game has the distinction of being the first of the good puzzle games. Thirteen treasures lie above and below ground in this adventure. Some treasures just lie around for the taking, but others will take a bit of head scratching before you finally glom onto them. In the process, you have to contend with Bees, Bears, Lava, Insects and a Sleeping Dragon.

**Playability:**

Overall, the puzzles are not too difficult, and the game provides a good introduction to the tougher games in the Adams series. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game offers a single, easily made or recalled saved-game.

# ADVENTURE IN TIME

**Company:** Phoenix Software

**Suggested Retail:** \$29.95

**Type:** An all-text adventure.

**Description:**

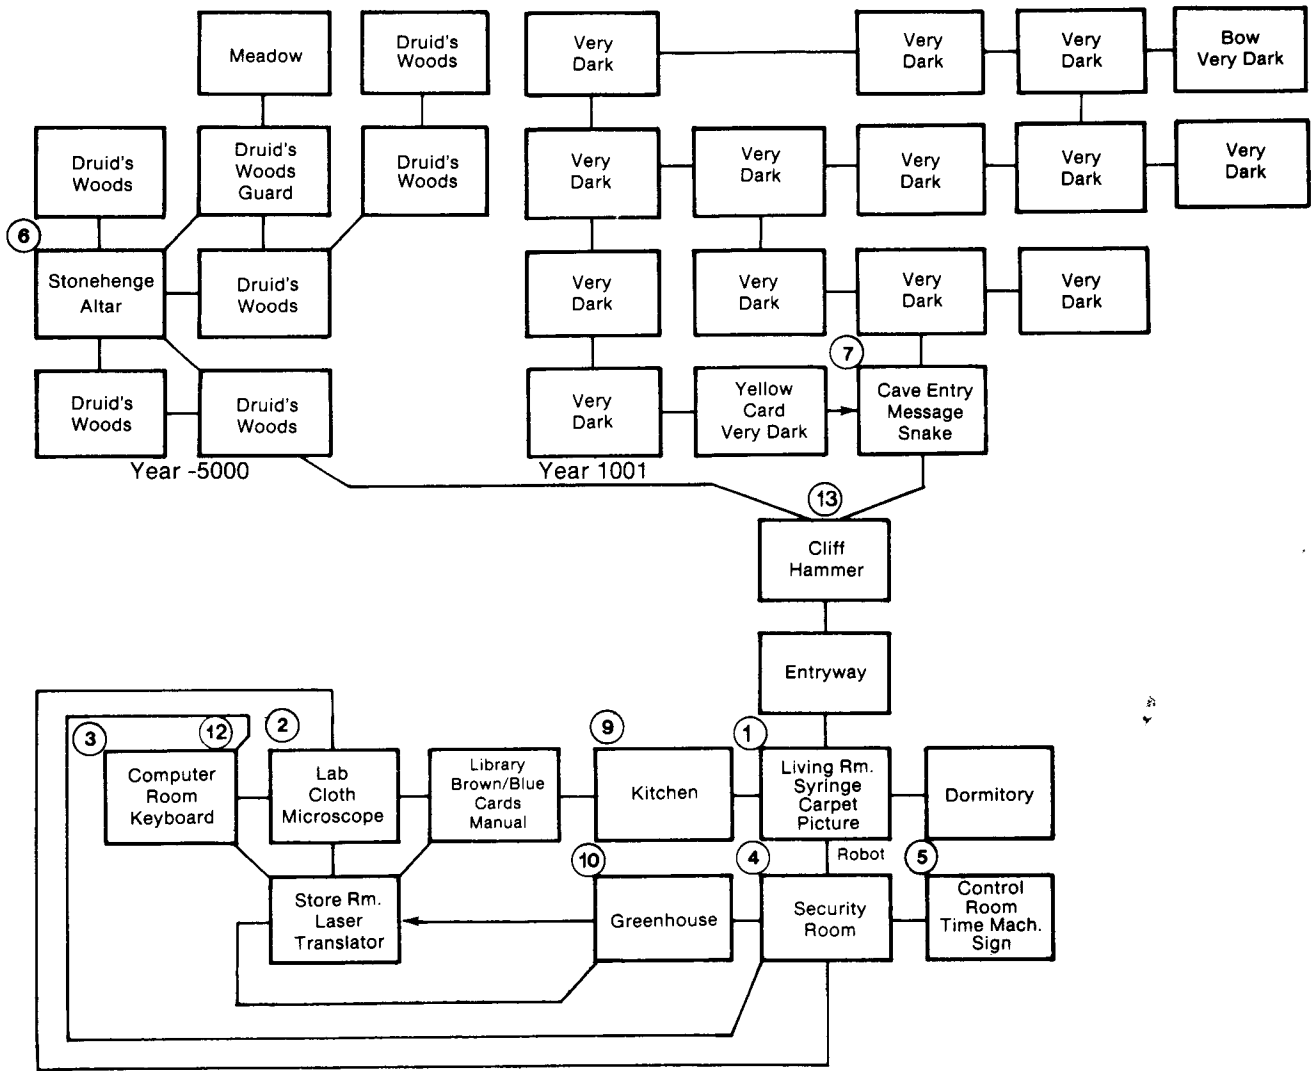

You must locate the bad guy, Nostradamus, who lurks somewhere in time, and kill him before he can assemble the ultimate weapon and destroy the world. You may travel to four different locations in time and to an interesting lab which even has its own computer. A friendly robot helps you out.

**Playability:**

This game's traps and puzzles will keep an experienced player busy for several hours. Although rated for experienced players, it is by no means too difficult for beginners. The crisp, quick response, tongue-in-cheek style, and save option further add to the game's appeal.

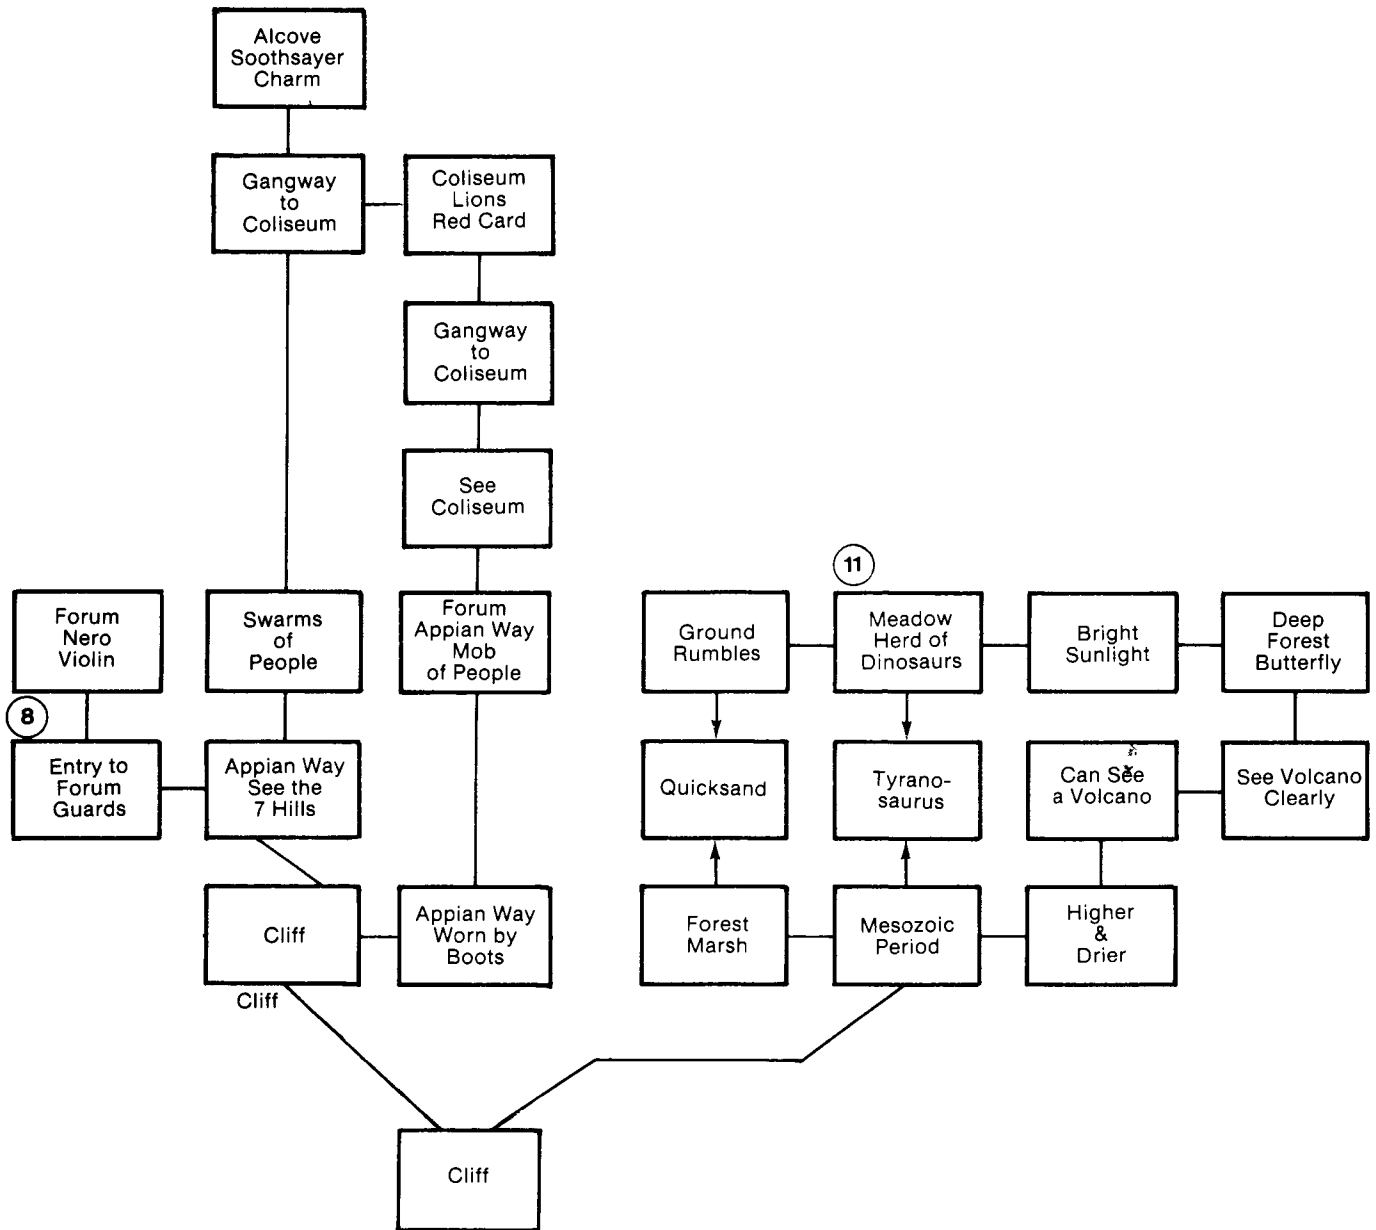

# ADVENTURE IN TIME

# ADVENTURE IN TIME

## Part 2

# ALI-BABA AND THE 40 THIEVES

**Company:** Quality Software

**Suggested Retail:** \$32.95

**Type:** Originally the all-text game called *Fracus*, this fantasy has colorful Hi-Res graphics and sound and has undergone extensive modification.

## Description:

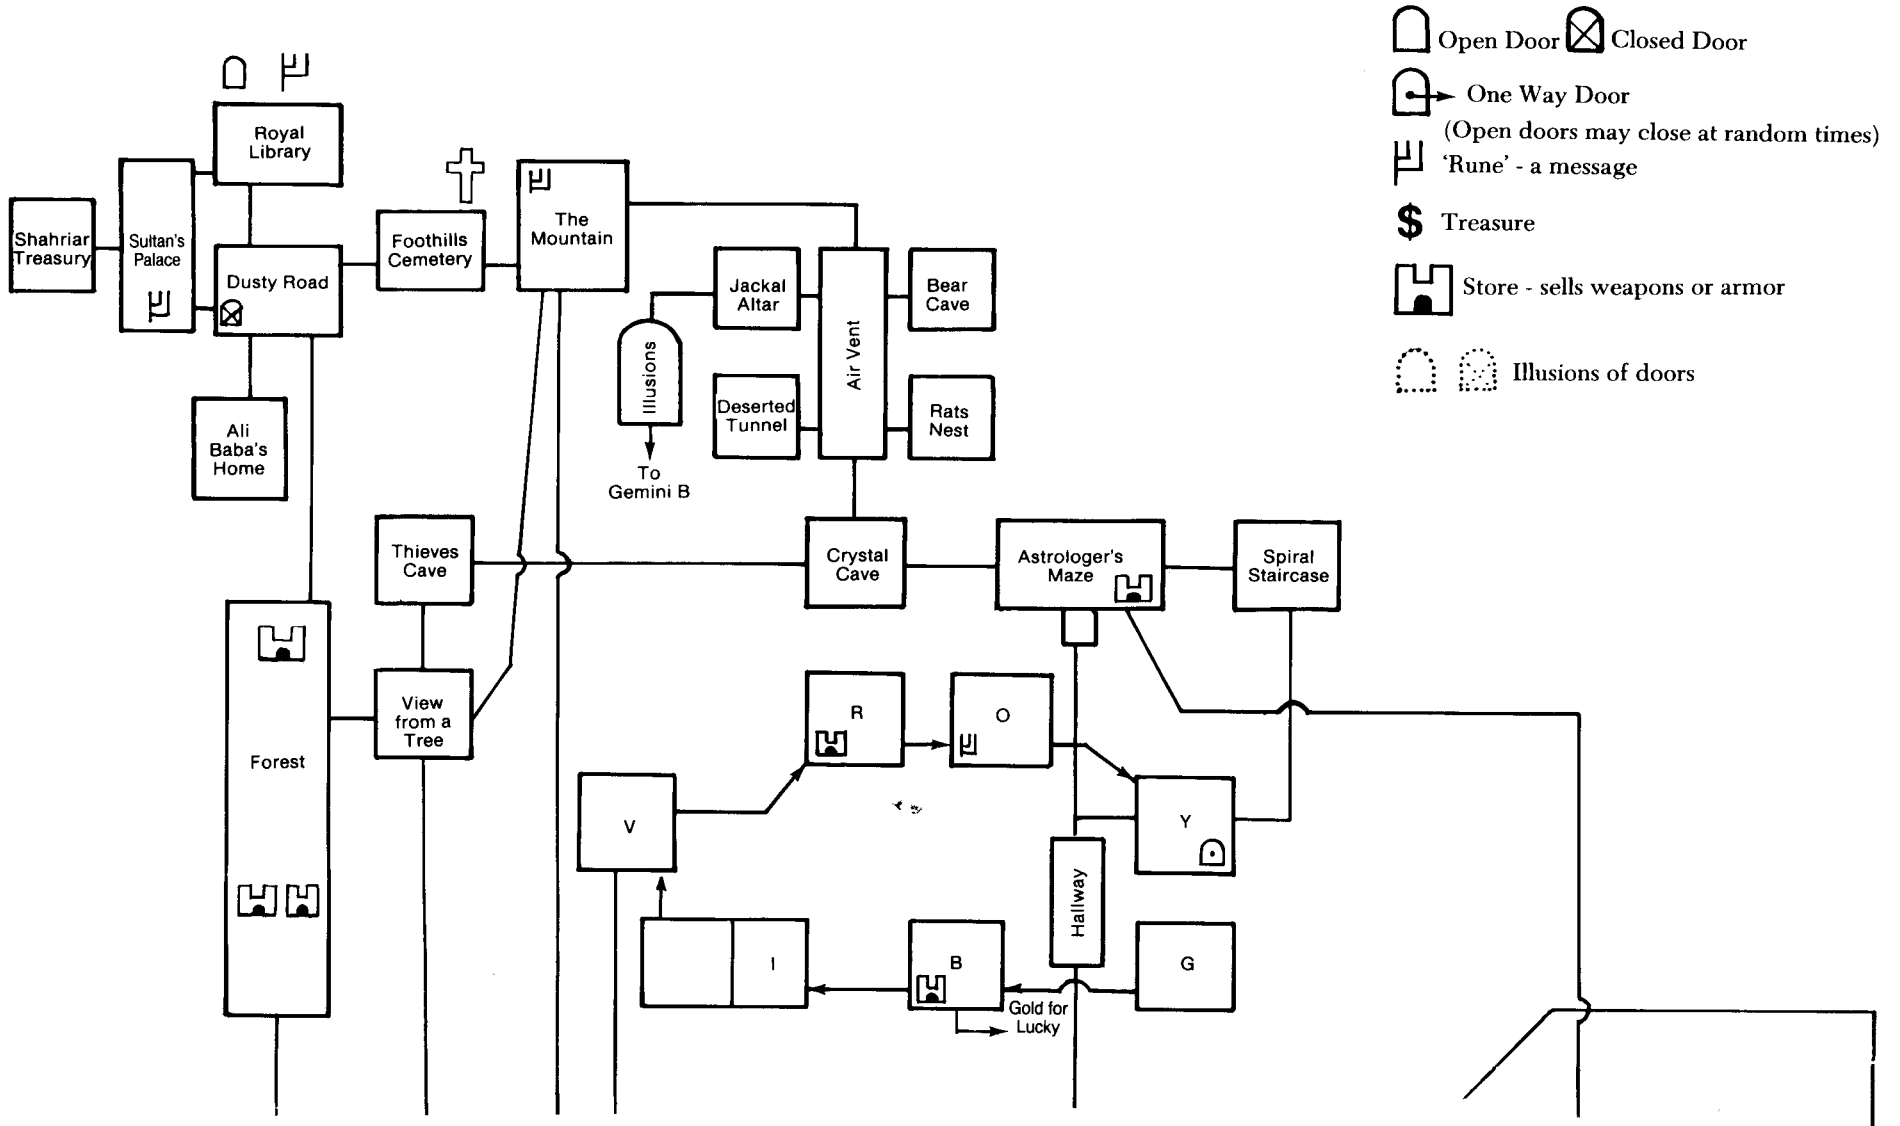

This light-hearted combat game takes place in a medieval setting. You beat up monsters, find treasure to buy more effective weapons and armor, and ultimately rescue the Princess Buddir. You face an endless procession of assault-minded thieves and assorted monsters. However, you do have a host of allies on your side, and sometimes the indiscriminate baddies even clobber each other. You can just sit back and watch, and often listen to lots of music.

## Playability:

No single solution to this fantasy adventure exists, so none is provided beyond the map. One or more players can play with paddles or keyboard. I suggest annotating your map as a means of keeping tabs on the many hidden doors, chutes, and strange goings-on.

# ALI-BABA AND THE 40 THIEVES

# BENEATH APPLE MANOR

**Company:** Quality Software

**Suggested Retail:** \$29.95

**Type:** Originally a Lo-Res game, recently re-released in Hi-Res form.

**Description:**

In *Beneath Apple Manor*, a classic fantasy game, you try to find a Golden Apple hidden deep within a multi-leveled, maze-like basement. You need no hints or clues to solve this game, only a bit of patience. Different types of monsters abound, and the deeper you go the tougher they become. Magic items found on most levels may help you in the quest.

**Playability:**

The new version provides a Hi-Res display of up to five rooms, while a pleasantly familiar Lo-Res (text page) display of the original version is available for games of up to ten rooms and at any of the ten degrees of difficulty. Elements of strategy enhance the game, but no puzzles impede your progress. No single solution exists, so none is provided. Because the maze of each room is random, only a typical floor map, dumped from the screen, appears.

# BIRTH OF THE PHOENIX

**Company:** Phoenix Software

**Suggested Retail:** \$14.95

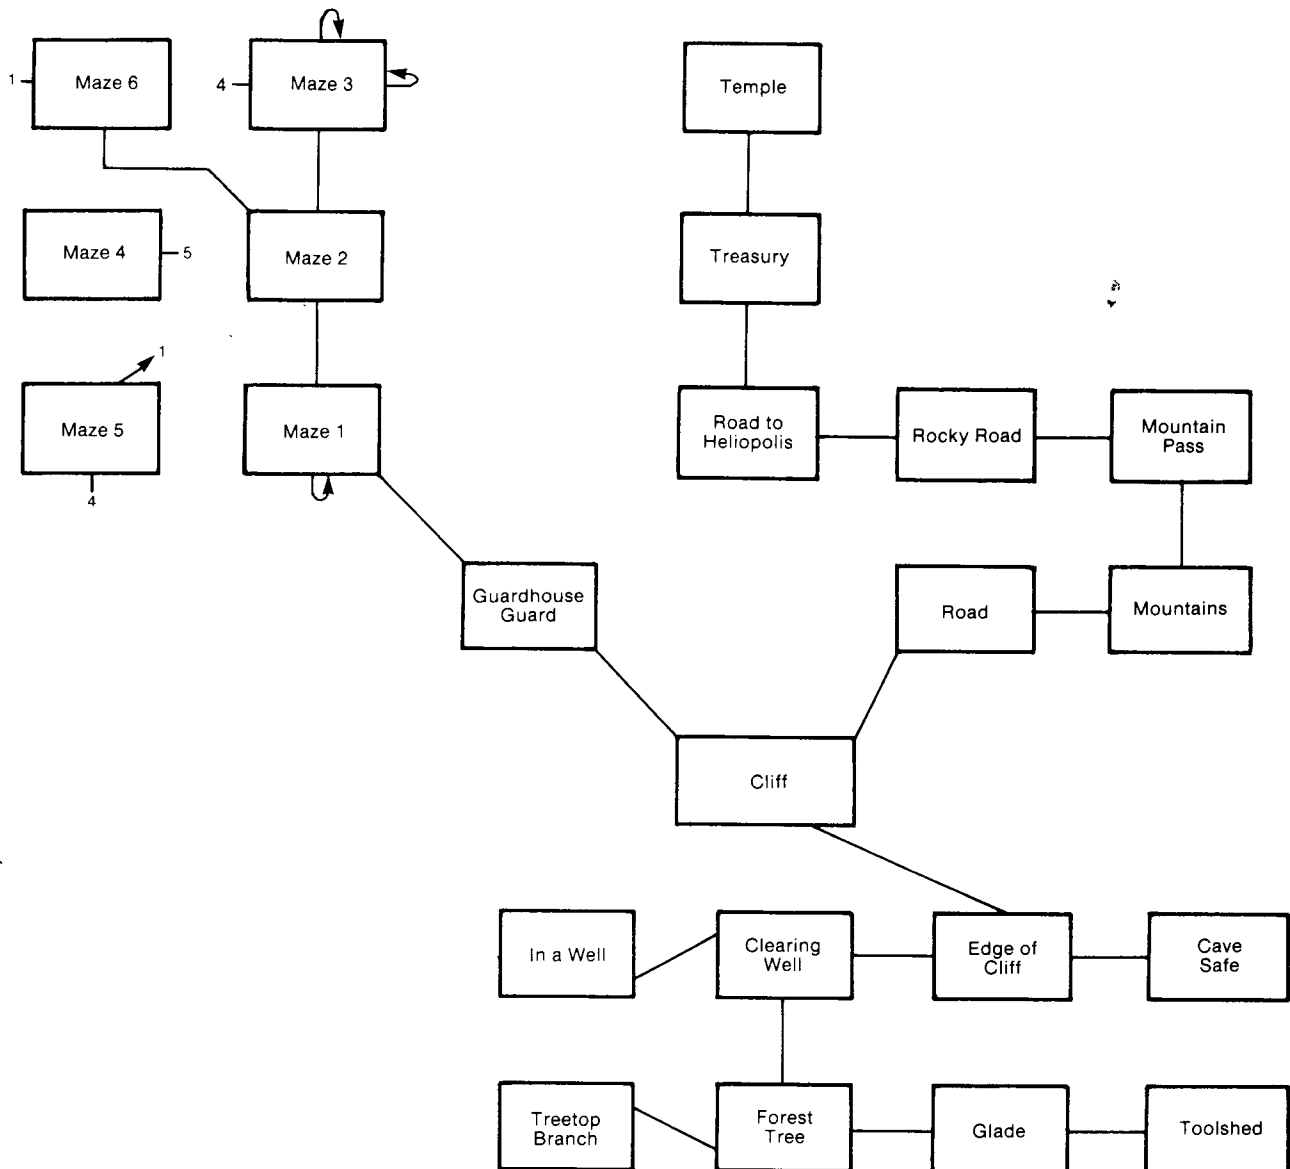

**Type:** An all-text adventure (tutorial for adventurers).

**Description:**

I could have written a solution to this, but didn't—it's not difficult, and brings you along carefully. You must uncover three treasures and complete a special task as part of this game. Other features common to big time adventures are a magic word, a maze, and a relatively interactive puzzle.

**Playability:**

A tutorial adventure for the beginner, enjoyable and worthwhile for first-time adventurers. The excellent documentation clearly describe game elements in detail, and encompasses clues to a variety of specific adventure games.

# BLADE OF BLACKPOOLE

Company: Sirius

Suggested Retail: \$39.95

Type: Hi-Res adventure with color graphics and Hi-Res text.

## Description:

You have to find and return the Sword of Myraglym. Standing between you and success are talking plants and idols, several riddles, a booze-happy monster, a tough-hided lizard, and a variety of ways for you to come to a premature end. Secondly, you gain 500 points for solving the puzzles; the last point is sorta tough.

## Playability:

While the *Blade of Blackpoole* contains no adventuring breakthroughs, it offers pleasant enough story line and graphics. Inventory management does present some challenge, since you can carry only six of the twenty-three objects at one time. Some objects have multiple uses, but the sequence of managing them becomes more difficult because you cannot readily return to certain locations. The overall difficulty leans slightly to the tough side, ideal for average adventurers.

:READ BOOK

THE BOOK CONTAINS DESCRIPTIONS OF A RITUAL AND A PRAYER CALLED 'SOLOCIN'. YOU CAN'T QUITE READ THE WORDS OF THE PRAYER, BUT YOU RECOGNIZE THE WORD DANGER :\_

CONGRATULATIONS, YOU HAVE SUCCESSFULLY FULFILLED YOUR QUEST AND RETURNED THE SWORD MYRAGLYM TO IT'S RIGHTFUL PLACE. YOUR NAME WILL BE PROCLAIMED THROUGHOUT THE LAND FOR THIS DEED, AND THESE MEN SHALL SERVE TO BEAR WITNESS FOR YOUR HEROISM AND BRAVERY.  
>MORE<

# CASTLE OF DARKNESS

**Company:** The Logical Choice

**Suggested Retail:** \$34.95

**Type:** Hi-Res adventure with color graphics and animation.

**Description:**

To overcome the might of the evil wizard, Grimnacht, you must discover the power behind his curse. You explore the many rooms of two castles, some with treasures, others with monsters or clues, and many with nothing at all. When you get through them all, you will have gained 200 points and had the dubious pleasure of watching your animated character march slowly all through the palaces.

**Playability:**

The game offers a degree of animation and occasional spoken words, but some of the graphics leave a lot to be desired, particularly small and difficult to differentiate objects. Travel from location to location is on the slow side. Also, the limited vocabulary often makes progress frustratingly slow.

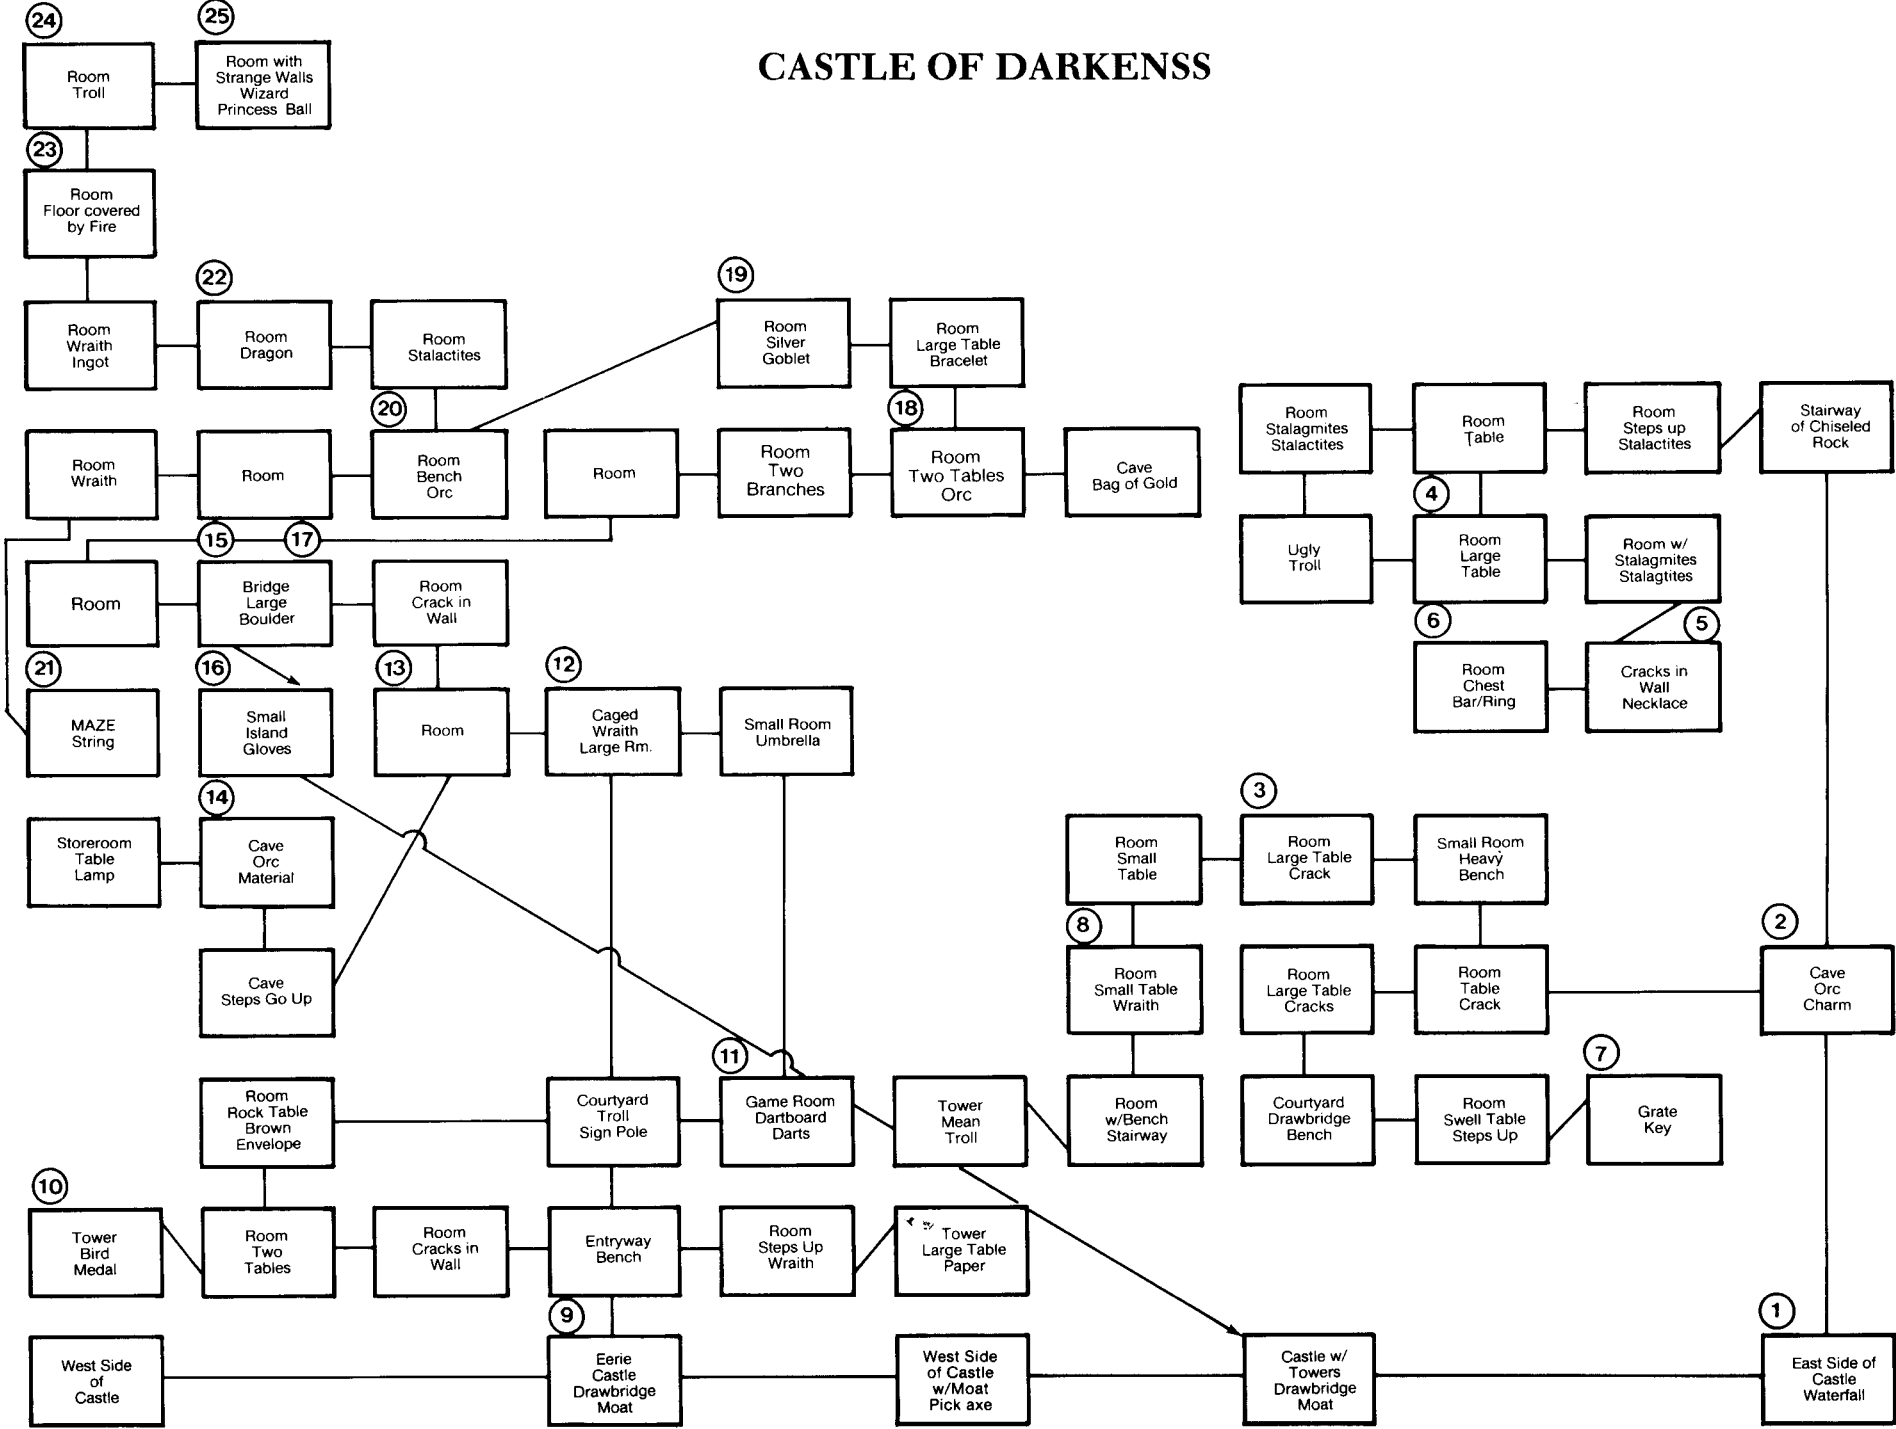

# CASTLE OF DARKNESS Maze

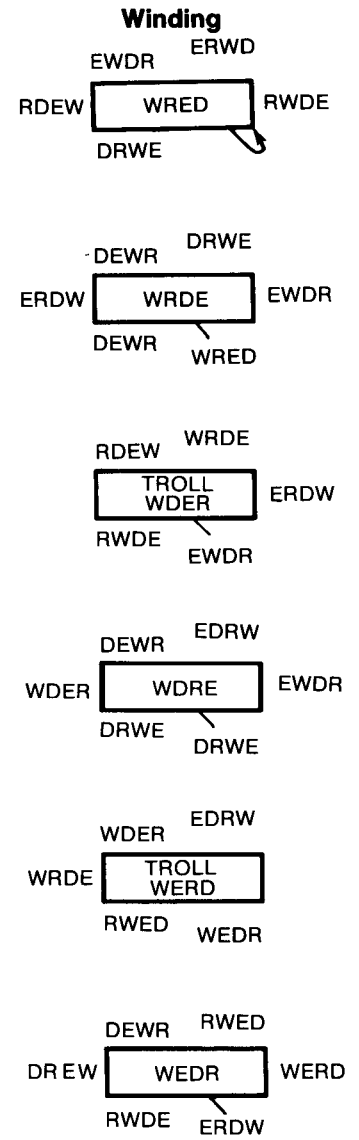

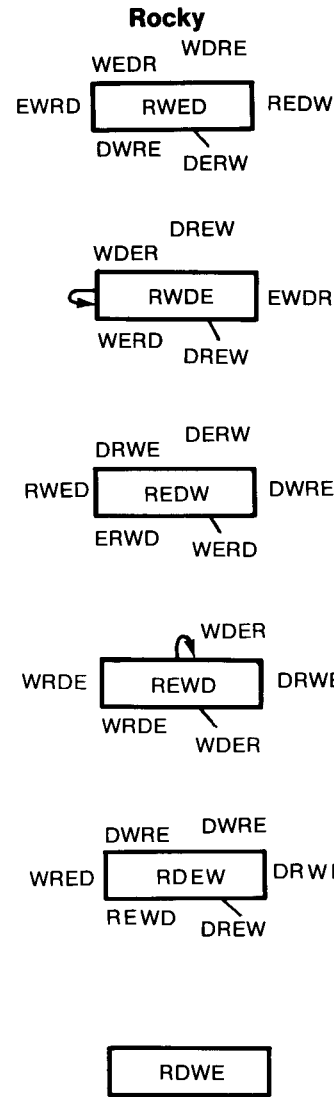

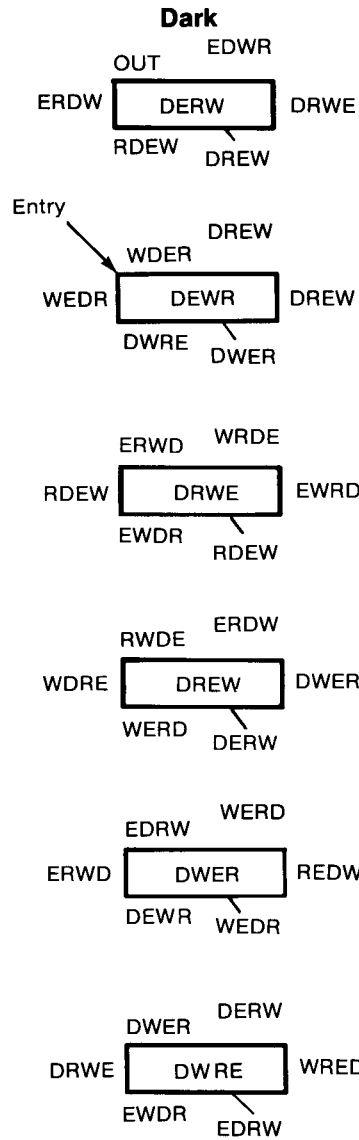

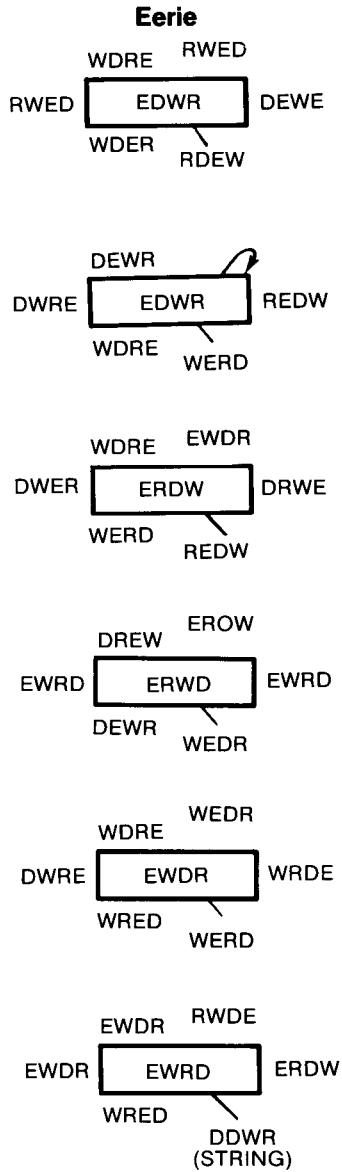

Note: Letters refer to the first letter of the four adjectives.

# CASTLE OF DARKENSS

# CASTLE OF DARKNESS

## Maze

Note: Letters refer to the first letter of the four adjectives.

# THE COUNT

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, scheduled for release in Hi-Res form. Price includes *Voodoo Castle* and *Strange Odyssey*.

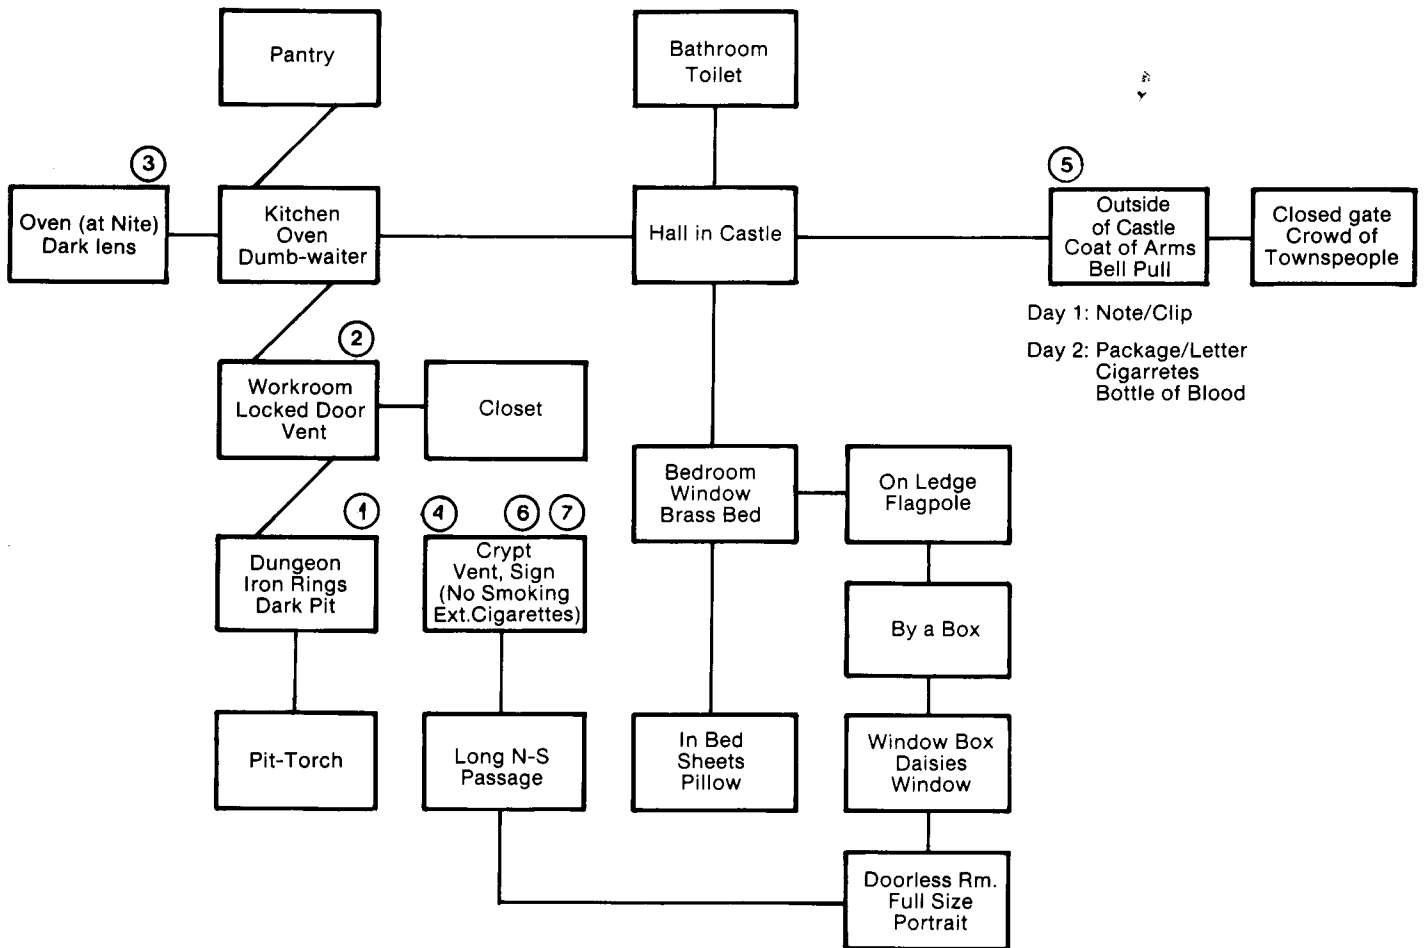

**Description:**

While this game has relatively few locations, a new element—time—has been introduced. You must properly time-phase your activities over three days and nights in order to find and kill Count Dracula. If you don't fix his wagon in three days, you won't be around for the fourth. Natch, there are bats, garlic, blood, Transylvanian cigarettes and some No-Doze pills to help you keep awake at night.

**Playability:**

Slightly less complex perhaps than some of the other Scott Adams' games, but unique in that "things change" between night and day, and between successive days. The two-word syntax has a limited but adequate vocabulary. As with all of the Adams games, the text is brief and to the point. The game offers a single, easily made or recalled saved-game.

## THE COUNT

# THE COVETED MIRROR

**Company:** Penguin Software

**Suggested Retail:** \$19.95

**Type:** Hi-Res adventure with color graphics.

**Description:**

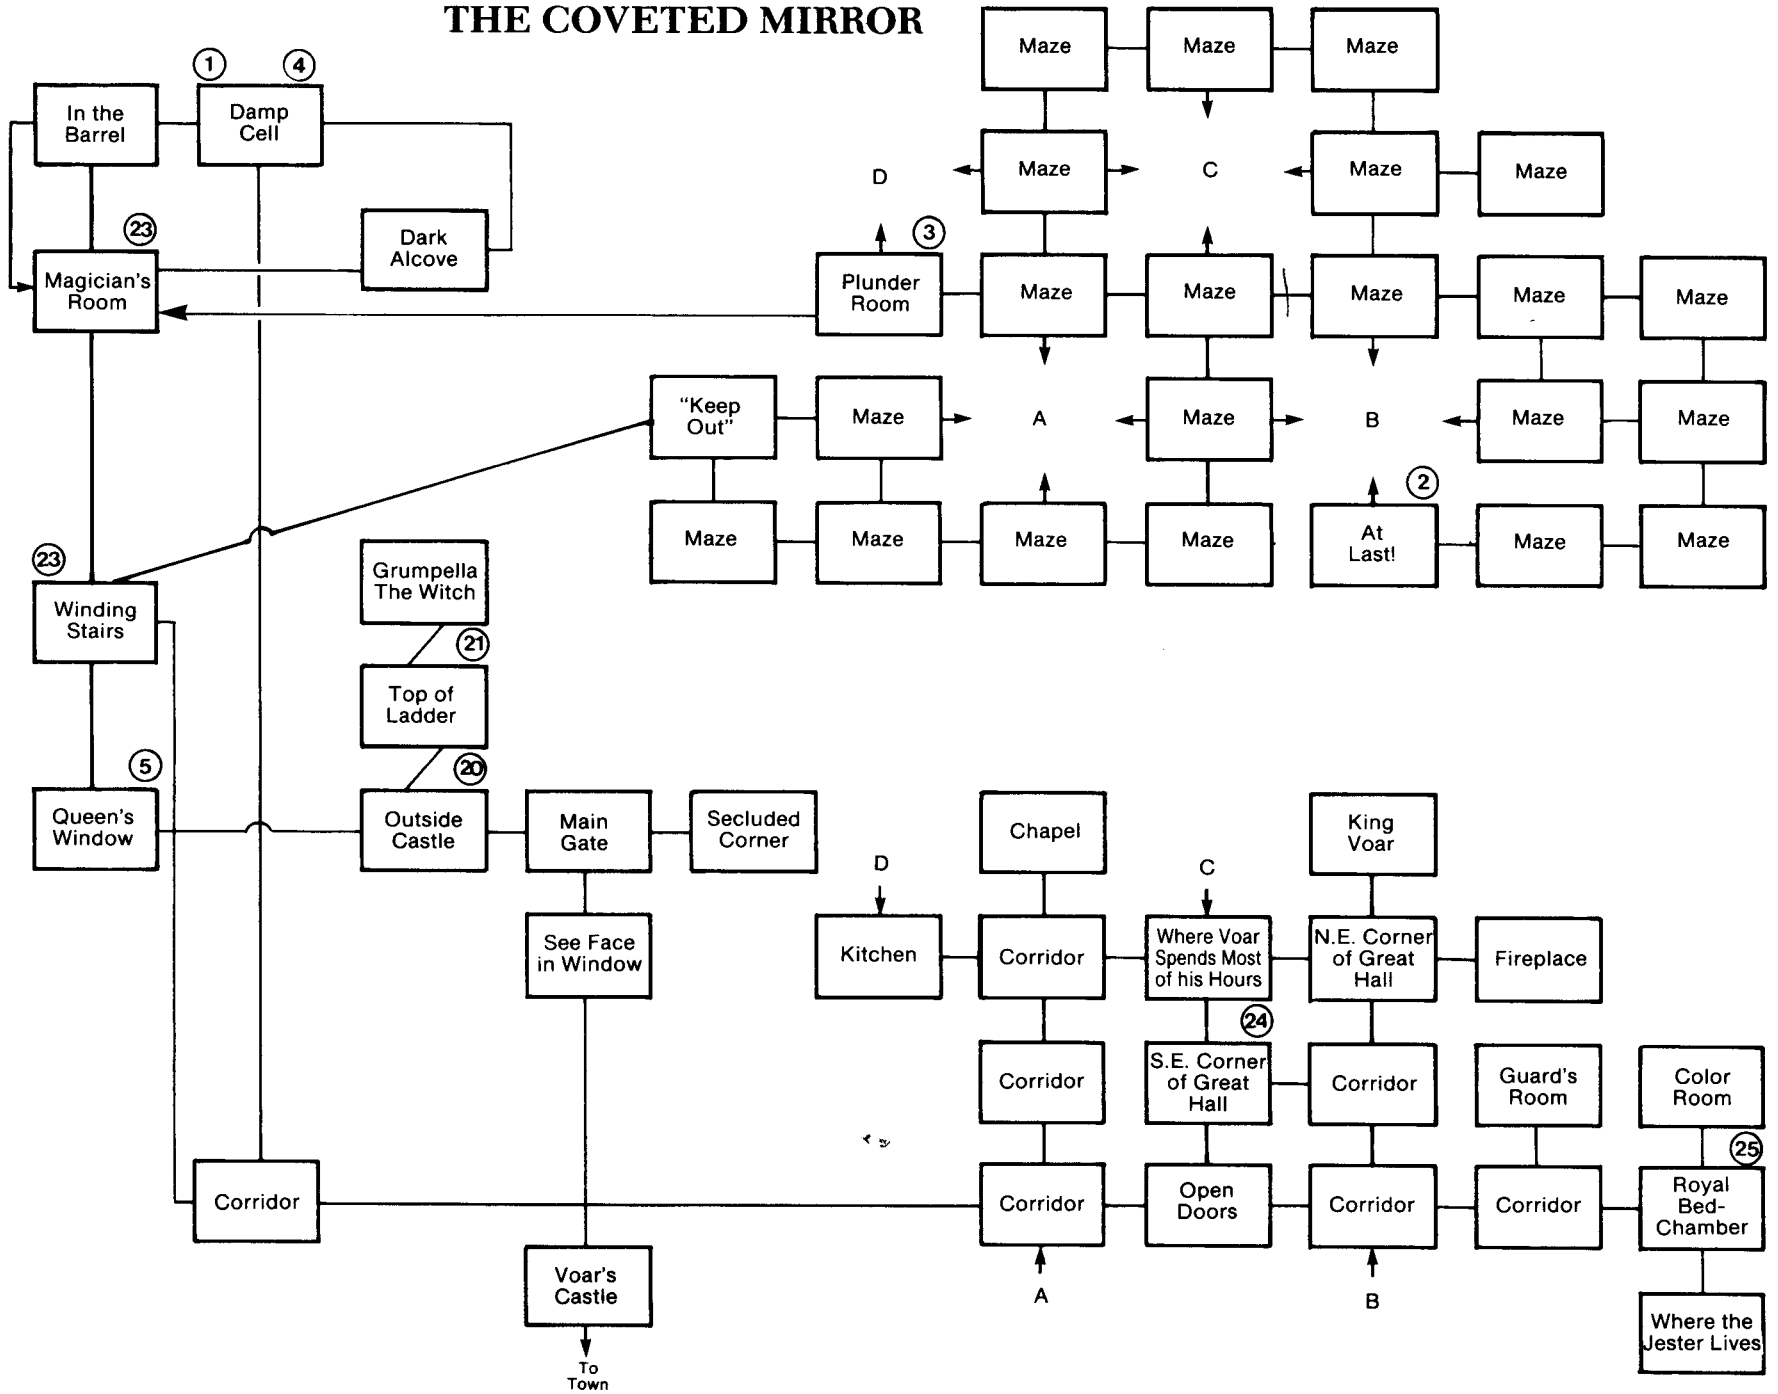

To break the evil rule of King Voar, you must find the fifth piece of a magic mirror. To do so, you must know the shapes of the other four pieces, solve a number of related puzzles, and play three simple arcade games. Periodically, the King yanks you back if the Jailer finds you missing, but the Jailer lets you roam if you bribe him.

**Playability:**

“Talking” characters will help you order and solve the frequent but not overly difficult puzzles. The characters often give novel responses should you give them objects not intended for them. A light-hearted game with nice graphics and a degree of animation, but a rather slow fill time. The vocabulary is nicely tailored to the game. You get seven saved-game positions, which you should use frequently—especially in the maze. Suitable for all levels of gaming ability.

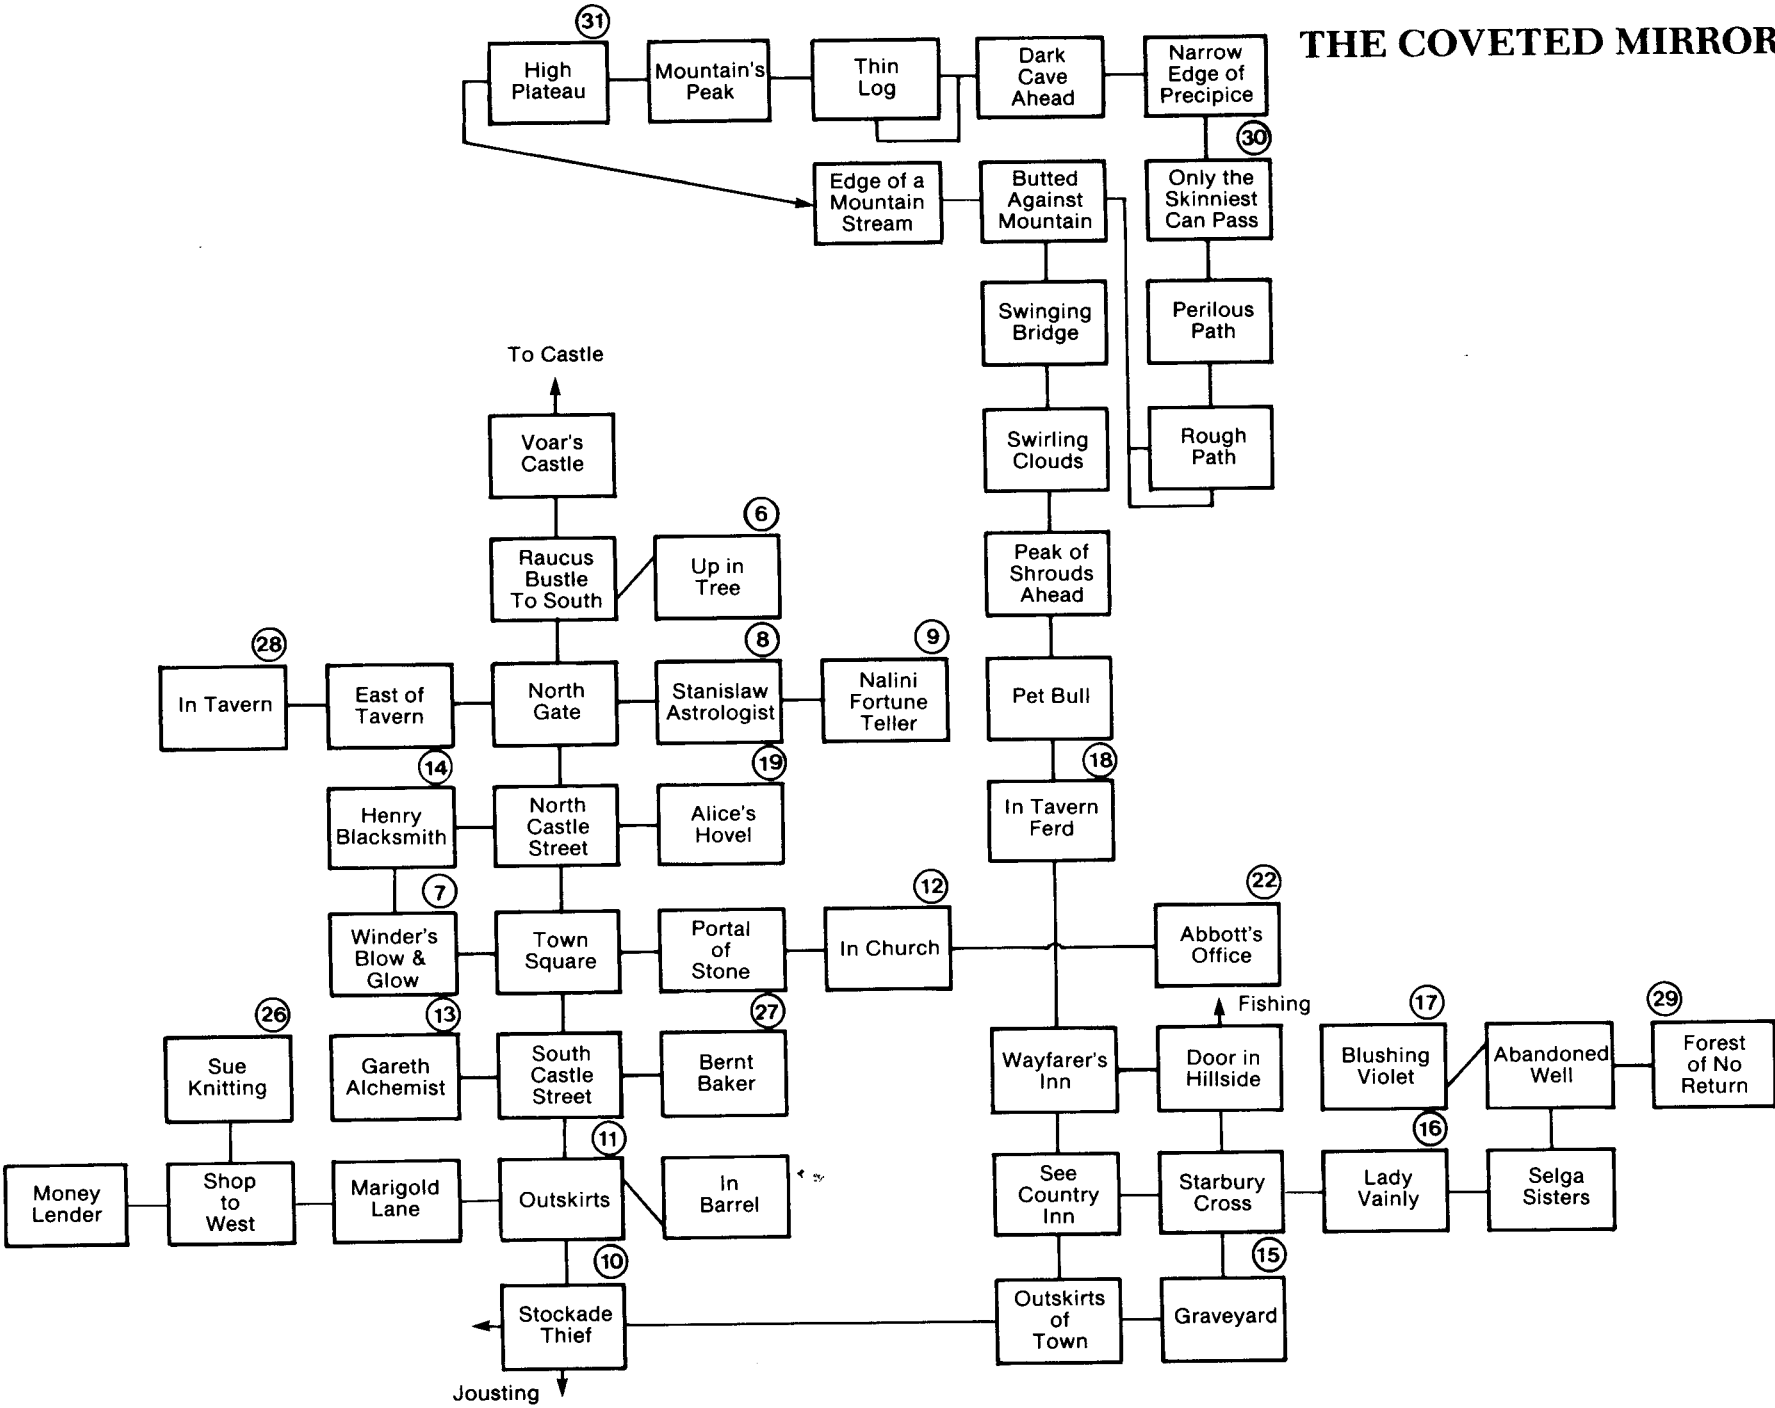

# THE COVETED MIRROR

# THE COVETED MIRROR

# CRANSTON MANOR

**Company:** Sierra On-Line Systems

**Suggested Retail:** \$34.95

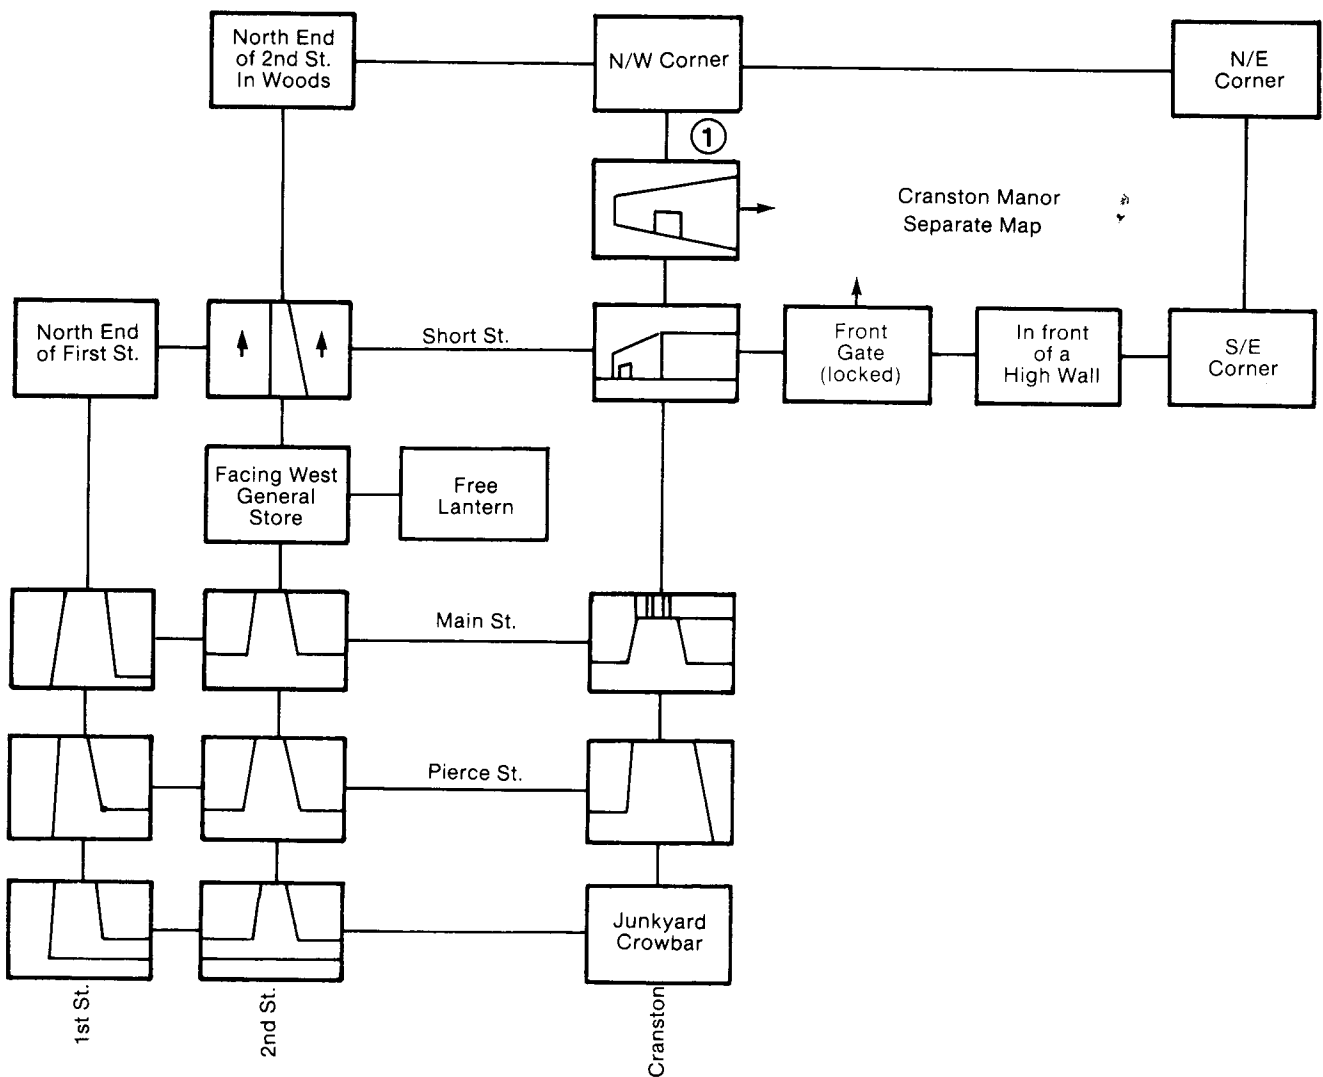

**Type:** Hi-Res adventure with color graphics.

**Description:**

You must recover sixteen treasures from the multi-roomed Manor so that the town can be restored to its former glory. *Cranston Manor* itself is all indoors—upstairs, downstairs, and basement—with a Suit of Armor chasing you in the house and a dangerous Toy Soldier after you in the basement. The conclusion extends congratulations and designates you a Class 3 Adventurer!

**Playability:**

The game provides a few sticky puzzles and several interesting interconnections, but the inability to restore or restart the game after getting killed off is a serious problem! Despite the relatively large size of this game, it seems to lack the imagination and freshness which marked *The Wizard and the Princess*.

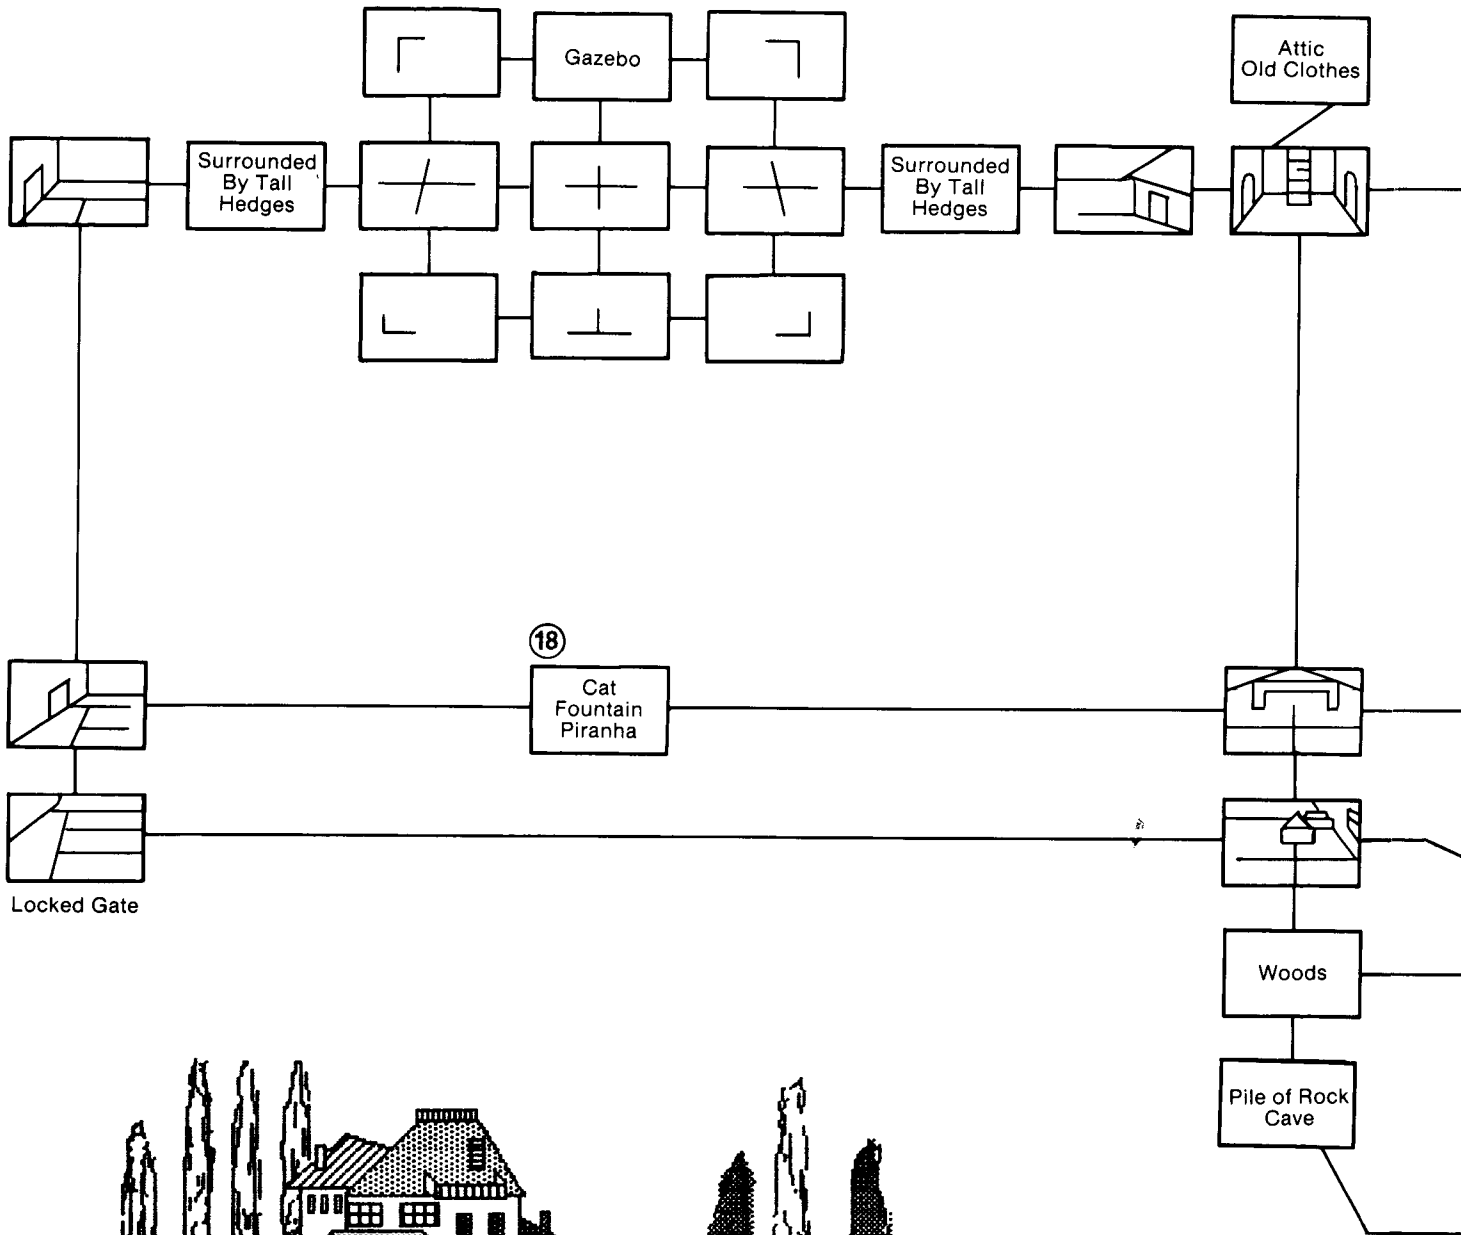

# CRANSTON MANOR

## Basement

# CRANSTON MANOR

Hires Adv. No. 3

# CREATURE VENTURE

**Company:** Highland Computer Services

**Suggested Retail:** \$24.95

**Type:** Black and white Hi-Res adventure.

## Description:

You enter and explore a mansion which you have inherited, deal with its inhabitants, and find the treasure, which is in two parts. Once you find the first part of the treasure, you enter a Master's Game, made more difficult because it no longer allows you the save-game feature and essentially limits the number of moves available to you.

## Playability:

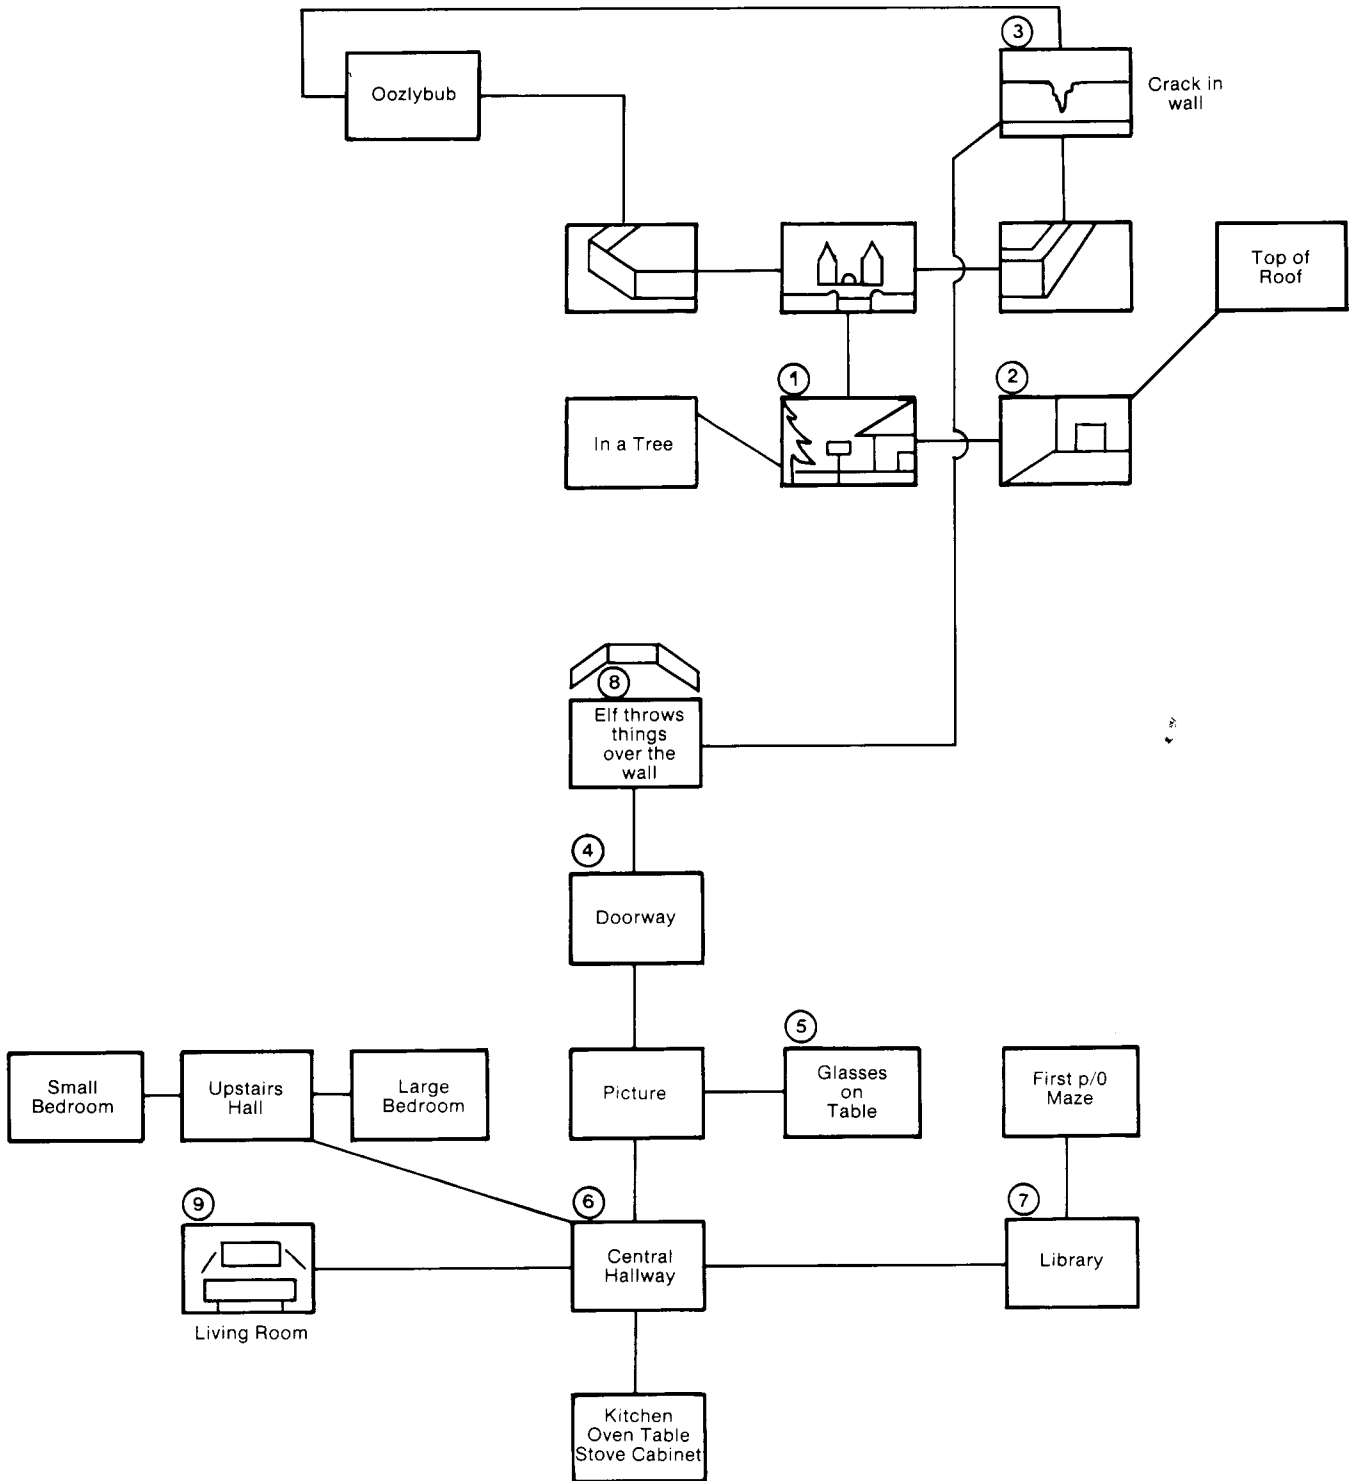

A few interesting animation sequences and challenging portions. Adult adventurers may become bored quickly because of the limited vocabulary, but kids will find this game, written somewhat tongue-in-cheek, rather interesting.

### Master Game

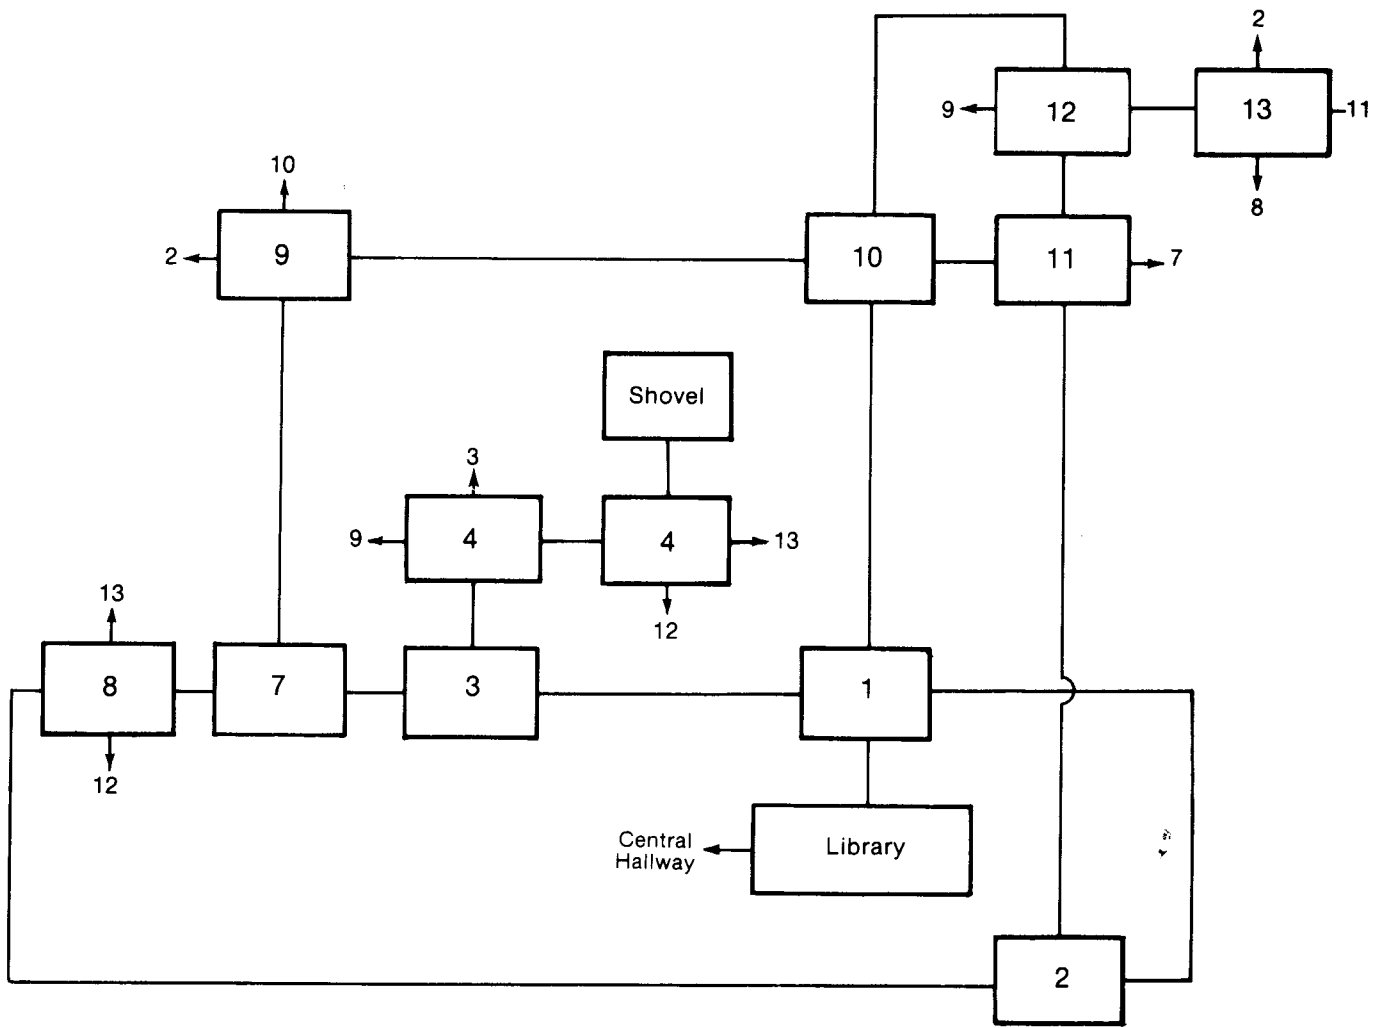

# CREATURE VENTURE

## Part 1

# CREATURE VENTURE

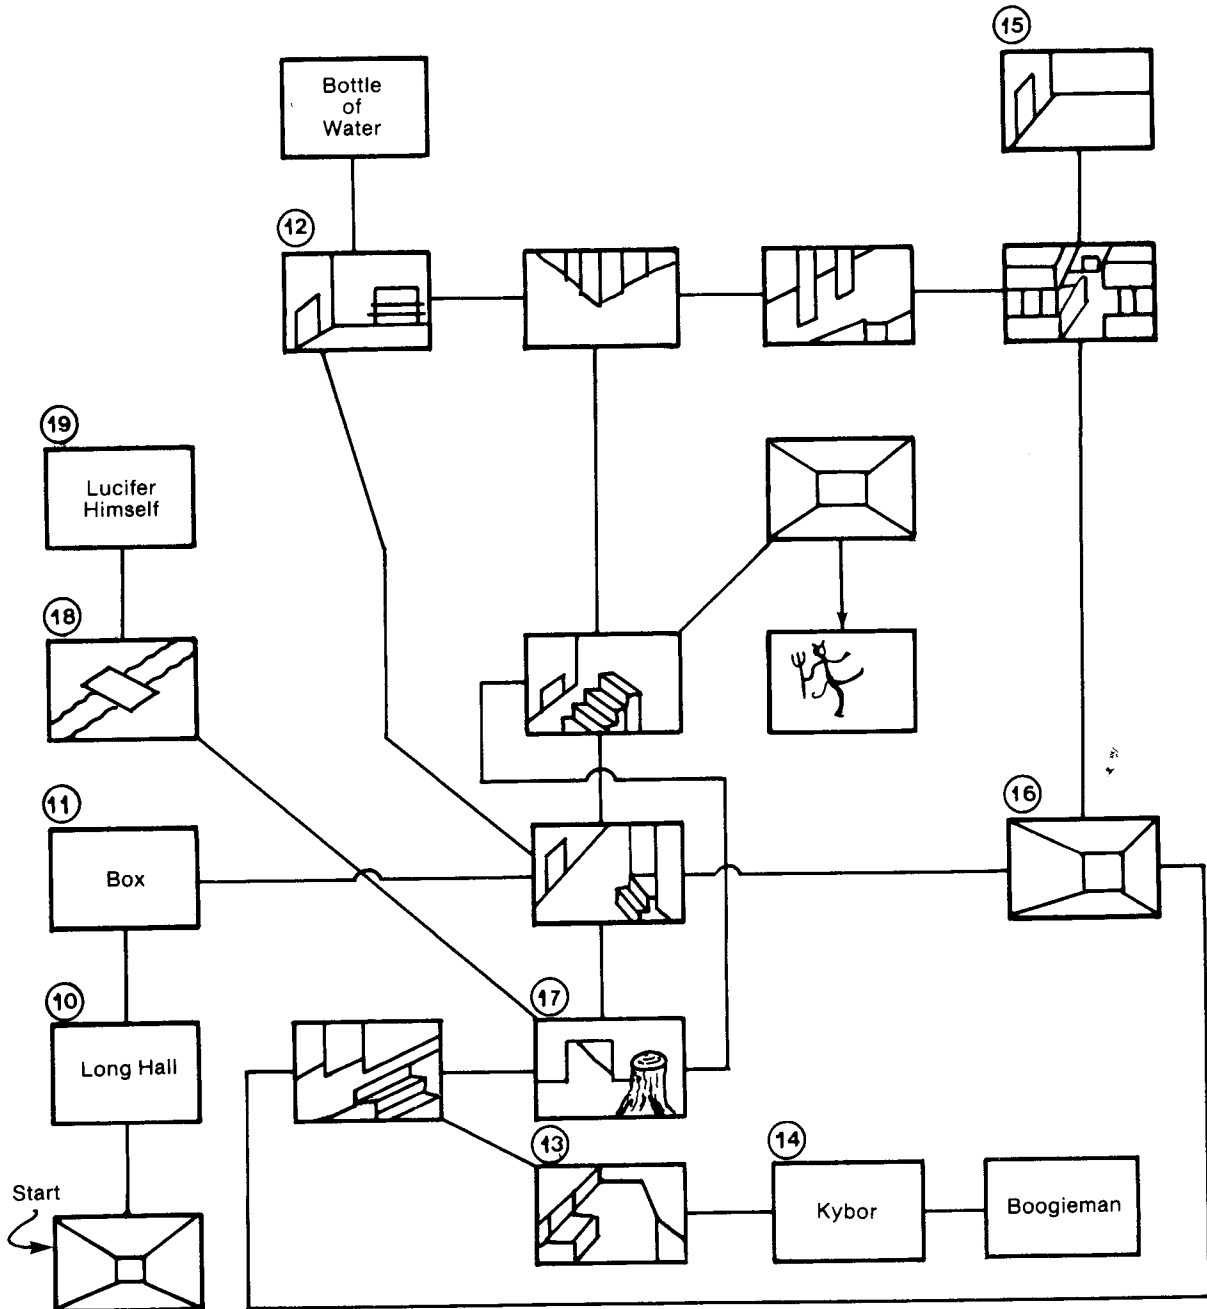

## Maze

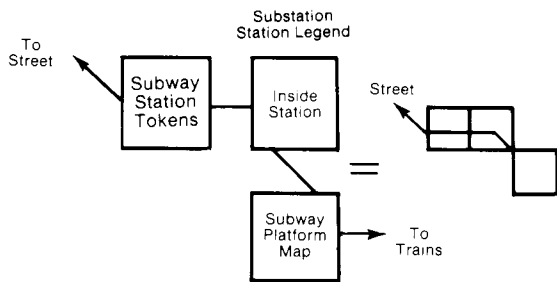

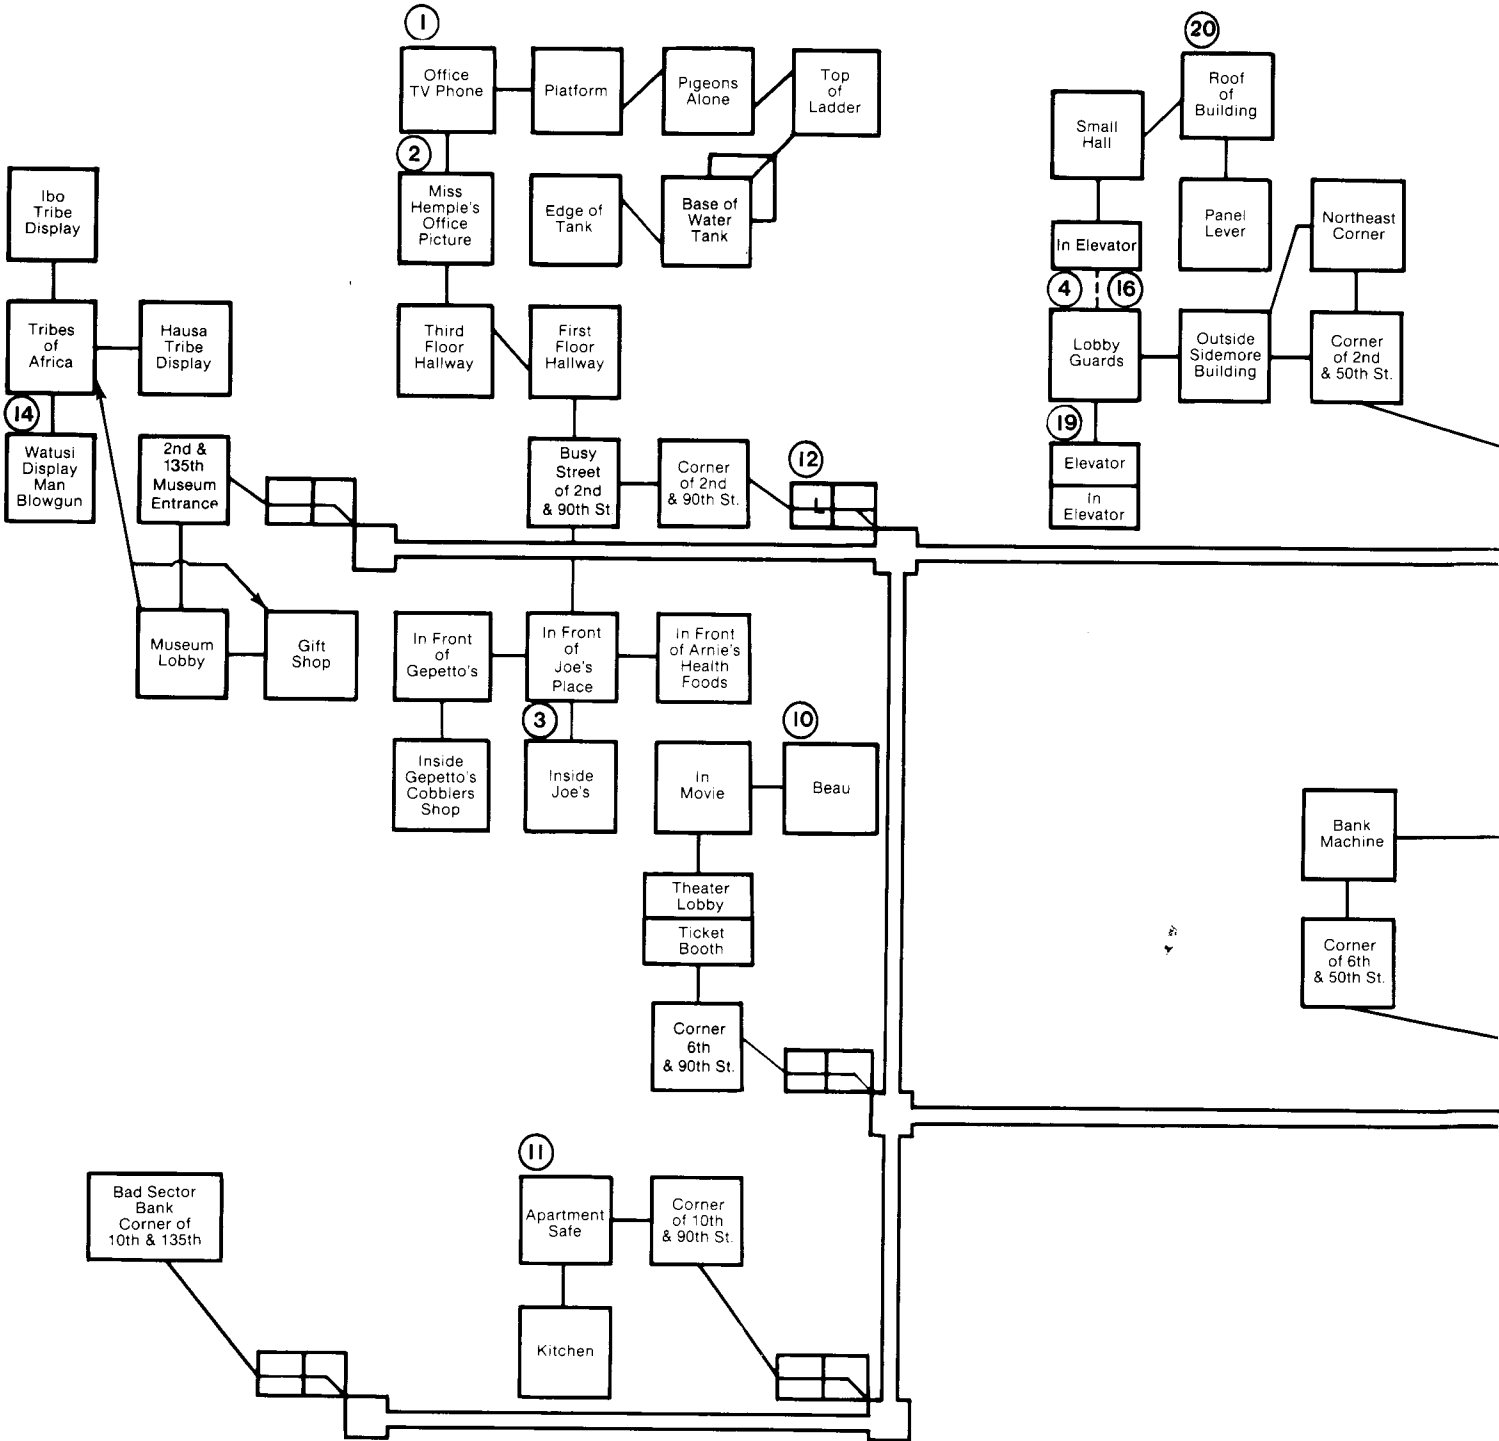

# CREATURE VENTURE

## Part 2

# CRIME STOPPER

# CRIME STOPPER

Company: Hayden Software

Suggested Retail: \$34.95

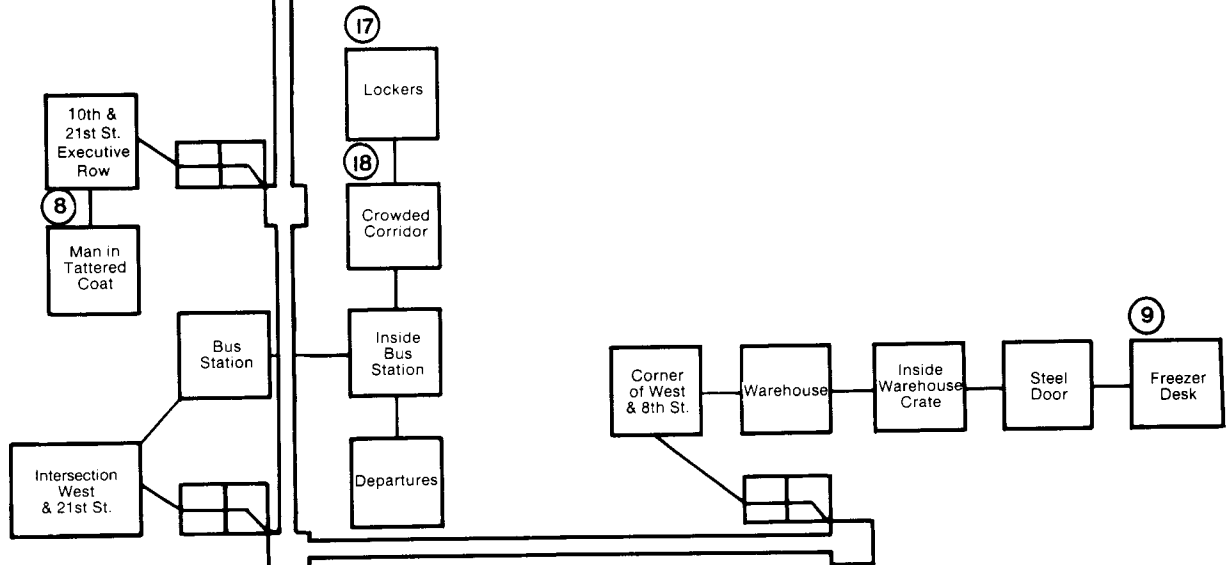

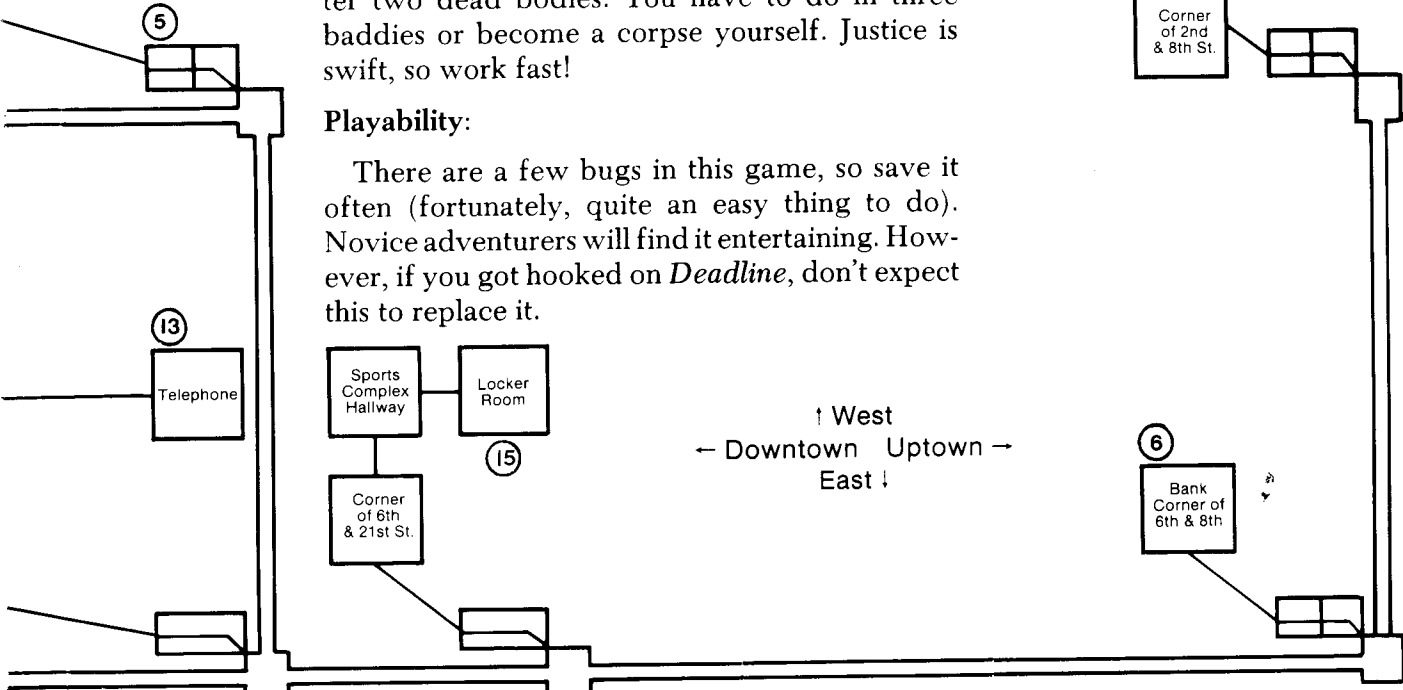

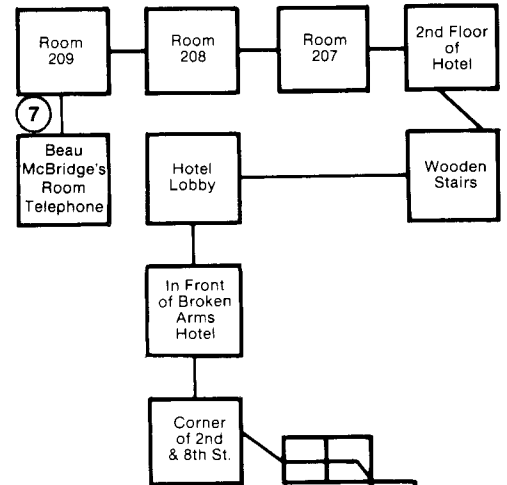

Type: All-text mystery game.

## Description:

You are Al Clubs, Private Investigator. You arrive at your office at 7 a.m. to find that you have been hired to recover a kidnapped heiress. You have until midnight to complete your task. You spend a lot of time in the subway. En route, you have plenty of reading material and you encounter two dead bodies. You have to do in three baddies or become a corpse yourself. Justice is swift, so work fast!

## Playability:

There are a few bugs in this game, so save it often (fortunately, quite an easy thing to do). Novice adventurers will find it entertaining. However, if you got hooked on *Deadline*, don't expect this to replace it.

# CRYPT OF MEDEA

**Company:** Sir-Tech Software, Inc.

**Suggested Retail:** \$34.95

**Type:** Hi-Res adventure with color graphics.

**Description:**

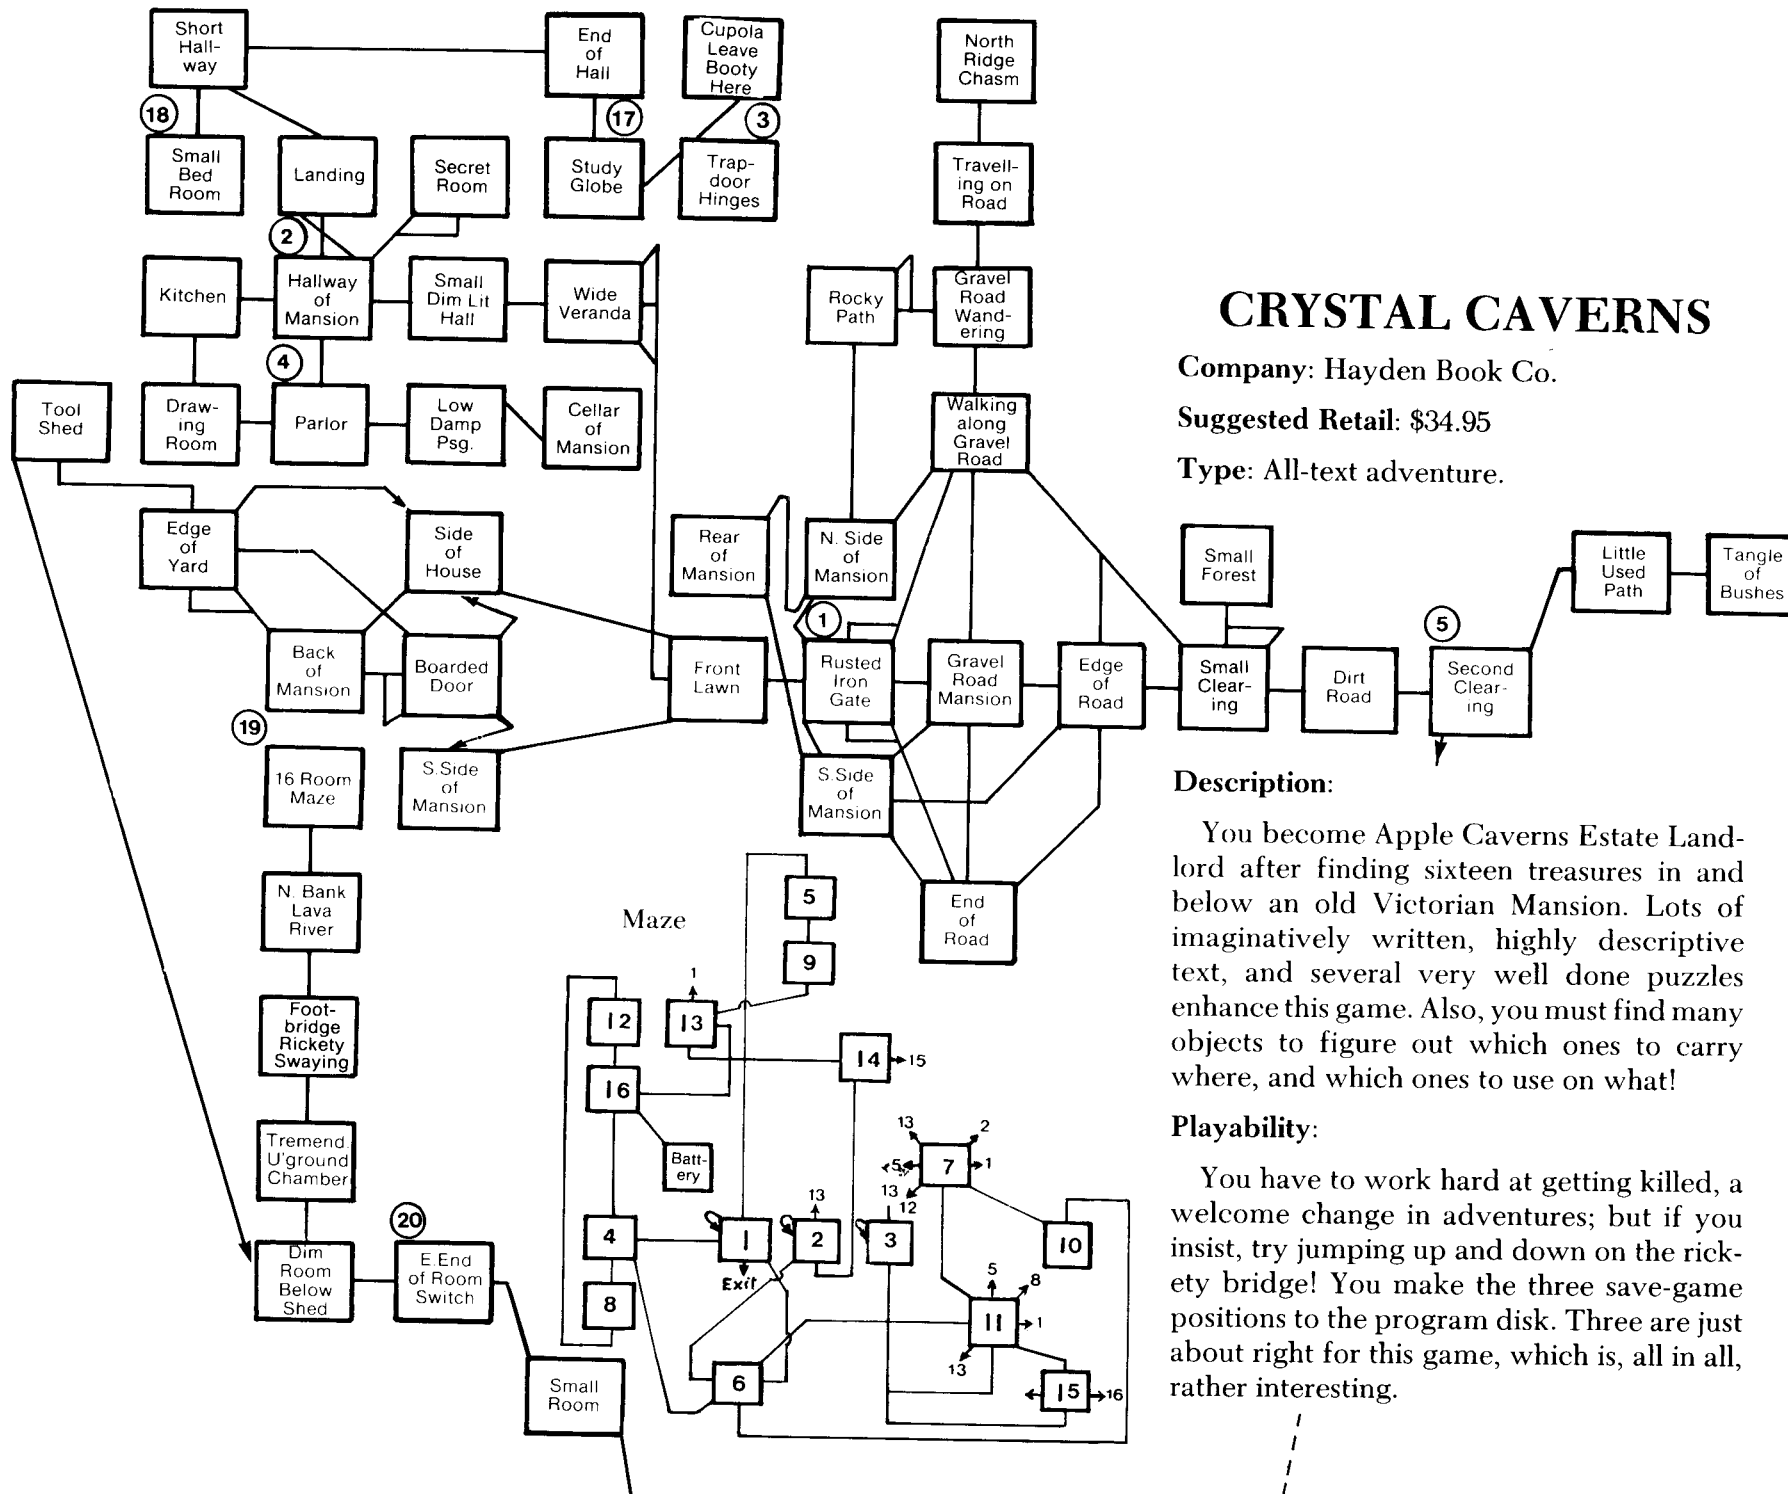

A humorless and gruesome game, full of blood, gore, and little else. You find yourself in an underground mausoleum; your mission is simply to escape. Decapitated corpses, flea-infested dogs (dead, naturally), vats full of body pieces, and mutants stand in your way. I can't say much good about this game, either from the standpoint of its design or implementation.

**Playability:**

This game does not suit children because of its unnecessary use of violence and horror. The graphics and text are rather insipid. Nonetheless, the difficulty factor is relatively high, partly because of the atrocious vocabulary and partly because of the lack of logic associated with the puzzles.

# CRYSTAL CAVERNS

Company: Hayden Book Co.

Suggested Retail: \$34.95

Type: All-text adventure.

## Description:

You become Apple Caverns Estate Landlord after finding sixteen treasures in and below an old Victorian Mansion. Lots of imaginatively written, highly descriptive text, and several very well done puzzles enhance this game. Also, you must find many objects to figure out which ones to carry where, and which ones to use on what!

## Playability:

You have to work hard at getting killed, a welcome change in adventures; but if you insist, try jumping up and down on the rickety bridge! You make the three save-game positions to the program disk. Three are just about right for this game, which is, all in all, rather interesting.

# CURSE OF CROWLEY MANOR

**Company:** Adventure International

**Suggested Retail:** \$29.95

**Type:** Hi-Res mystery with color graphics.

**Description:**

As Inspector Black, you start in your Scotland Yard office (which you cannot leave until the phone rings). An officer (later found gruesomely mutilated) summons you to Crowley Manor to investigate the murder of Lord Crowley. The balance of the game proves equally gruesome, but the ending is interesting and well done.

**Playability:**

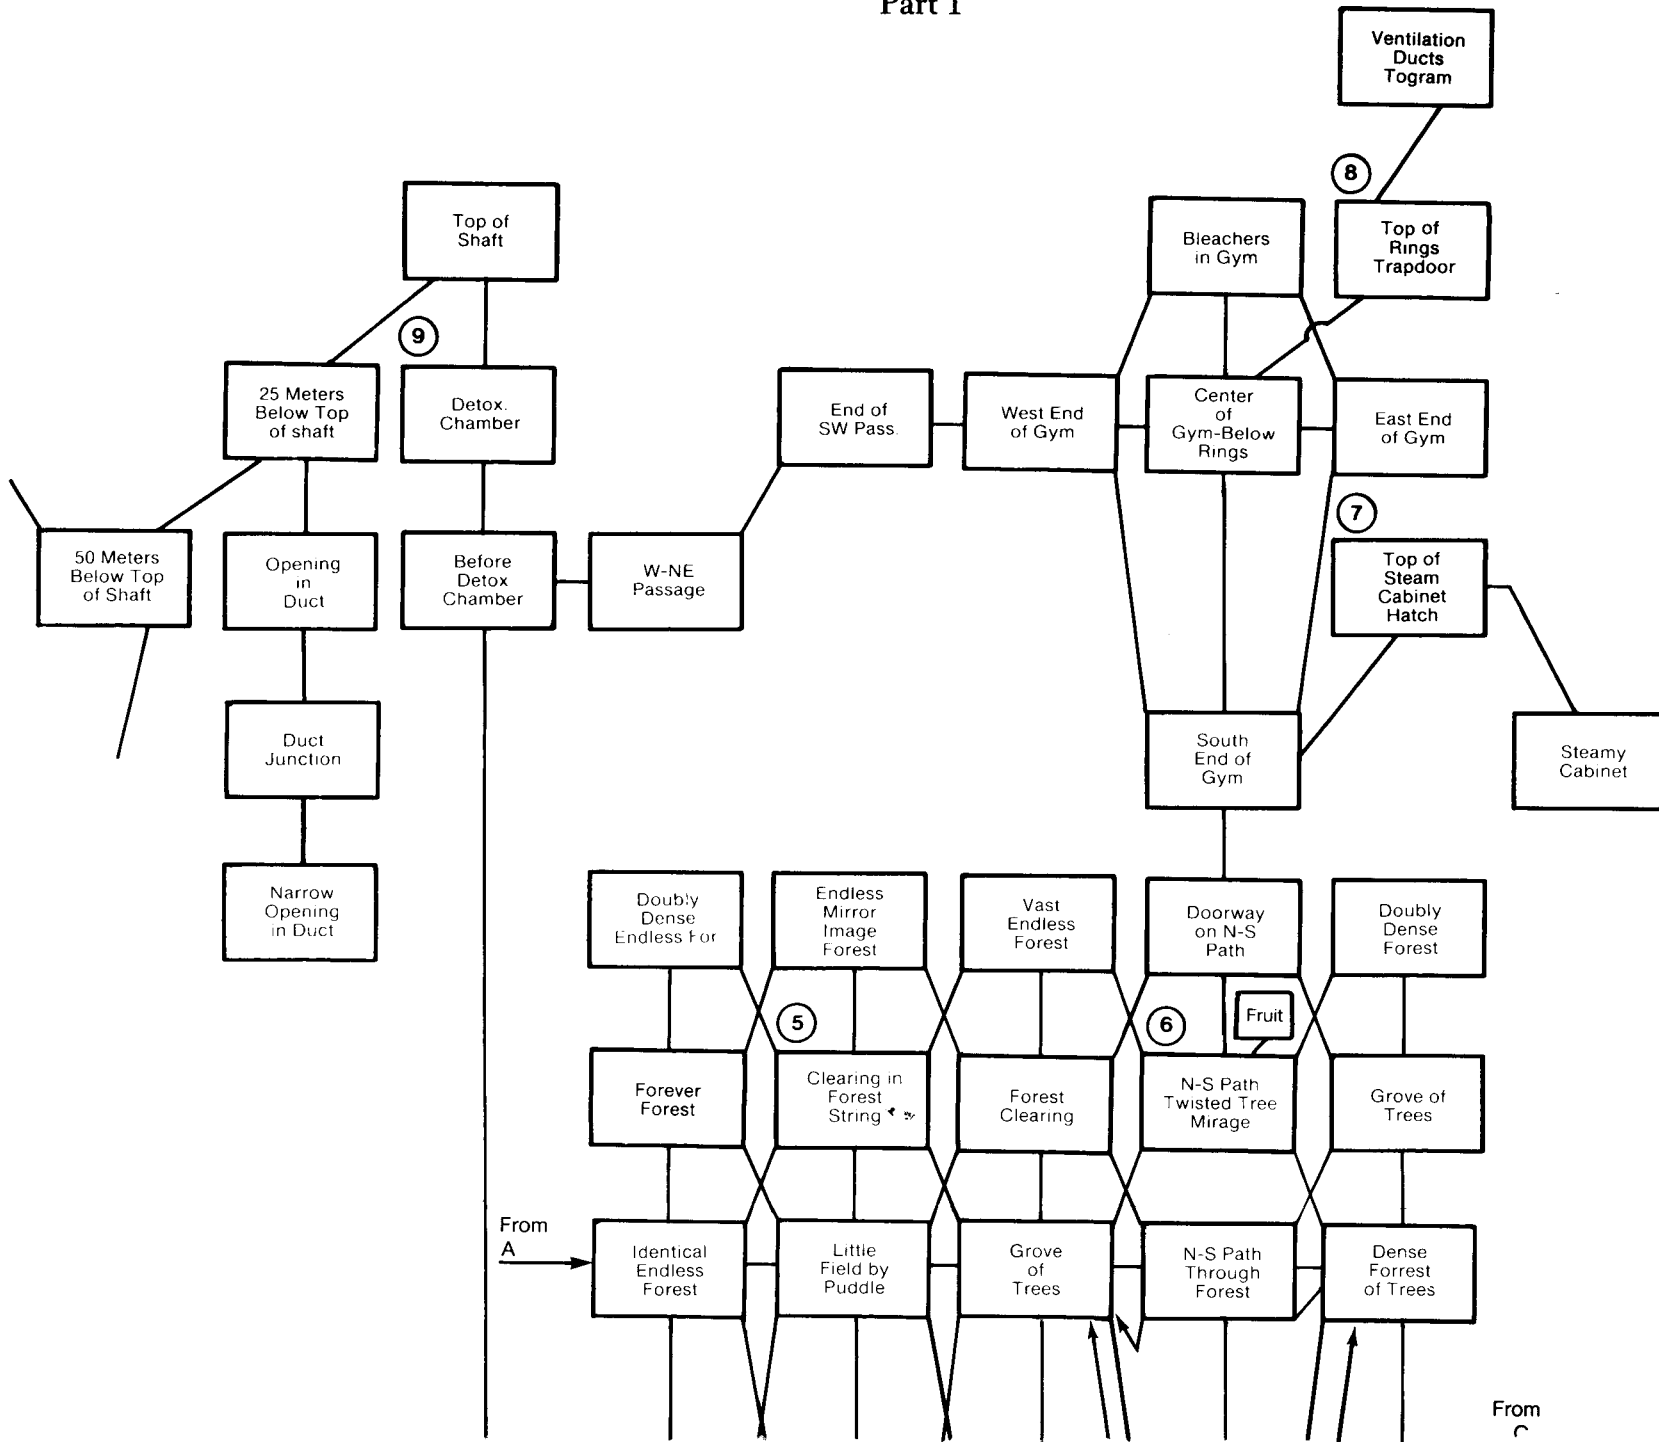

You will find it all too easy to get stuck at one location in this guessing game, looking for the right word combination in a full sentence command. Quite often, otherwise insurmountable obstacles simply disappear if you happen to be carrying the proper object, so be sure to look everywhere.

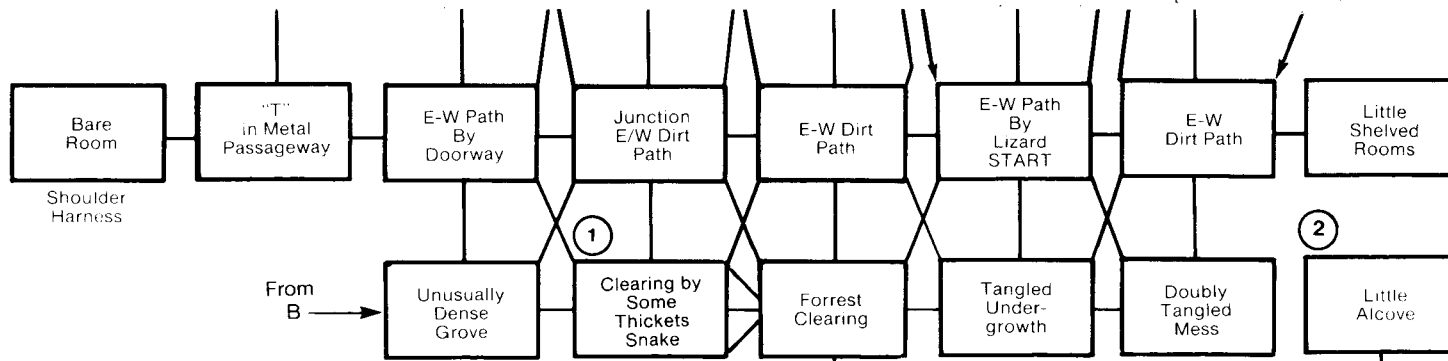

# CYBORG Part I

# CYBORG

Company: Sentient Software, Inc.

Suggested Retail: \$32.95

Type: All-text science fiction adventure game.

## Description:

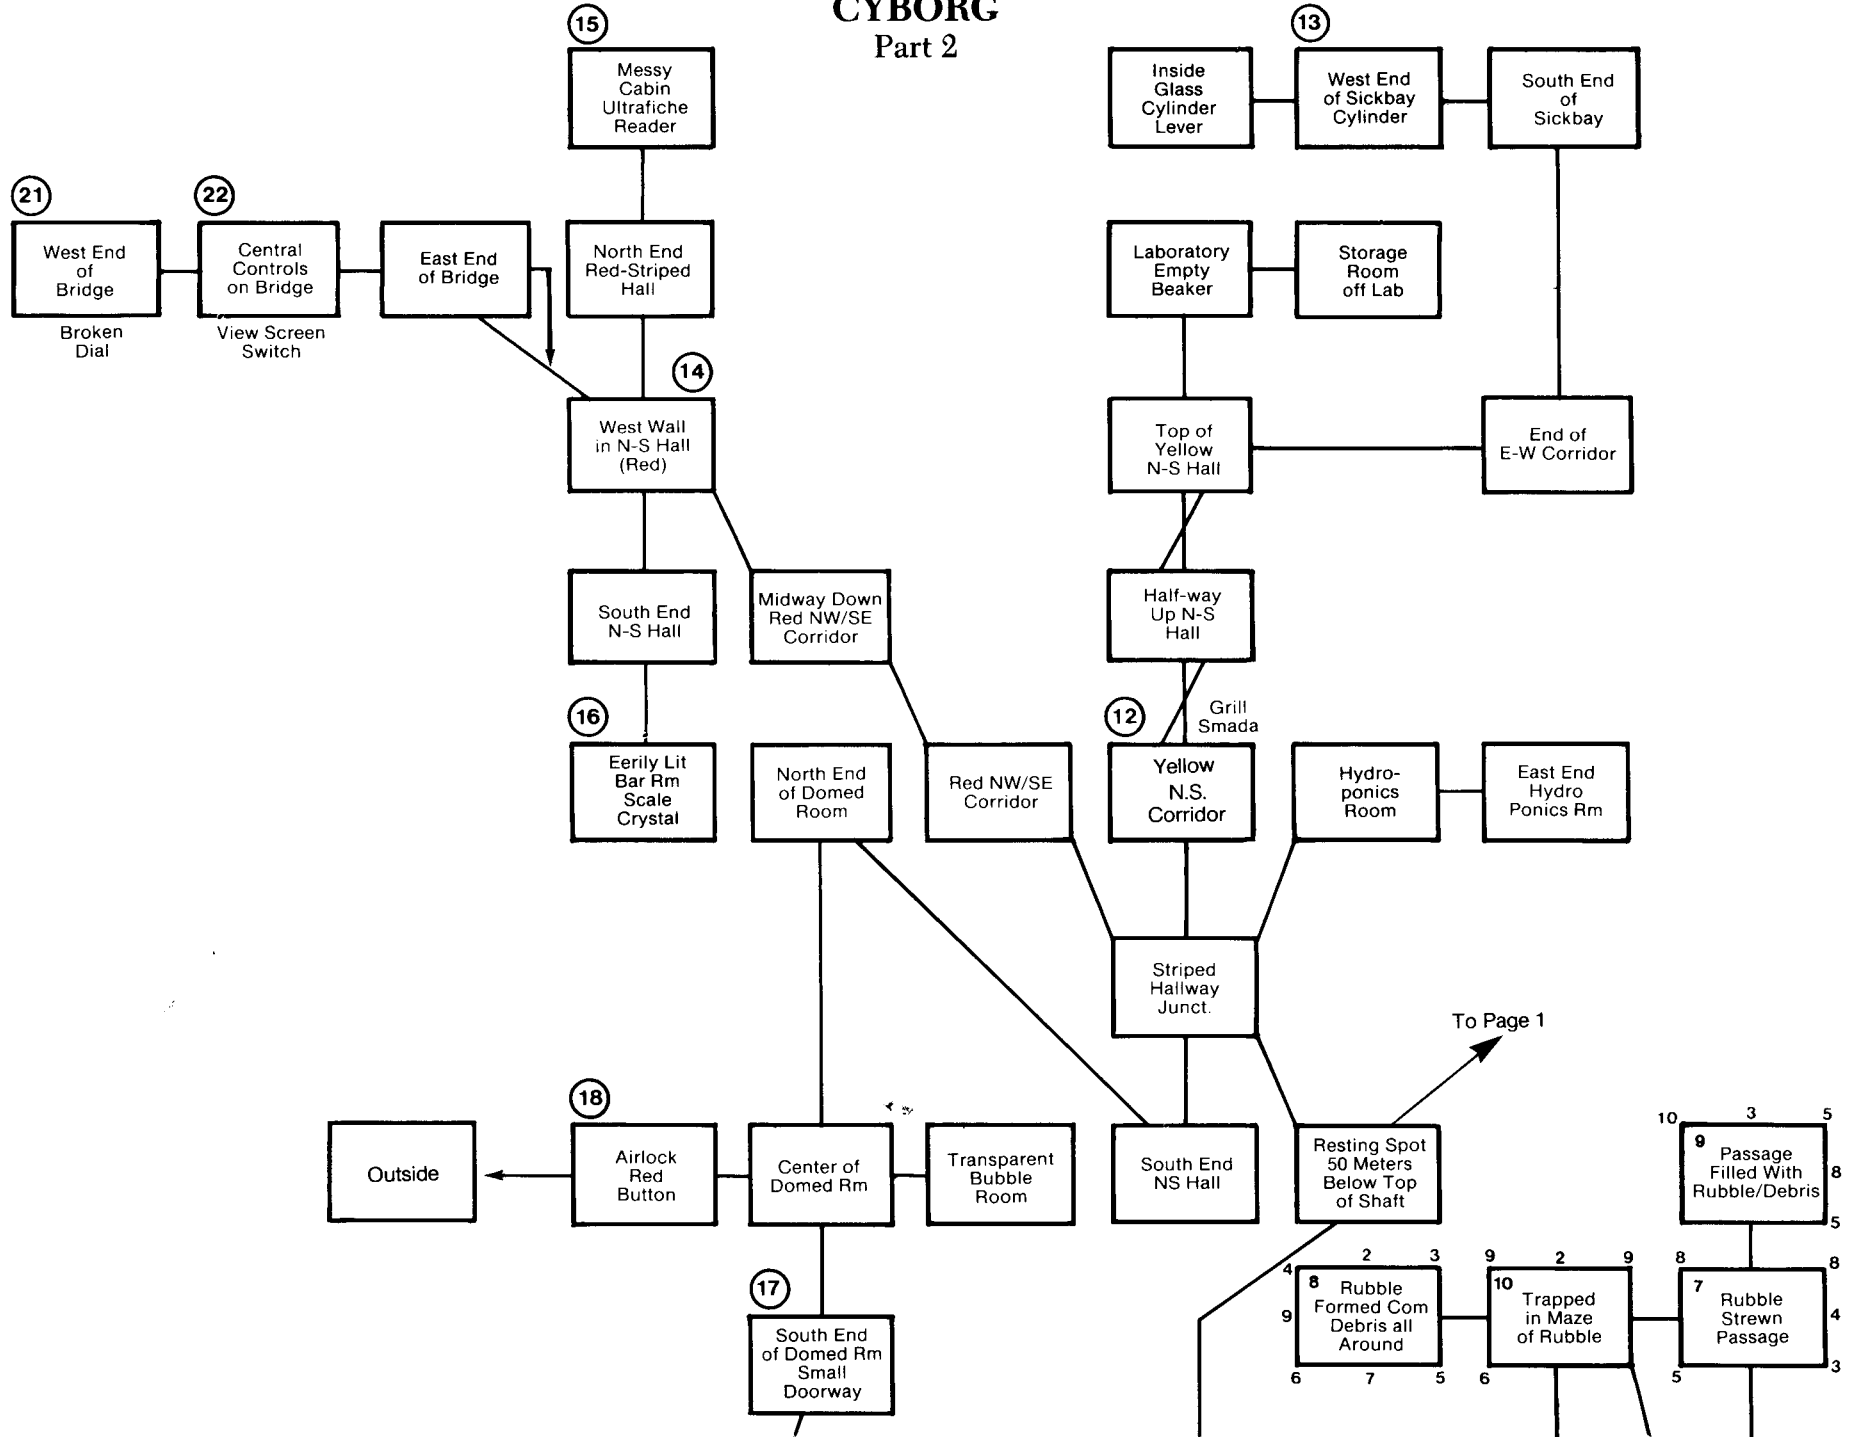

At the outset, you know only that you are a Cyborg, half-human and half-robot. Having an unusually cohesive plot, the game reads more like a novel than an adventure. It's up to you to figure out the objective, which doesn't become clear until late in the game following a surprise arcade-like interlude. A cute and clever Droid follows you around, occasionally providing you with valuable clues.

## Playability:

Although disk interactive and slightly on the slow side, *Cyborg* offers an interesting challenge, dominated by the "what, where and why am I?" theme, and a well-developed plot with a few surprises along the way. The size of the game itself becomes a challenge. It proves relatively difficult to get killed off, and even if you do, you get a chance at reincarnation!

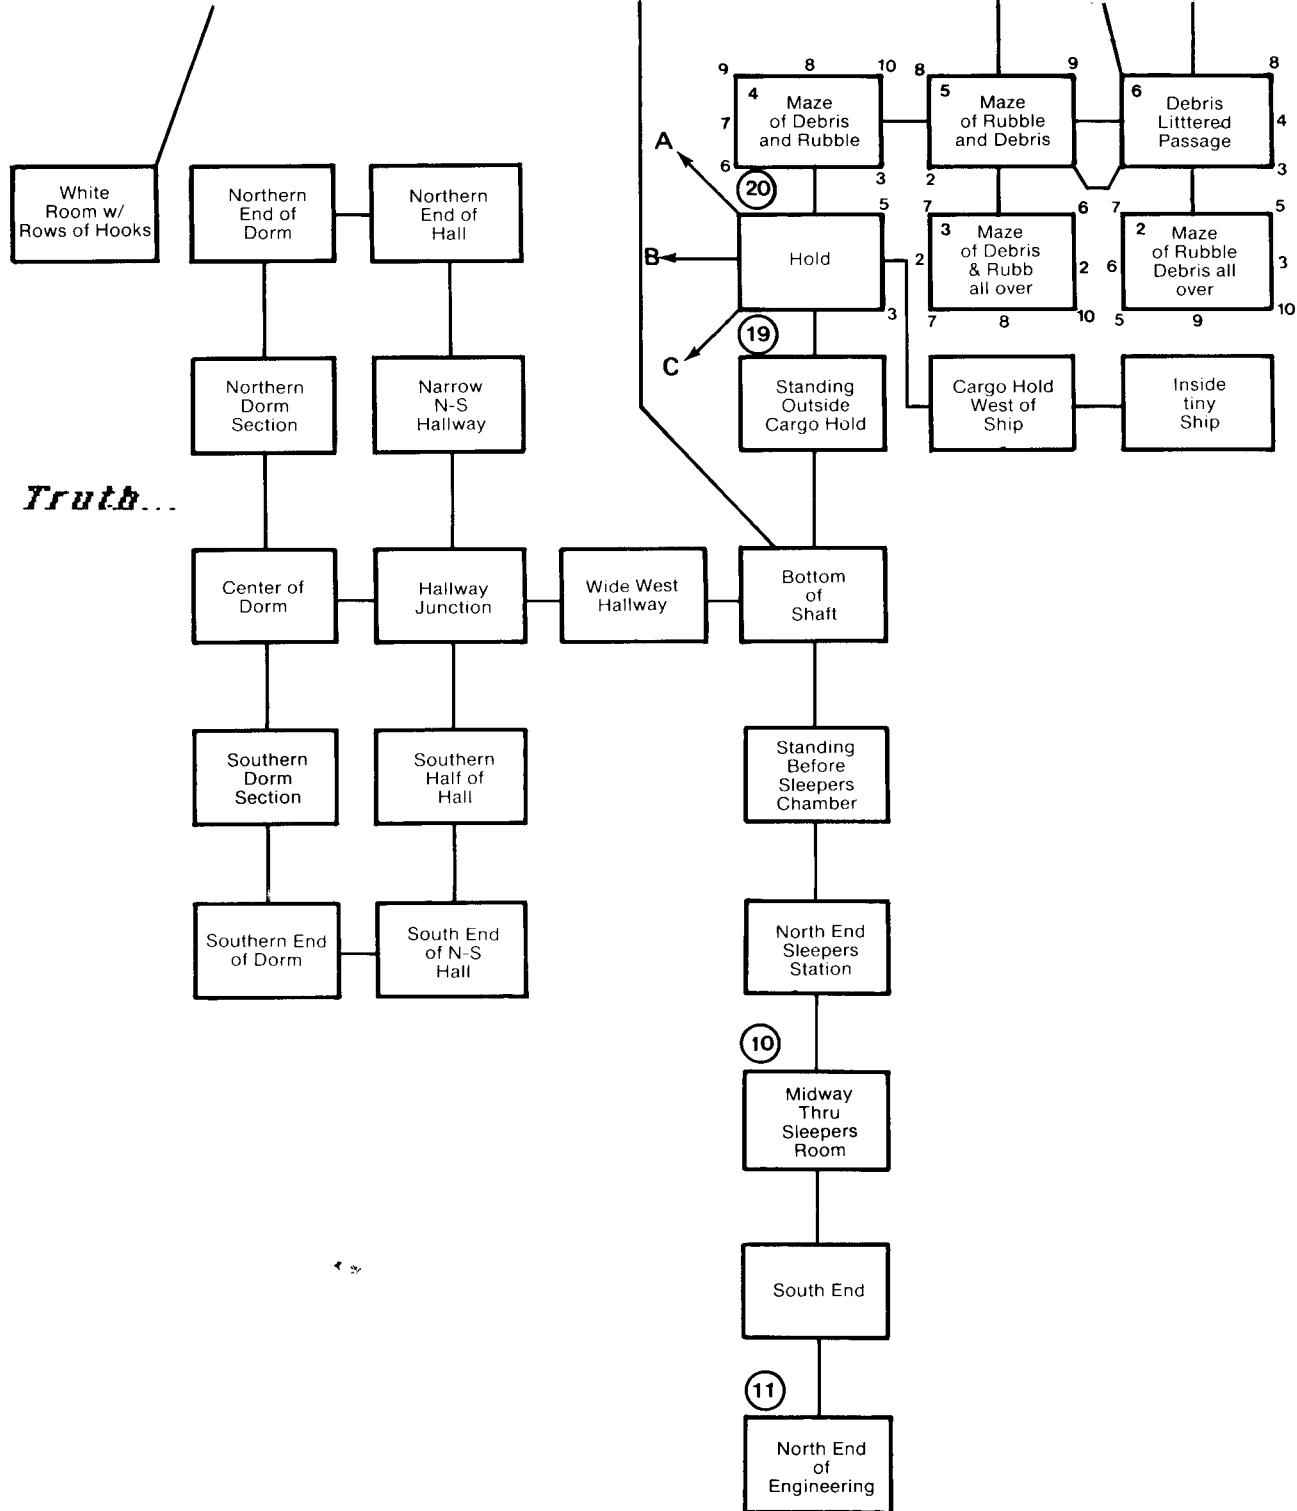

# CYBORG Part 2

To Page 1

*"Food, food is the Truth..."*

# DARK CRYSTAL

**Company:** Sierra On-Line Systems

**Suggested Retail:** \$39.95

**Type:** Hi-Res fantasy adventure, the sixth in the Roberta Williams series, with color graphics.

## Description:

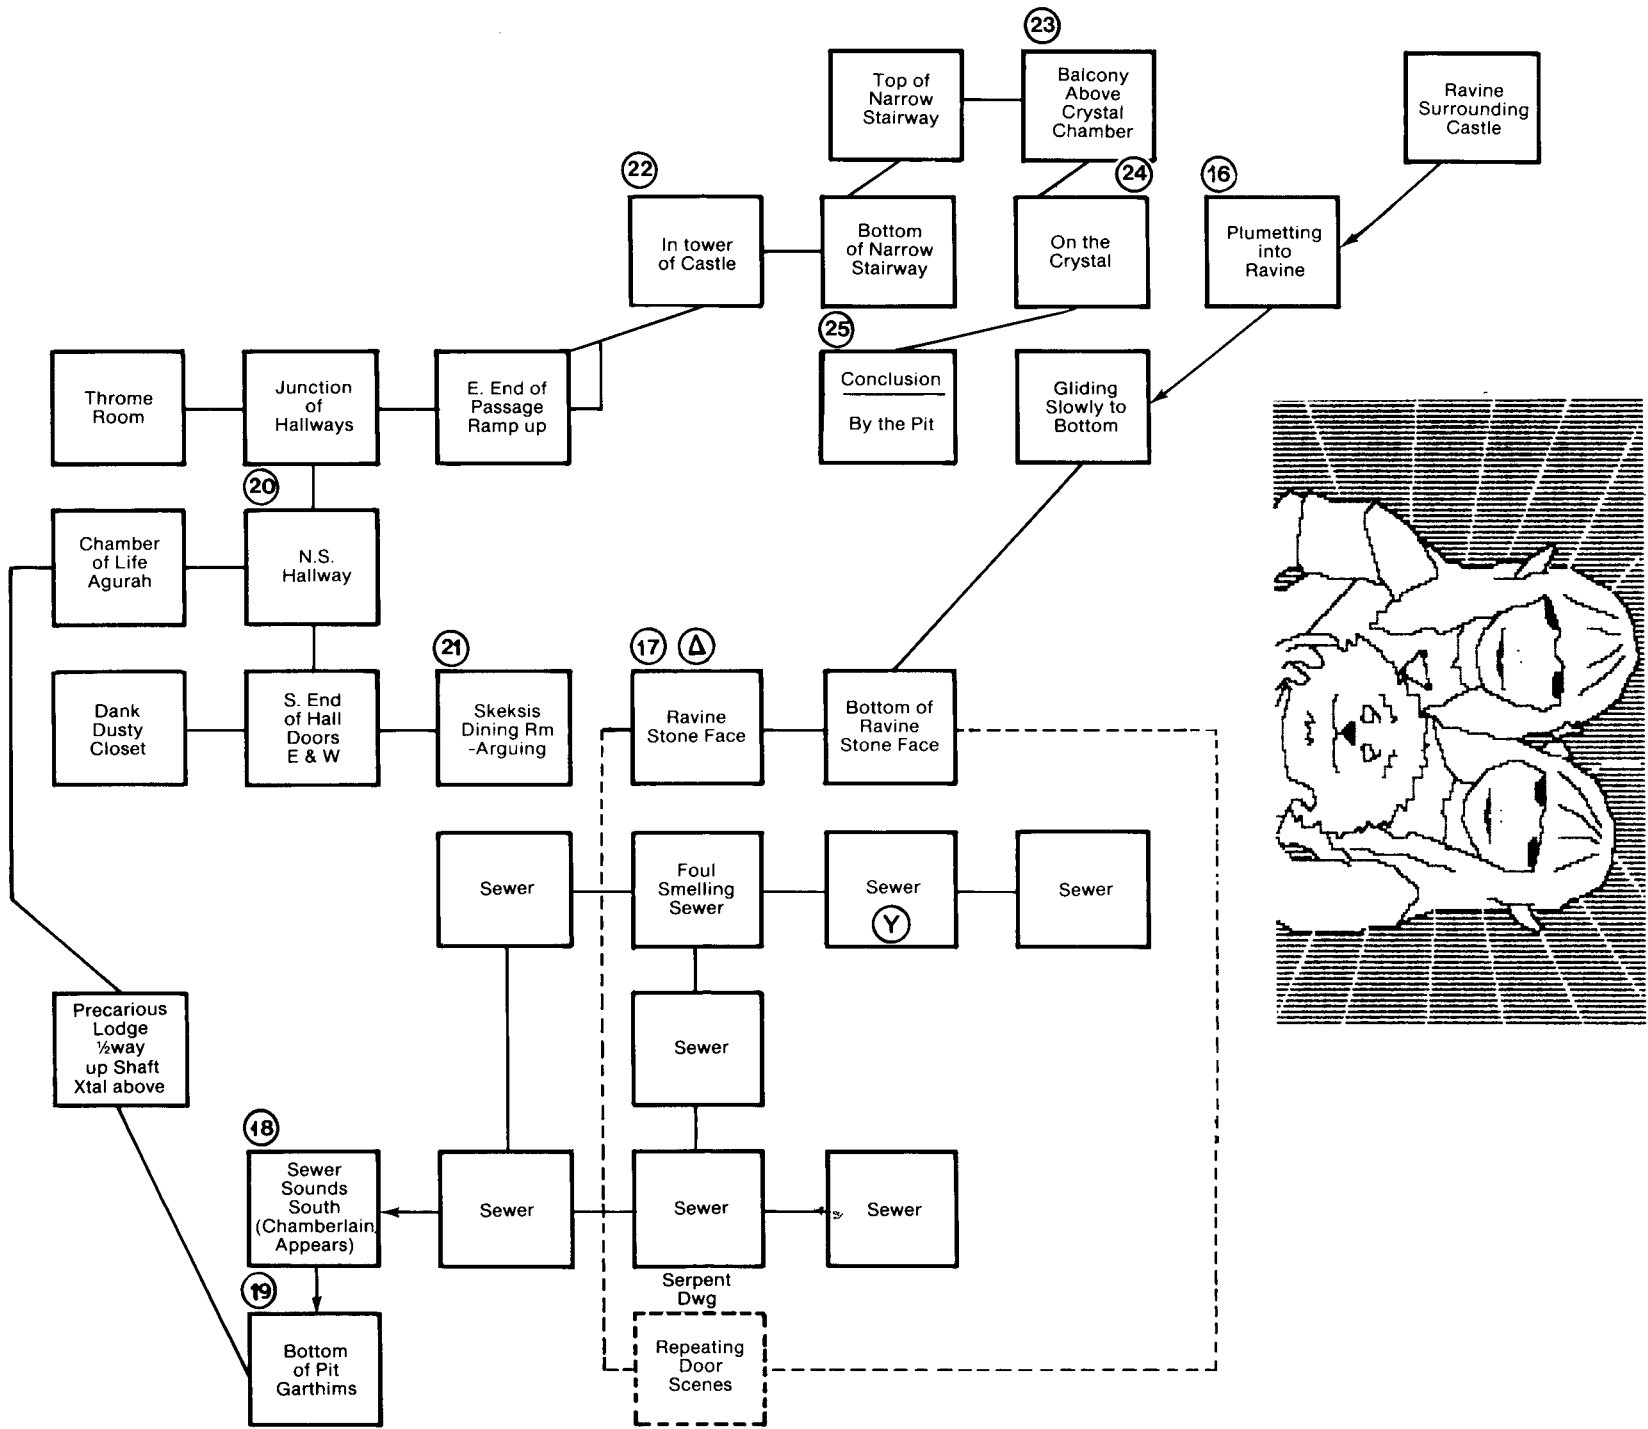

Jen, our Gelfling hero, is your alter ego. You control his actions in his quest to find and replace the missing shard of the Great Crystal, a deed which must take place at the instant of the triple conjunction of the Three Suns. The great prophecy states that only a Gelfling can accomplish this task, and Jen is one of only two who escaped the slaughter of his race by the evil Skeksis. Failure means that the Skeksis and their robot-like killers, the Garthim, will control the world forever. Success means both the end of their rule and a return to peaceful harmony in the world of the Gelfling and Pod people. If Jen succeeds, he will live happily ever after with Kira, the female Gelfling, who appears halfway through the game.

## Playability:

The game is based on and faithful to the movie of the same name, but having seen the movie is neither a help nor a hindrance when playing the game. The graphics, although having large expanses of white, are beautifully detailed. Lighthearted and fun to play, the game anticipates your actions and commands. Easy enough for beginners and captivating enough for more experienced players.

DARK CRYSTAL

# DEADLINE

**Company:** Infocom, Inc.

**Suggested Retail:** \$49.95

**Type:** The first of a series of all-text mystery adventures.

**Description:**

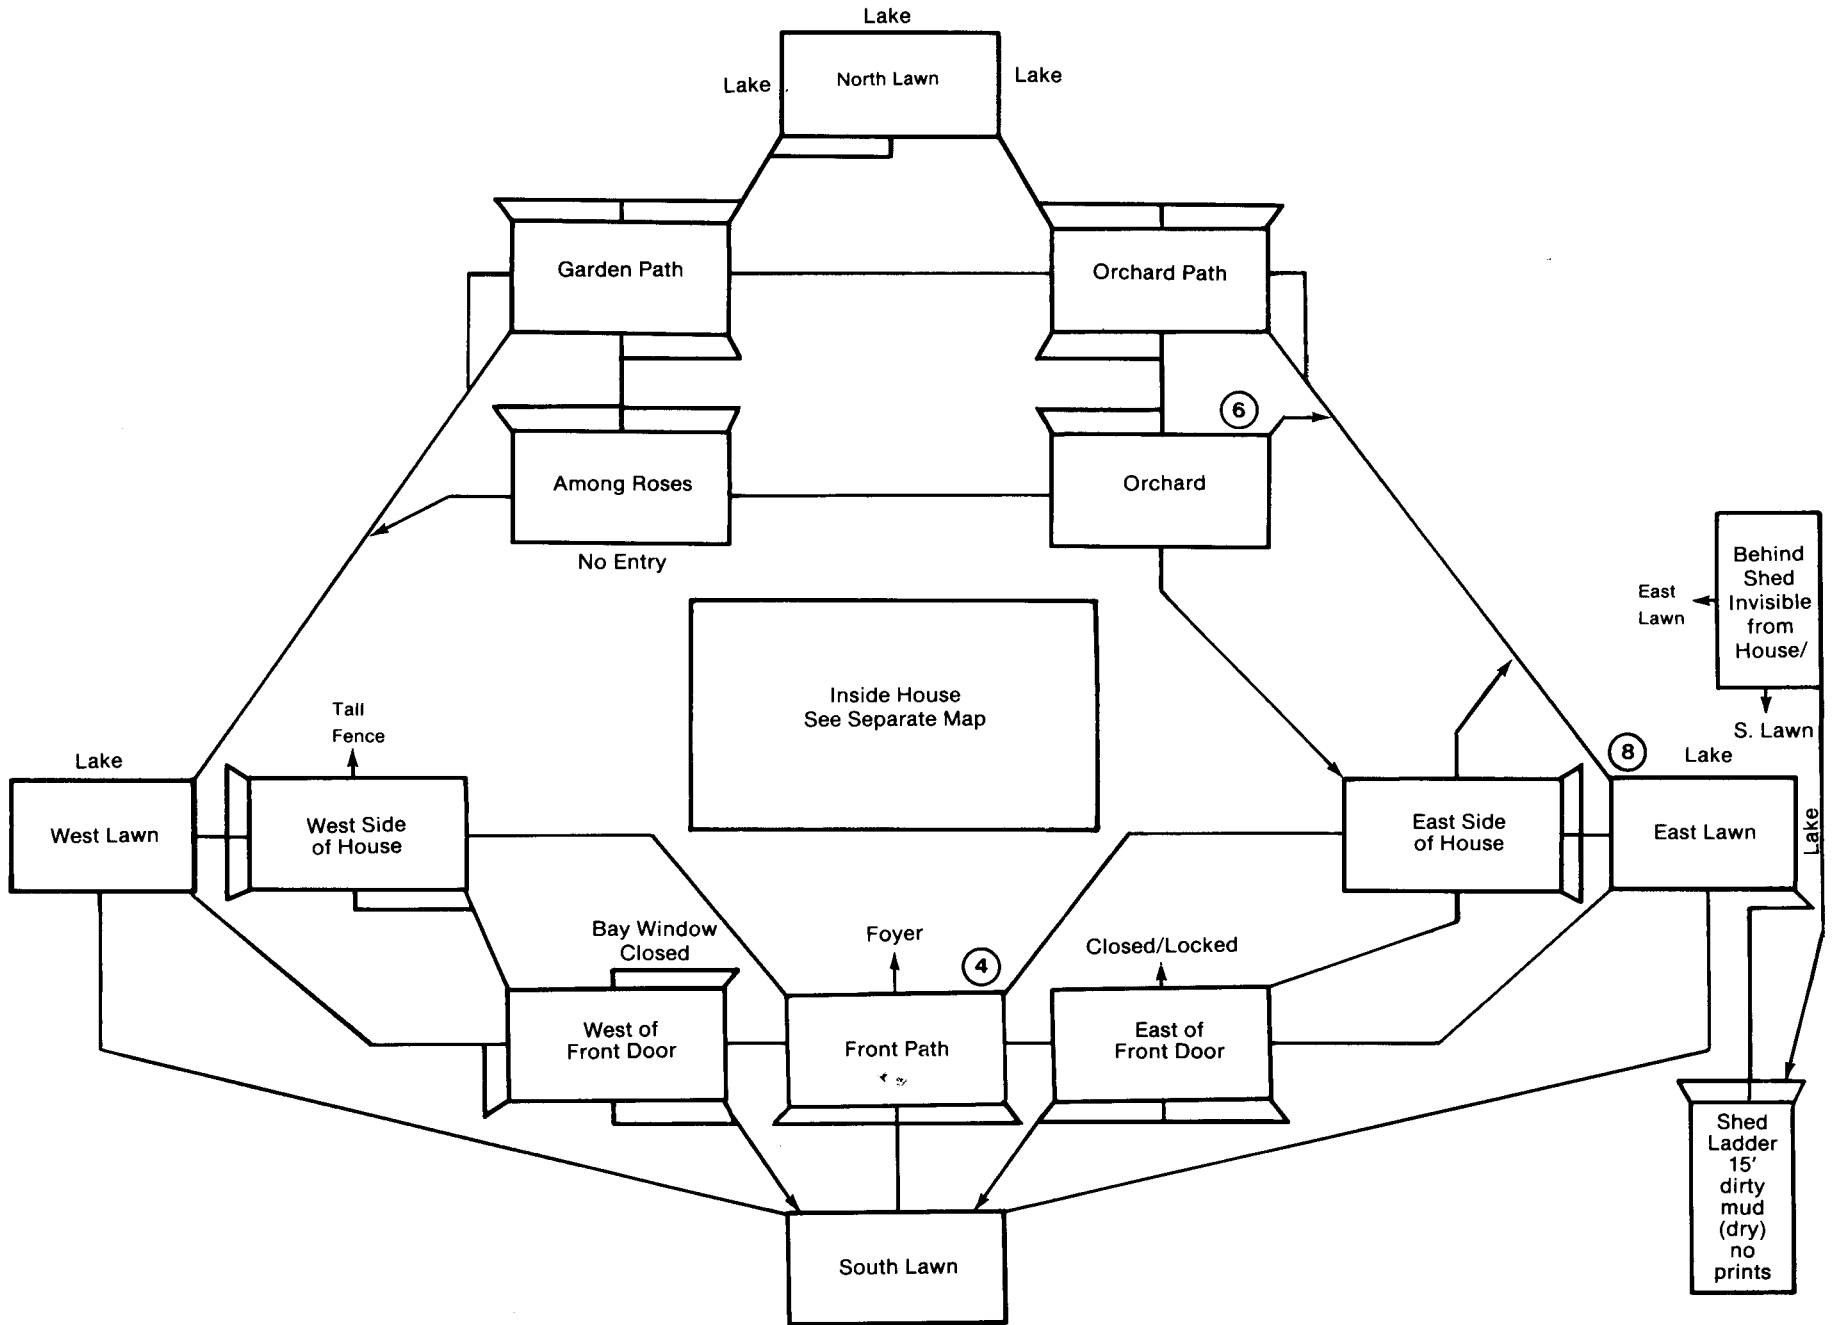

You, the Detective, are called upon to investigate the apparent suicide of a wealthy and philanthropic industrialist. You encounter no monsters or wizards, just seven characters you can talk to, question, or watch as they move about independently. You have twelve hours to unravel the mystery and arrest one or more of the four principal suspects. You will have to prove motive, opportunity, and means. There are twenty-five possible endings, ranging from dismissal by the Grand Jury to conviction by the Trial Jury. Some endings come with shocking suddenness; others give you clues for your next attempt at solving the mystery.

**Playability:**

Totally engrossing. You feel as if pulled directly through the CRT and right into the mansion with the suspects. While the game offers a moderate difficulty level and number of puzzles, the convoluted puzzles demand interaction and one of them proves quite tough. This game requires considerably more deductive logic than adventures usually call for.

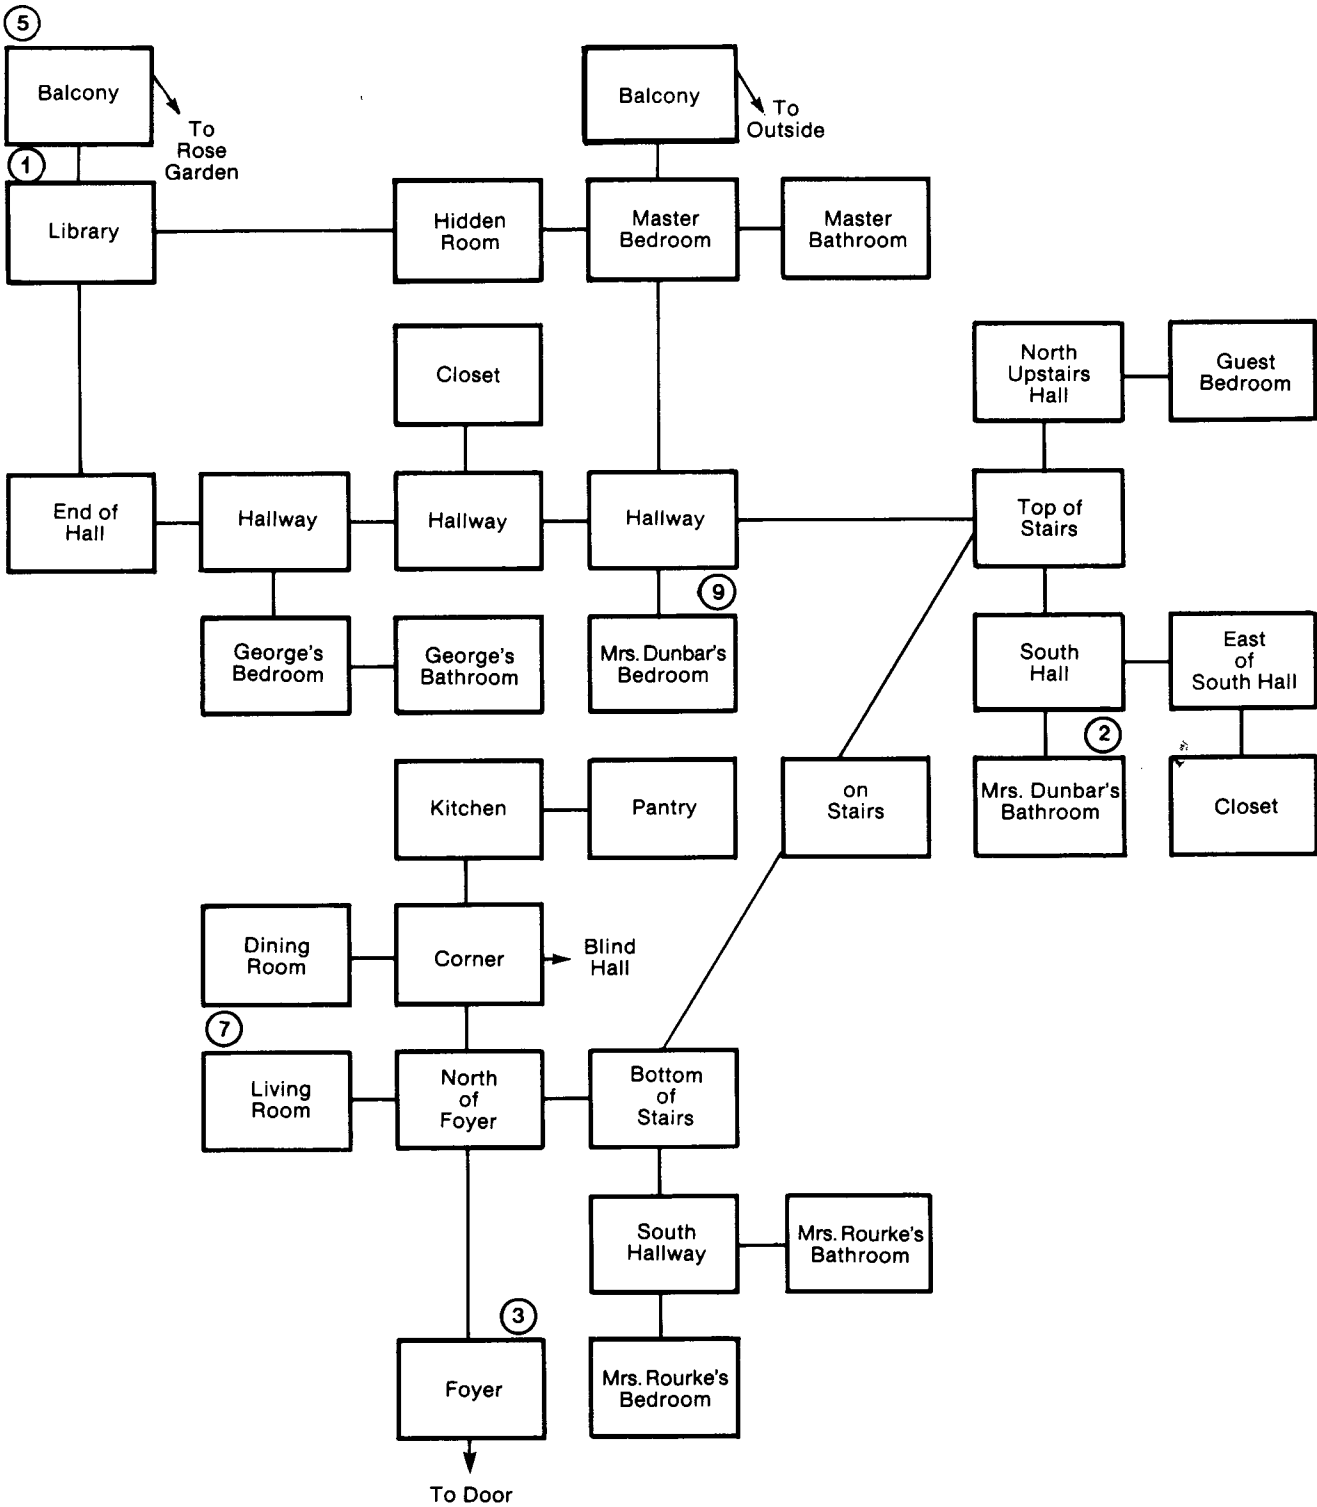

# DEADLINE Outside House

# DEADLINE

## Inside House

# DEATH IN THE CARIBBEAN

**Company:** Micro Lab

**Suggested Retail:** \$35.00

**Type:** Hi-Res adventure with color graphics.

**Description:**

You find yourself on an enchanting but dangerous Caribbean island, divided by a fast flowing river. You've come in search of buried treasure. Yes, it's here, but it will take a bit of doing as well as digging to get it. The graphics are very well done, sharply detailed and quick to fill. The puzzles offer moderate difficulty; some—in a sense—involve a play on words.

**Playability:**

A good, solid adventure. A little thin on the story-line and text, but nevertheless challenging. Playability would improve greatly if the game supported dual disk drives; as it stands, with two program sides you quite often find yourself flipping disks like hot cakes! The two-word parser has a limited vocabulary. Fortunately, the negatives are well balanced by some of the best red-herring puzzles yet encountered, some helpful magic, and a little cryptology.

# DEATH IN THE CARIBBEAN

Part 2

# DOOM VALLEY

**Company:** Superior Software, Inc.

**Suggested Retail:** \$19.95

**Type:** All-text adventure.

**Description:**

While vacationing at a ski lodge, you hear that a planeload of UN ambassadors has crashed nearby and can't be found. You later find that, for unknown reasons, equally unknown parties have chained these worthies in a medieval castle located in a steamy jungle populated by lions, tigers, and mambas who pay no attention to you. You win when you return the ambassadors to the ski lodge.

**Playability:**

So-so at best. Most of the game locations have no bearing on the game. You can win the game in less than four minutes once you know what it requires. The two-word parser demands specific two-word responses, usually self-evident. No real challenge, even to a beginner.

# EARTHQUAKE—SAN FRANCISCO, 1906

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** Hi-Res adventure using color graphics.

**Description:**

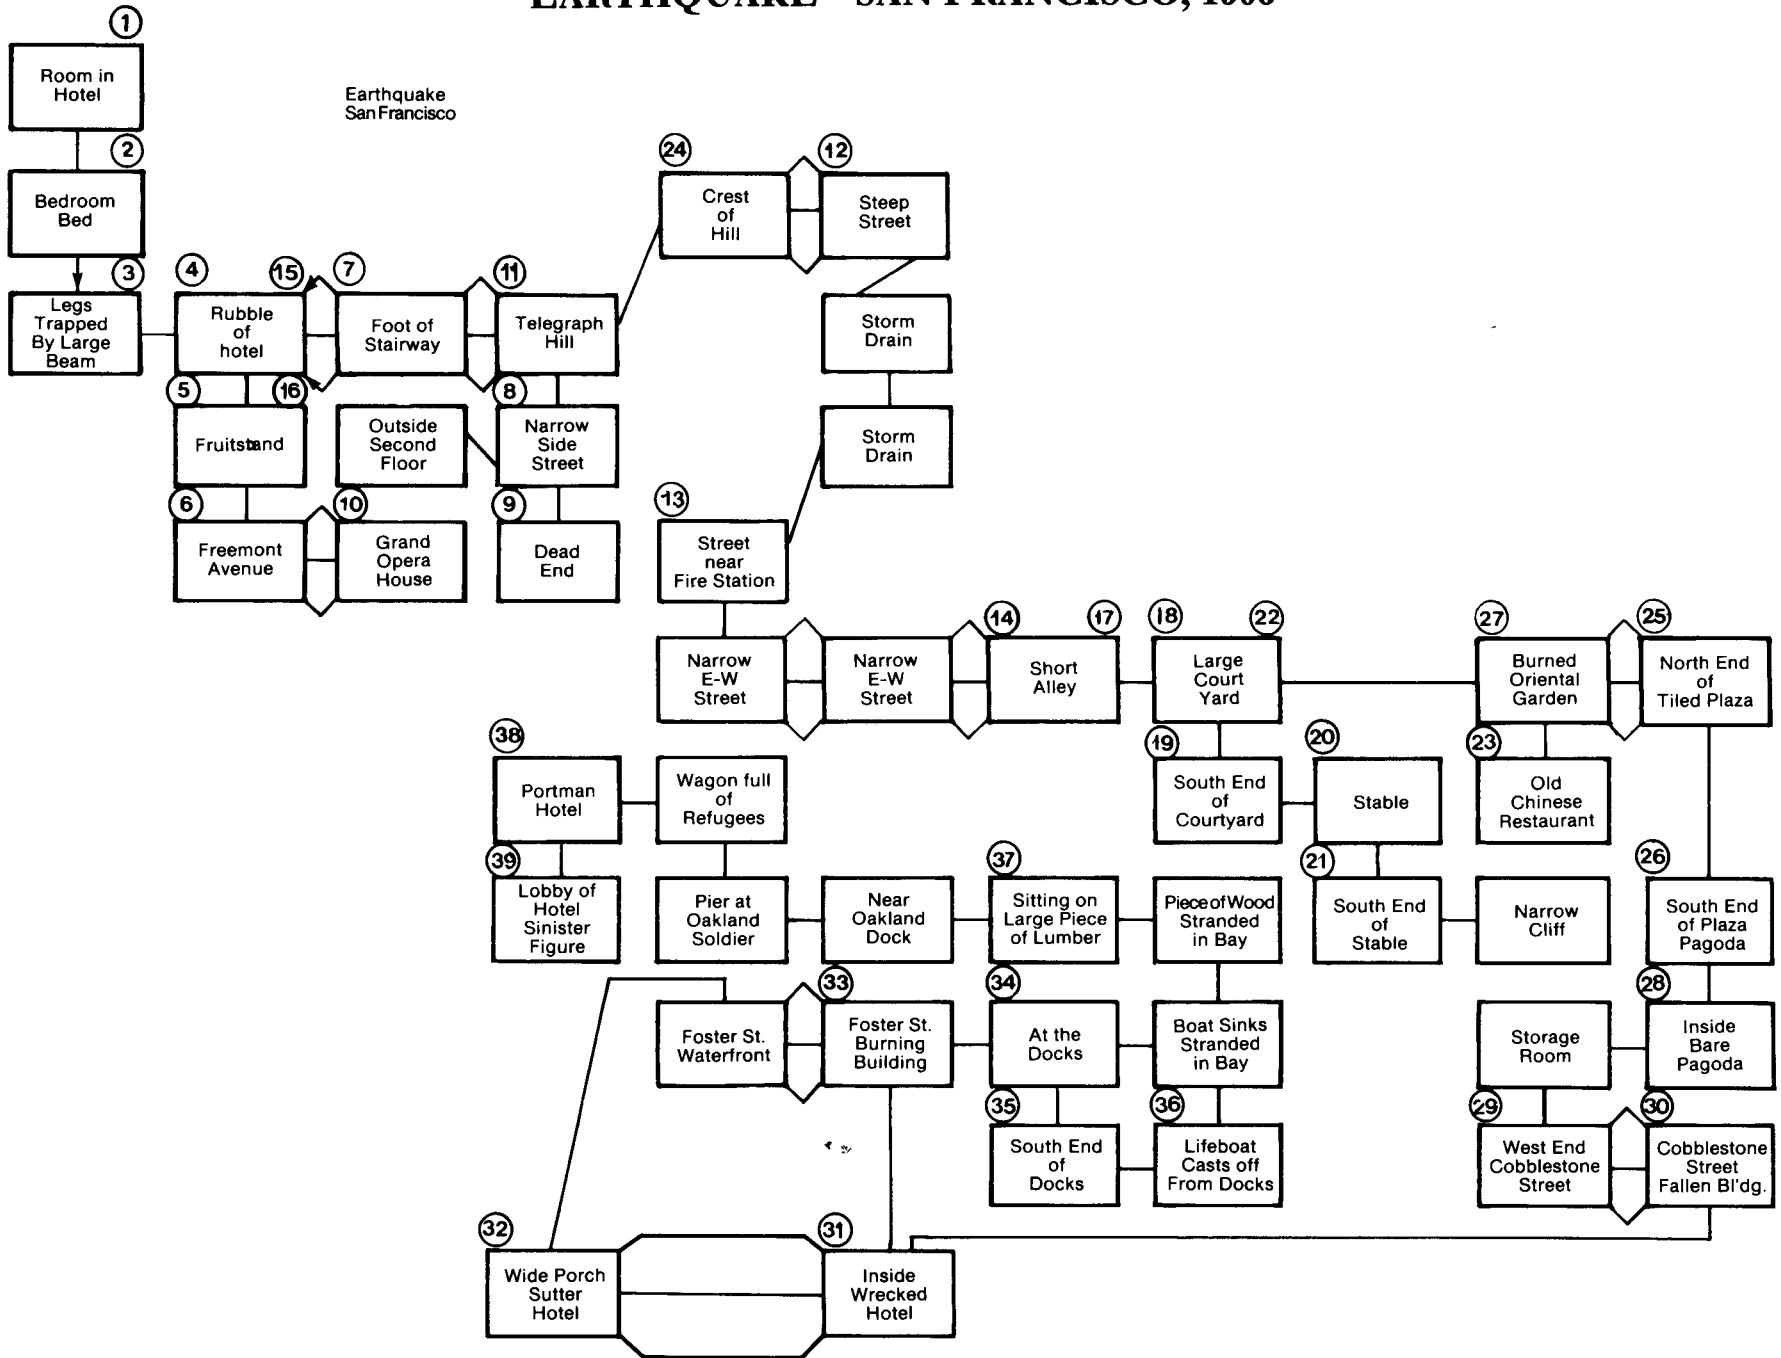

A note for you in your San Francisco hotel tells you to deliver a ransom (conveniently on the dresser) to a specific hotel or you'll never see your wife again. This simple task is suddenly complicated by your room collapsing around your ears, chaos in the streets, fallen buildings, trigger-happy and not-too-honest soldiers, the need to become a hero, paddling around Oakland Bay, and getting piddled on by a small dog.

**Playability:**

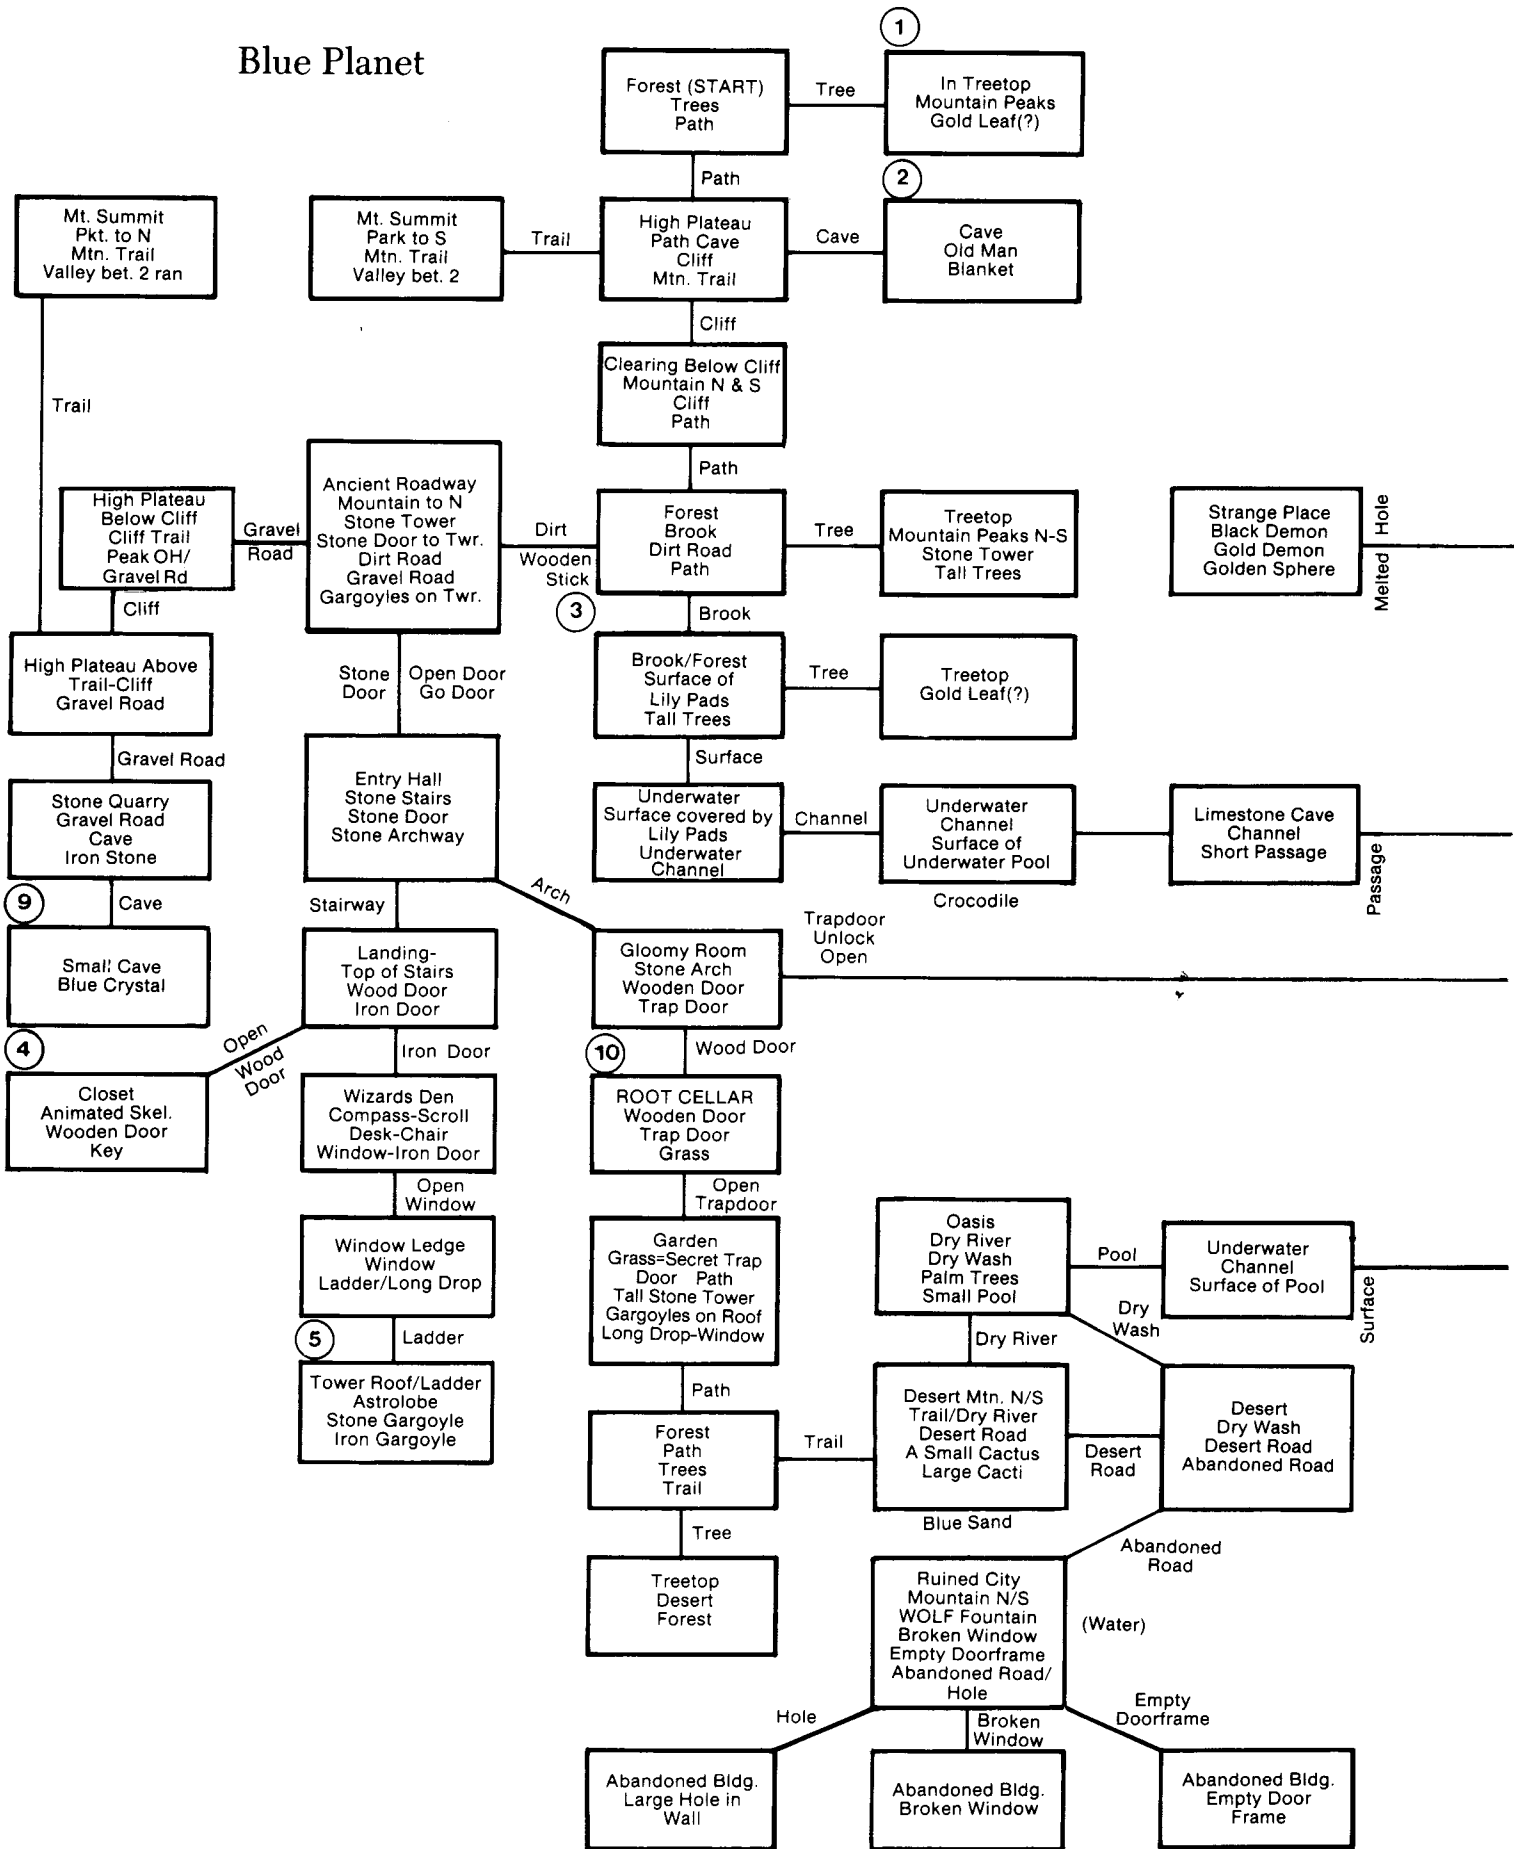

A lot of backtracking takes place because things at earlier locations change when you meet conditions set later in the game. Some mildly interactive puzzles, but for the most part you must solve them in sequence, which slows down the game. The speed of the game, vocabulary, parser, and text all leave a lot to be desired, but attractive graphics, several intriguing puzzles, and an interesting storyline make the game worthwhile.

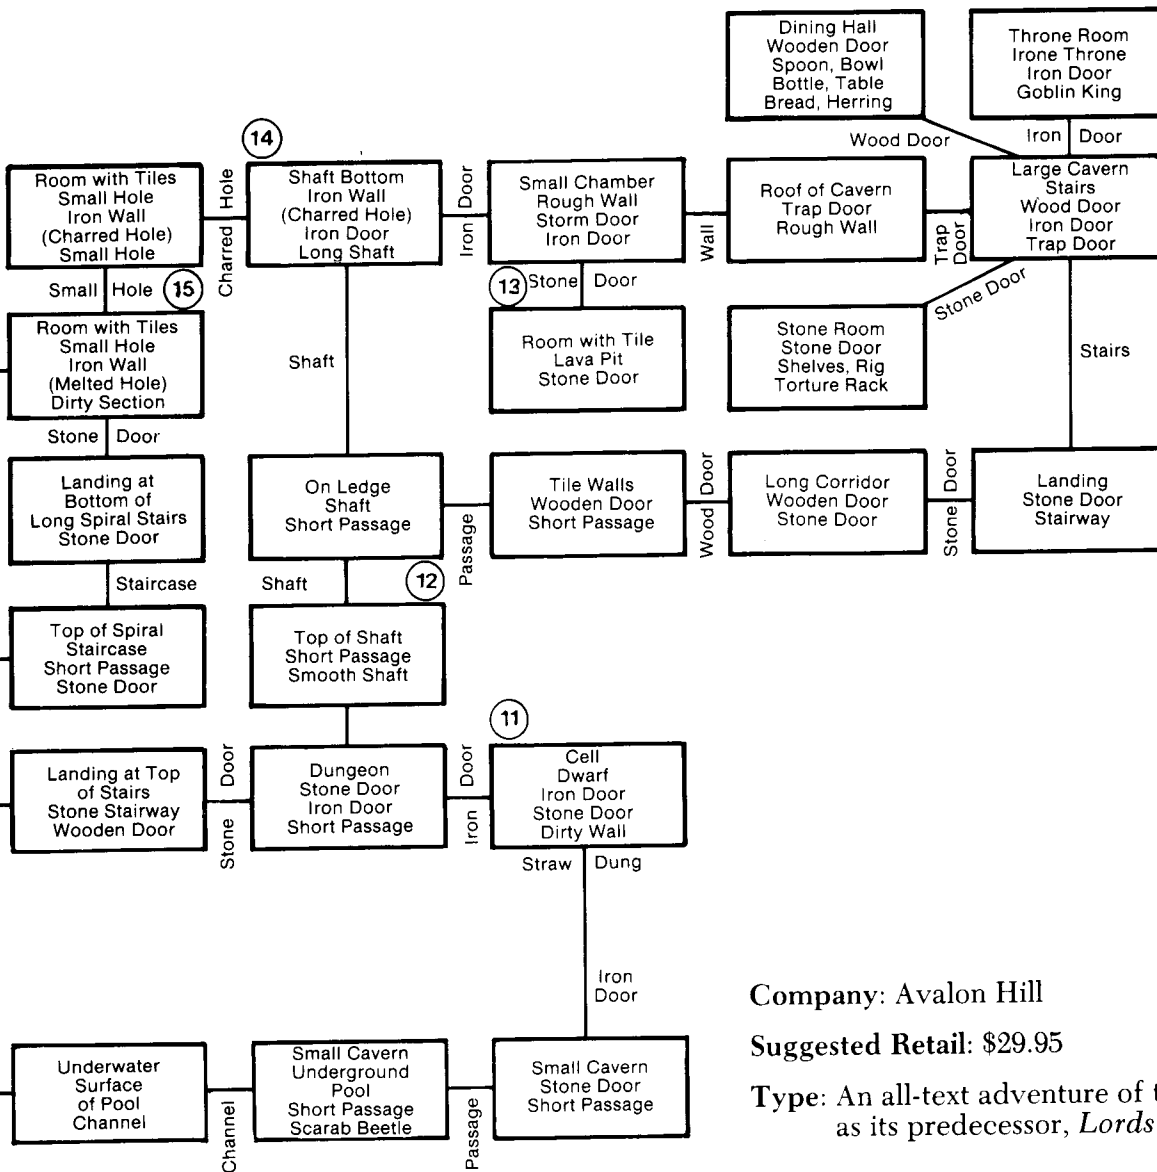

# EARTHQUAKE—SAN FRANCISCO, 1906

# Blue Planet

# EMPIRE OF THE OVERMIND

Company: Avalon Hill

Suggested Retail: \$29.95

Type: An all-text adventure of the same genre as its predecessor, *Lords of Karma*.

## Description:

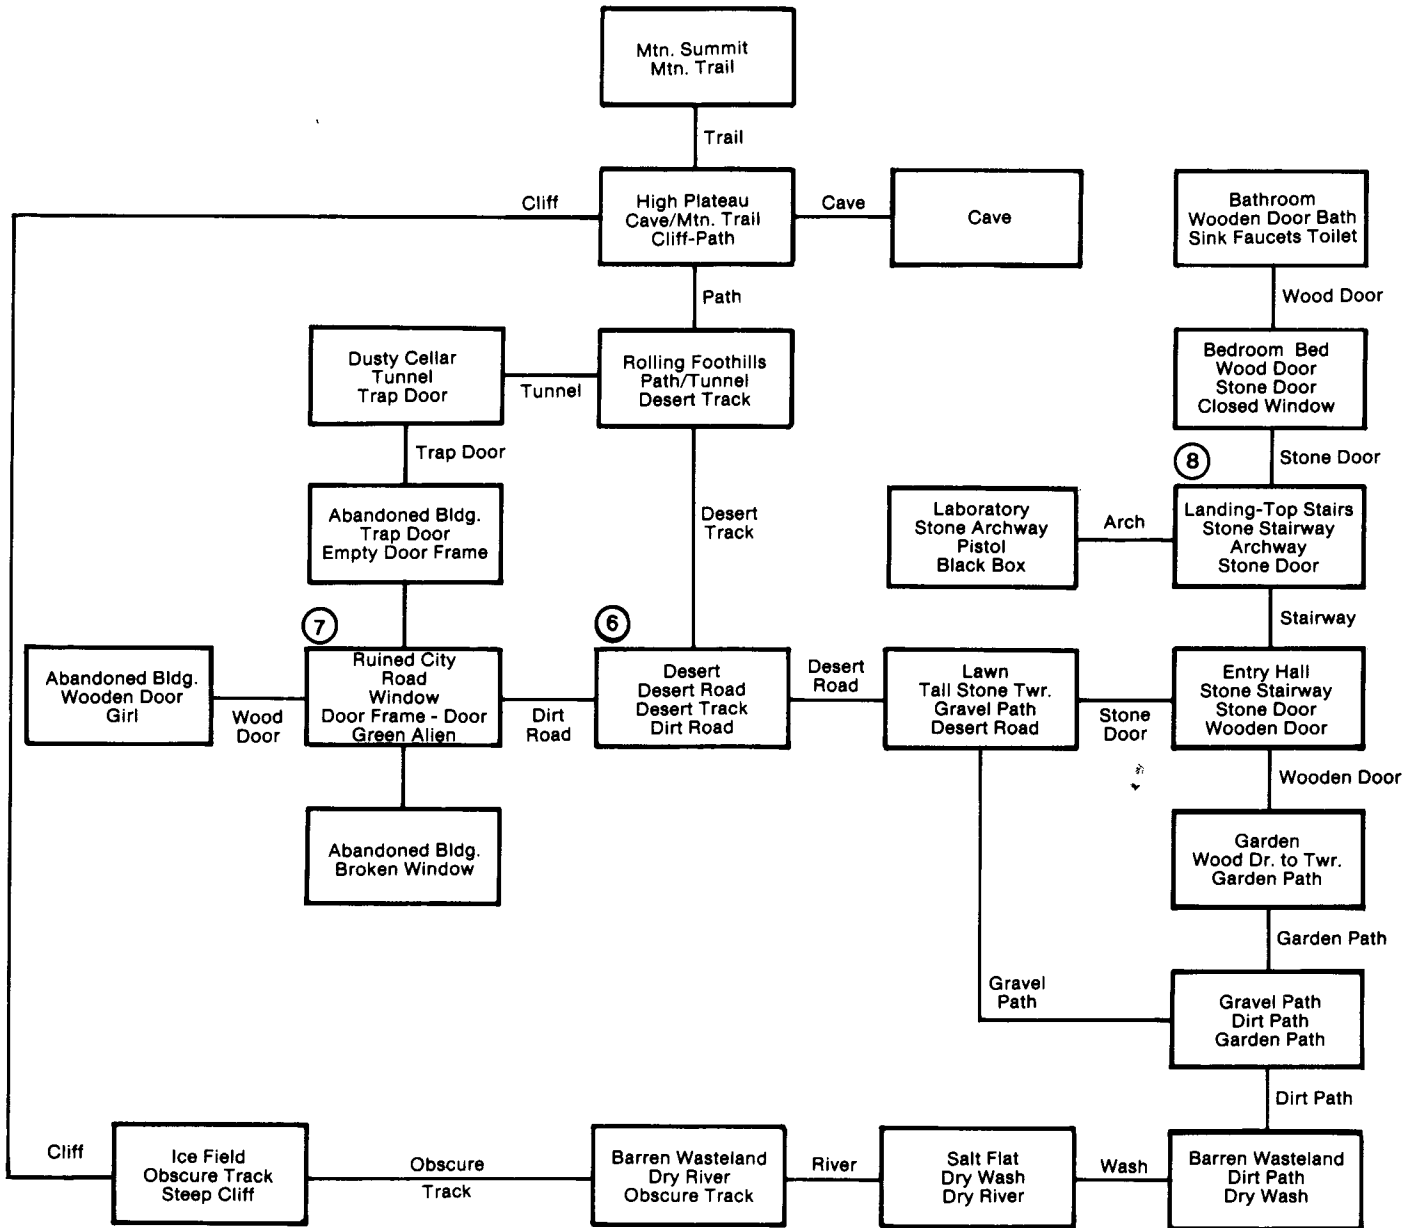

You must find and destroy the Overmind (a golden sphere) to win the love of the enchanted Princess whom you meet while trying to cope with the game's sundry critters and traps. The game abounds with many objects, a helpful dwarf, and some useful magical items. It's a toughie.

## Playability:

Engagingly difficult but agonizingly slow, especially for an Assembly language program. The documentation gives the history and game objective in verse, but does not describe how to save or restore a game. You should read it carefully. Unfortunately, you cannot solve the game without the save and restore. Try Reset: Call-151: BSAVE (filename), A\$8000, L\$1000. To restore, use Reset: Blond (filename): Call-151: 800 G. Despite its obvious weaknesses, it's a very tough and challenging game.

# EMPIRE OF THE OVERMIND

## Red Planet

# ENCHANTER

**Company:** Infocom Inc.

**Suggested Retail:** \$49.95

**Type:** An all-text adventure.

**Description:**

*Zork* lives, embodied here in the descriptions and puzzles accorded to you as the neophyte wizard, charged by your wizened mentor, Belboz, to seek and destroy the great evil wizard, Krill. Only an innocent fledgling can hope to succeed in this quest due to Krill's precognitive powers. It's tough to find some of the thirteen scrolls you'll need to achieve this goal. Find out what it's like to get sacrificed, and talk with frogs, turtles, and a shaggy adventurer.

**Playability:**

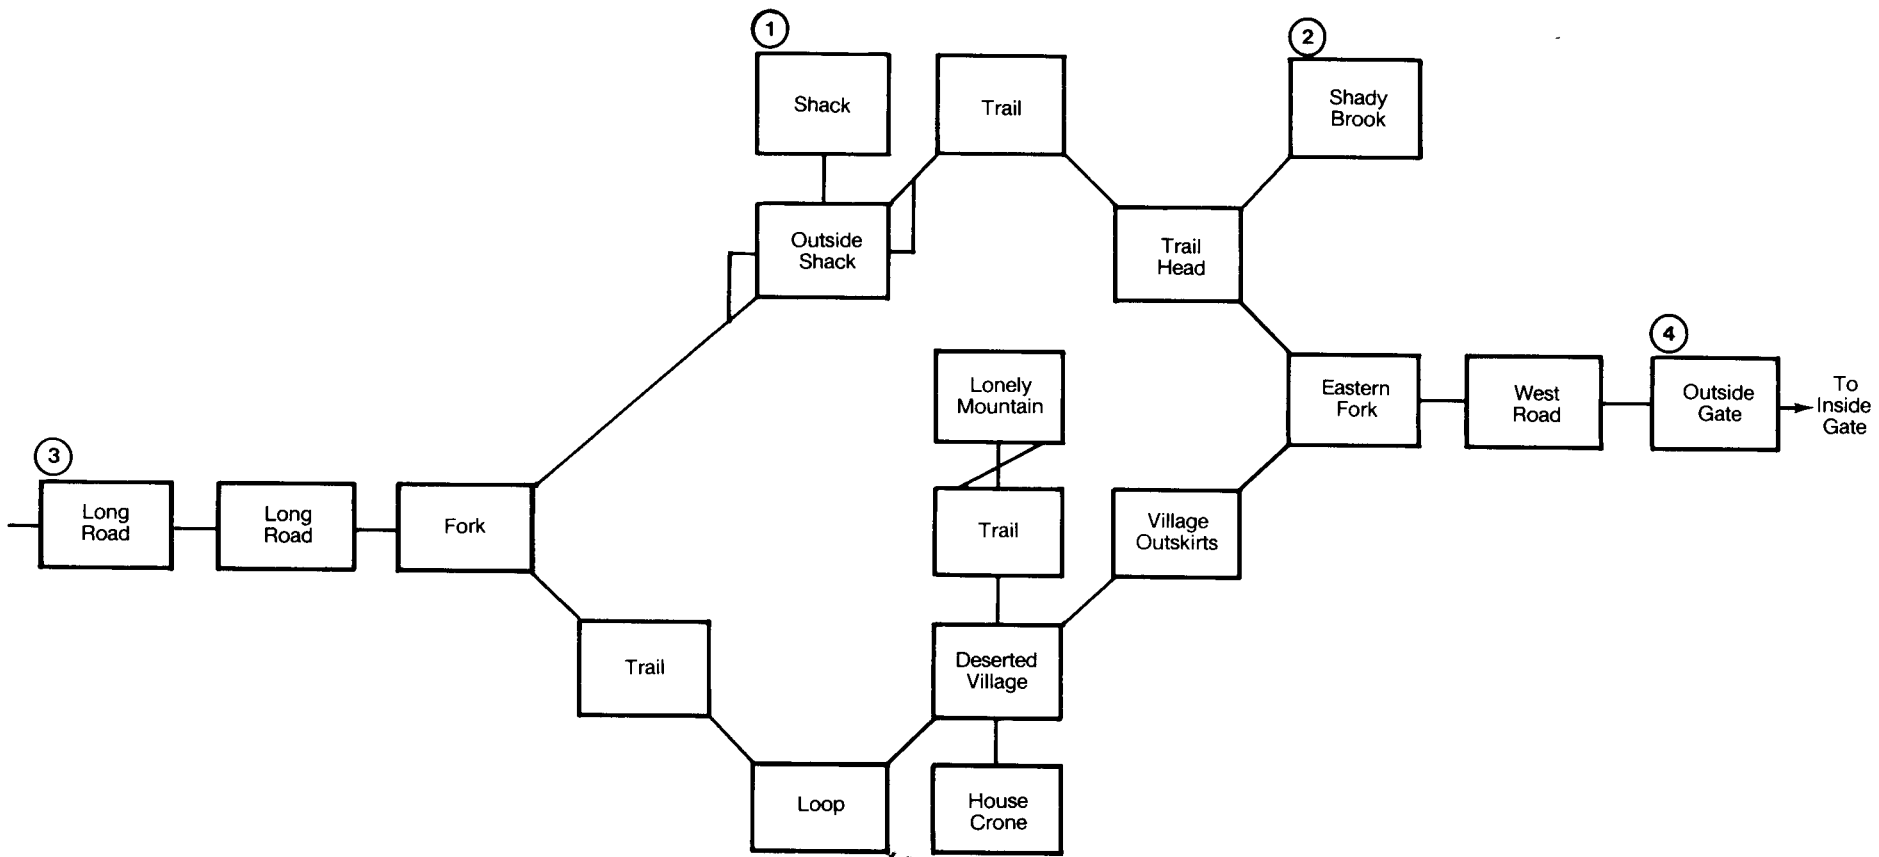

The game plays easily and smoothly and employs the excellent parser, vocabulary, and two-drive save-game capability that mark Infocom games. Lots of fun to play, with well anticipated wise remarks made to many inputs.

## Enchanter

# ENCHANTER

Part 1

# ENCHANTER

## Part 2

# ESCAPE FROM RUNGISTAN

**Company:** Sirius Software, Inc.

**Suggested Retail:** \$29.95

**Type:** A black and white Hi-Res adventure that includes some arcade-like action.

**Description:**

You must escape from your prison cell and cross the border of dictator-ruled Rungistan into the safety of Nuggyland. Natch, you are pursued by the Rungistanees, who must see to it that you are shot in the morning—or they get scheduled to lose their own hides.

**Playability:**

An average adventure in all regards, with much lacking in many regards. One nice feature: the screen fill takes place crisply and quickly. Often, you get one shot at the correct answer before bad things happen to you! Generally, you must solve puzzles in order before you can go on to the next location, which slows the game. The arcade section challenges you to ski between seven or so sets of rapidly approaching trees. Prior to saying "Geronimo," use the single save-game feature back to the program disk.

# ESCAPE FROM TRAAM

**Company:** Adventure International

**Suggested Retail:** \$34.95

**Type:** Hi-Res adventure with color graphics.

**Description:**

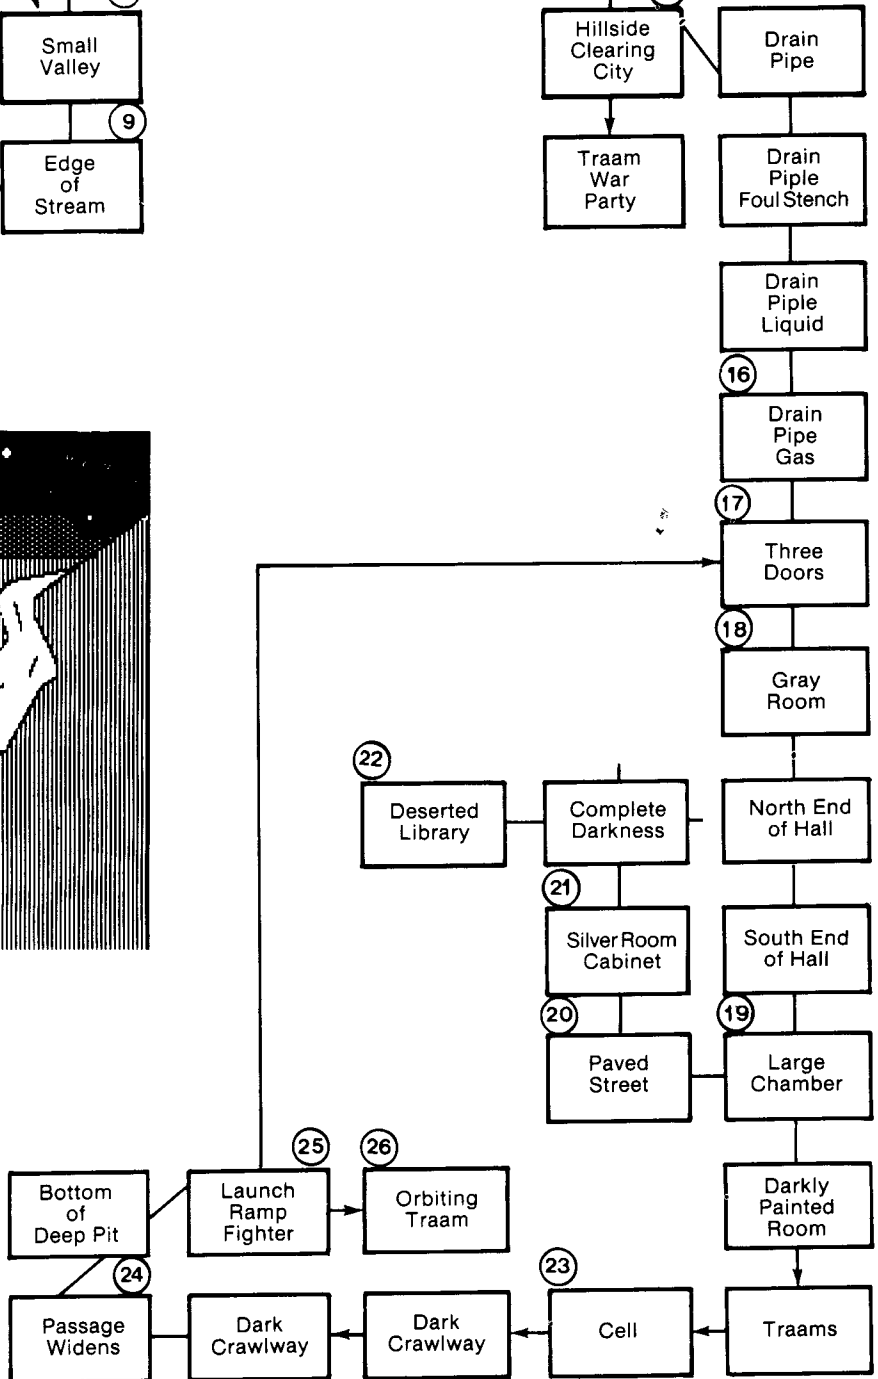

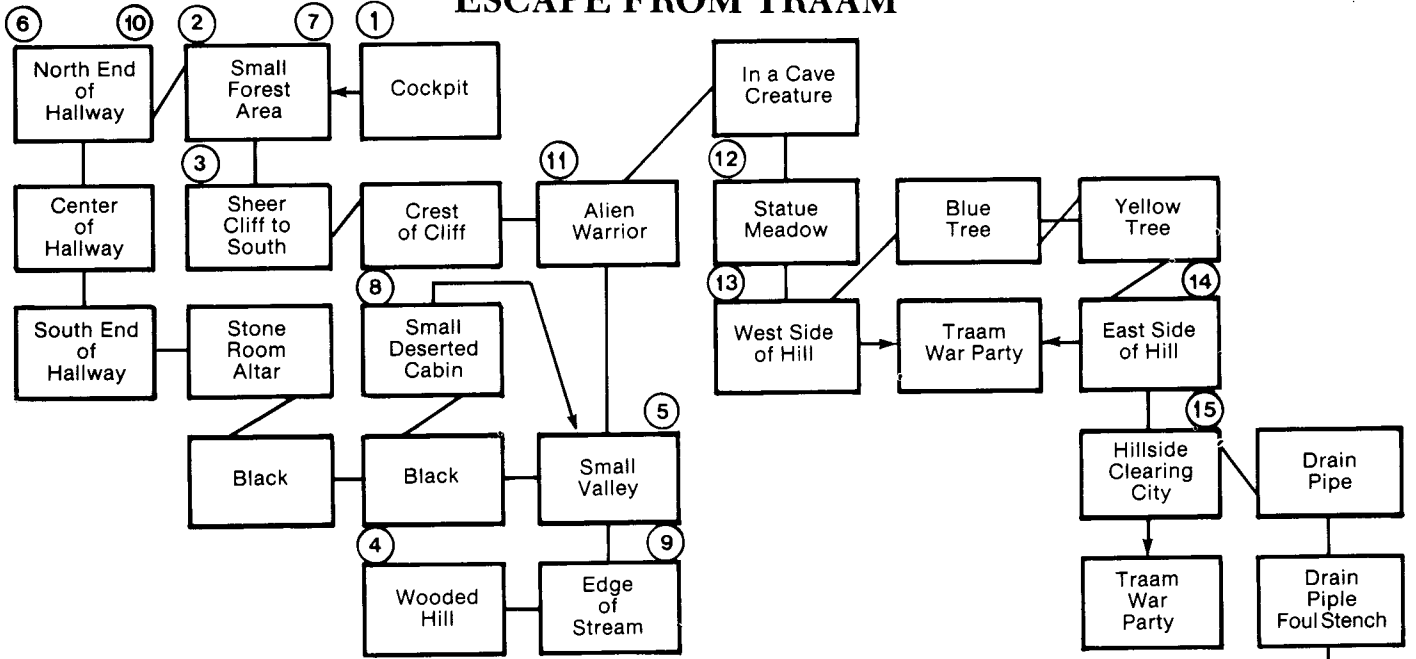

Your spaceship crashes into the planet of Traam, but somehow you survive. Armed with only your wits, you must find the means to escape this desolate land. Enroute to finding another spaceship in which to return to your mothership, you encounter an alien warrior, a friendly little creature, some Traam slaves, and troops of ferocious Traams. You must become something of a linguist to understand some of what you see or hear.

**Playability:**

This game shares the shortcomings of *Earthquake—San Francisco, 1906*, but has few of its virtues. The puzzles are semi-logical in spots, and seem disjointed and rather unrelated, although for the most part they occur in sequence. You can make a single saved-game position to the program disk; a few more saves would help.

# ESCAPE FROM TRAAM

# FANTASYLAND, 2041 AD

**Company:** Crystal Software

**Suggested Retail:** \$49.95

**Type:** Hi-Res fantasy adventure.

**Description:**

This game requires no solution, nor has one been provided. Your task, easy enough to say, proves long and difficult to do—simply find Guinevere or Lancelot. Trek through the six disk-sides and the game's six different lands, acquiring the men, material, supplies and magical items that you need. Other than finding out which objects to use on what, you face no real puzzles in this bit of escapism. However, the concept of the game is well done, with nice shape-tabled graphics interspersed with attractive Hi-Res displays.

**Playability:**

Nice ideas, led astray by absolutely horrid implementation. Sad to say, this game abounds with bugs, many of them fatal programming errors. The biggest puzzle, it seems, is to find which events and sequences you should stay away from. While repetitious, it's sort of fun; too bad it's loaded with syntax errors and fundamental programming errors.

# G.F.S. SORCERESS

**Company:** Avalon Hill

**Suggested Retail:** \$35.00

**Type:** An all-text science fiction adventure game.

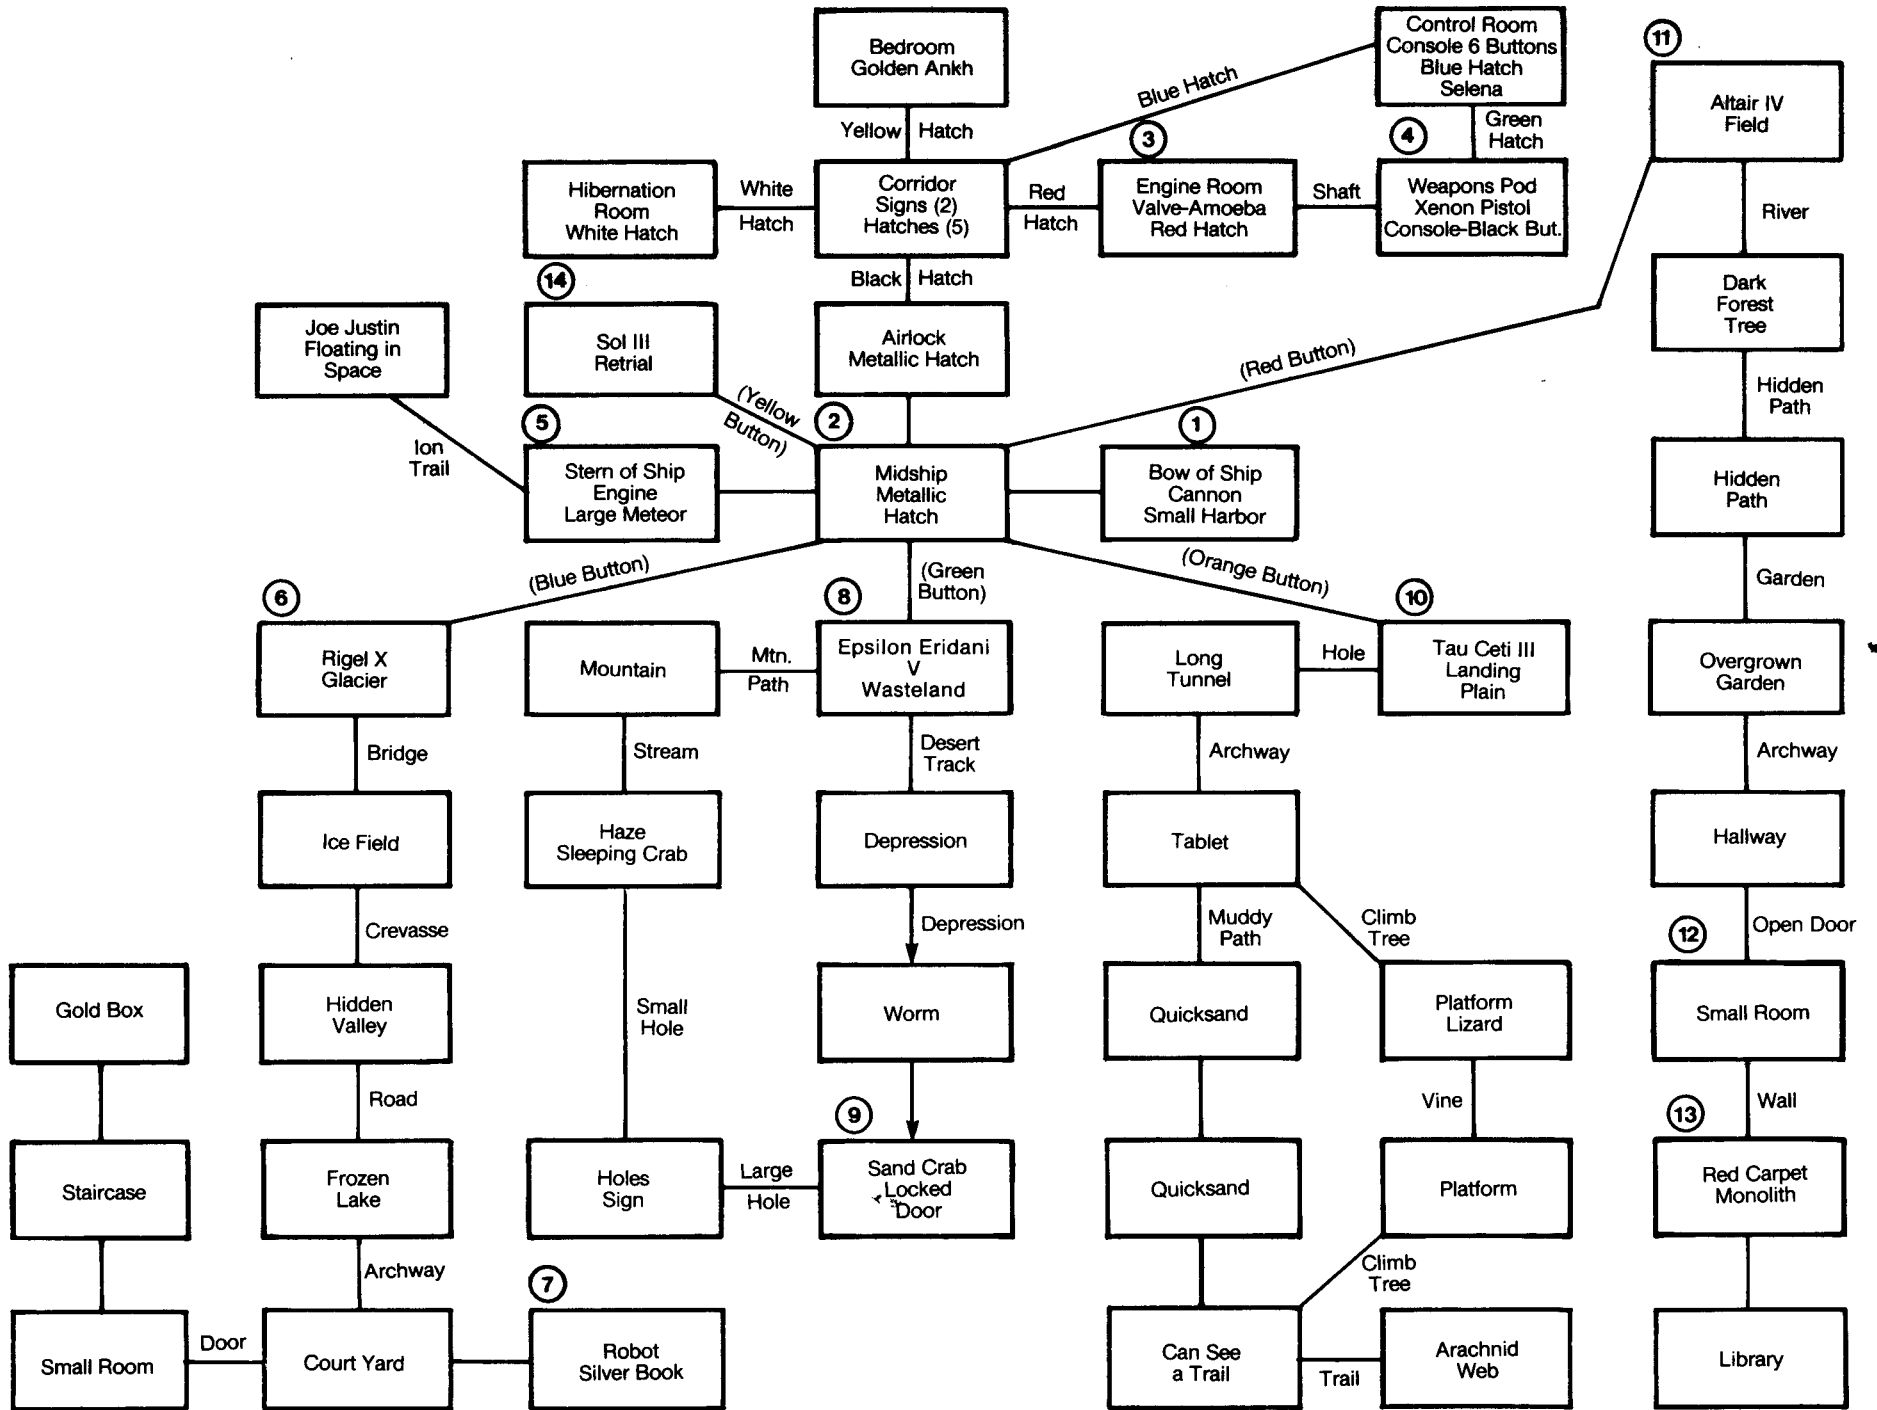

**Description:**

The first in the continuing saga of Joe Justin and Selena Sakarov aboard the spaceship G.F.S. Sorceress. This time, they meet in outer space, where Justin has been set adrift in a "regenerating" spacesuit after a trumped-up court martial, to drift alone for the rest of his days. You must make appropriate repairs to the ship before using it to prove Justin's innocence by finding the Red and Black Books on interstellar law.

**Playability:**

A good story that keeps you glued to the machine to see how everything comes out. However, the game plays painfully slowly and becomes very repetitive in some sequences. Use of the robot involves a rather neat puzzle toward the end of the game.

# GHOST TOWN

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, scheduled for revision into a Hi-Res version. Price also includes *Mystery Fun House* and *Pyramid of Doom*.

**Description:**

The locale is an Old West town, complete with saloon, hotel, telegraph stations, a jail, Boot Hill, an Indian, and a piano-playing ghost. Amid this setting lie thirteen treasures which you must find, collect and stash away in the General Store. In a typical Scott Adams' switch, you also get an opportunity for revenge on the Purple Worm.

**Playability:**

Difficult in spots, and has a game within a game. Once you've solved it, try doing it again. This time try finding the optimum sequence of moves that will earn you the maximum bonus. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game provides a single, easily made or recalled saved-game.

# GHOST TOWN

# GOLDEN VOYAGE

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, scheduled for revision into a Hi-Res version. Price also includes *Savage Island*, Parts I and II.

**Description:**

You have three days to find the potion from the fountain of youth required to restore the aged King. To help you accomplish this mission, you receive enough gold to buy various supplies and the snazzy sailing ship needed to shuttle between the three different islands that make up this game. All three islands seem to contain fountains and some magical stones with which you must contend. Then, if you're lucky or clever enough, you get to meet Cyclops!

**Playability:**

Although the twelfth and last of the original Scott Adams adventures, this isn't one of the harder ones. The degree of difficulty does pick up a bit at the end. The story line is above average, but the relatively slow and jerky nature of the screen display updates indicates that the basic program shell used for these games has just about reached its limits. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game permits a single easily made or recalled saved-game.

**Map Overview**

# GRUDS IN SPACE

**Company:** Sirius Software, Inc.

**Suggested Retail:** \$39.95

**Type:** A Hi-Res adventure with color graphics, animation and Hi-Res text.

## Description:

Whimsy and fast moving graphics mark this game in which you, the skipper of a space freighter, head for Saturn to pick up a load of fuel for urgent delivery to Pluto. Along the way, you make several side trips to Venus and Titan and encounter a couple of alien space ships as well as some friendly characters and a couple of creeps. The sound effects aren't bad, either.

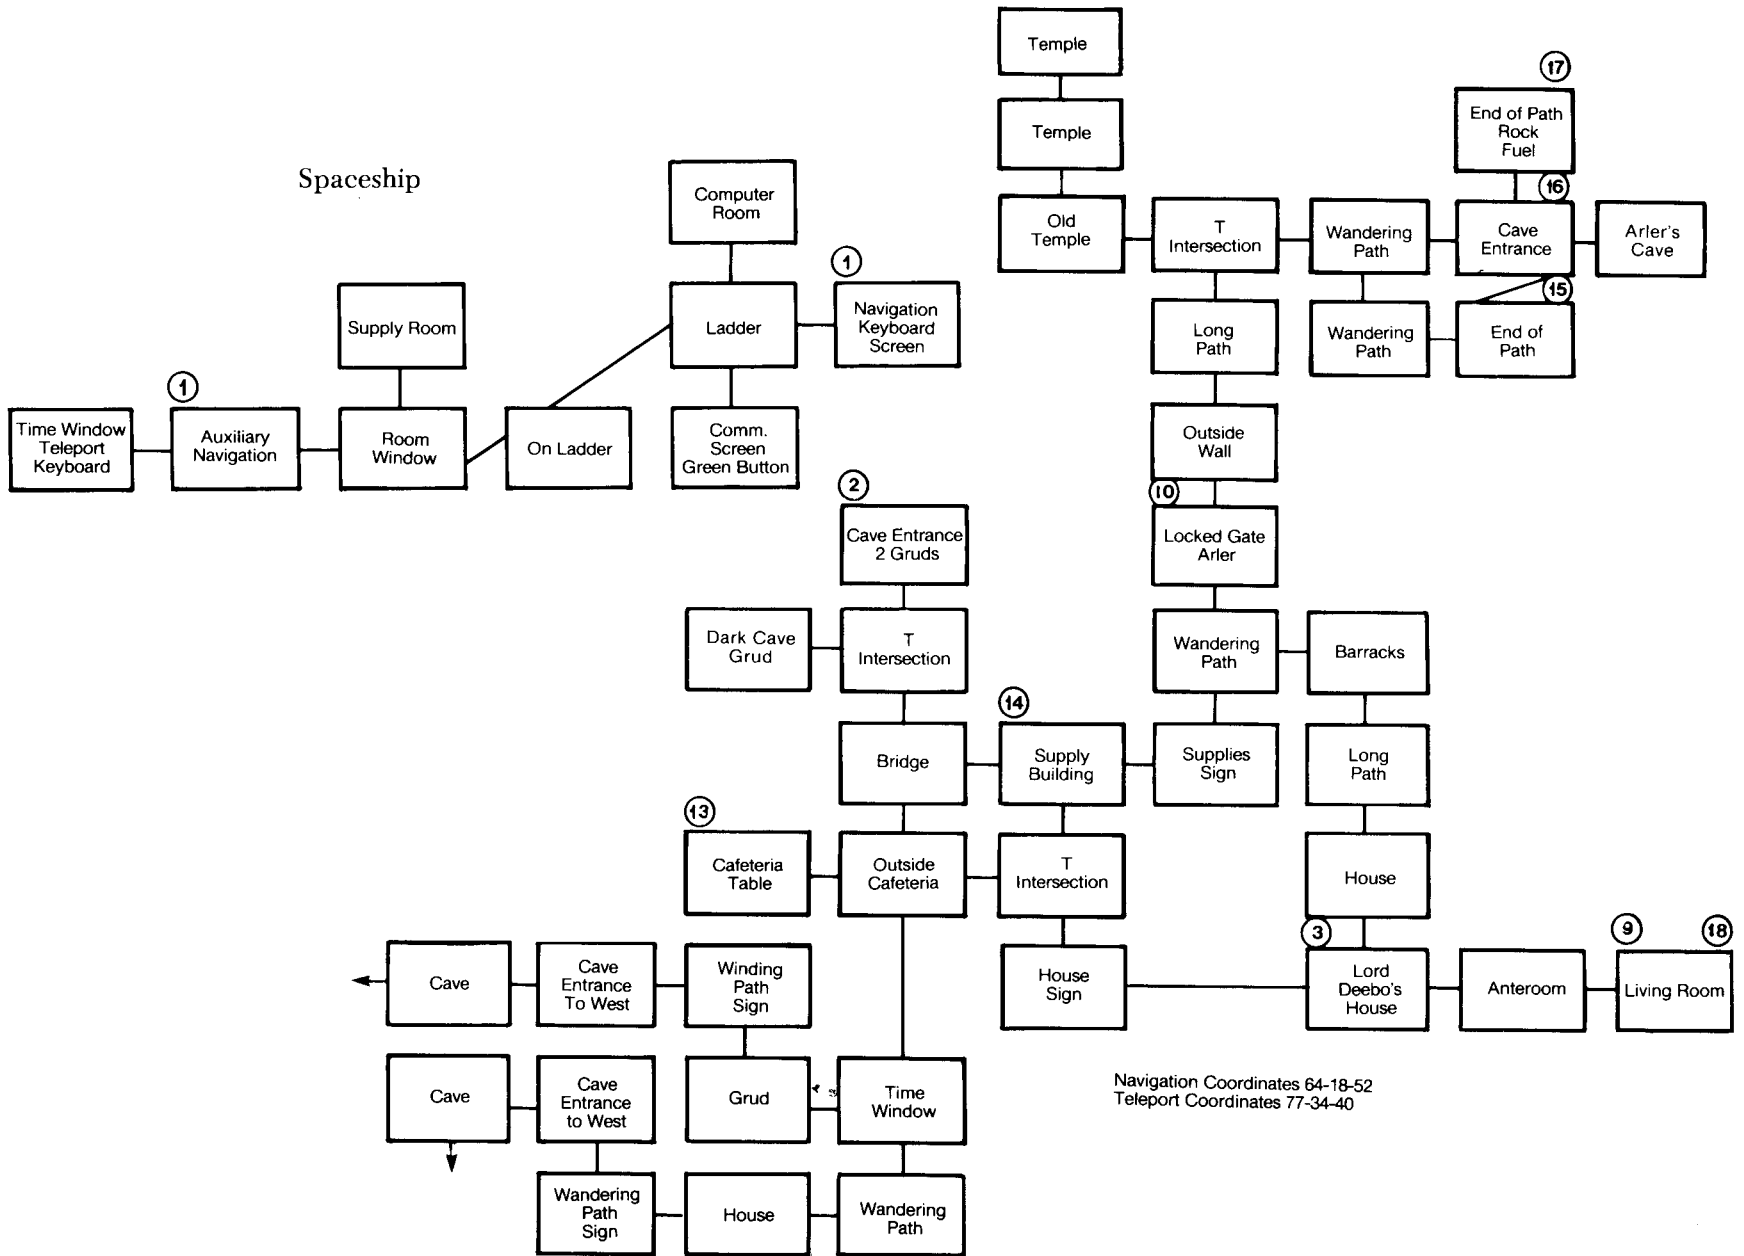

## Playability:

A rather tough game, partly because of the horrid vocabulary and partly because you only get one move to guess right before horrible things happen. Kids will thoroughly enjoy the comic-strip like characters, but may need a lot of help from dad, who will probably also have a tough time in spots. Be sure to make frequent use of the well-implemented save-game capability.

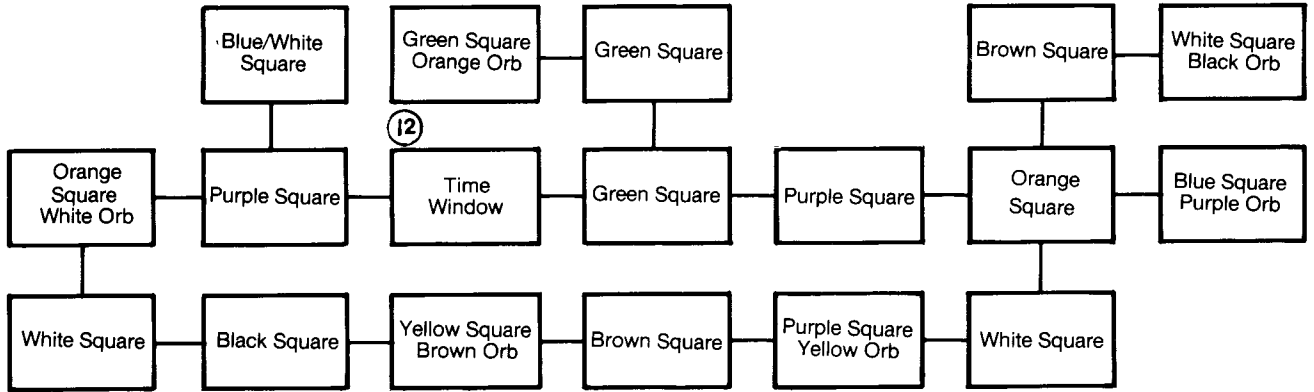

# GRUDS IN SPACE

# INFIDEL

**Company:** Infocom, Inc.

**Suggested Retail:** \$49.95

**Type:** All-text adventure.

**Description:**

Despite the old theme, you'll find lots of new twists and tough puzzles in this game. You are a not-too-bright archaeologist (in this case, a polite term for grave robber) bent on finding the vast treasures of an Egyptian Queen's pyramid, rumored to lie not far from your camp in the otherwise endless sand. Before it's over, you'd better get a lot smarter if you hope to cope with the devilish traps that the Queen has set for you. Well written, with very interactive puzzles, some given away by the hieroglyphics—if you can read them!

**Playability:**

Thoroughly enjoyable and fun to play, using the excellent parser, vocabulary and save-game capability now so familiar to Infocom game lovers. You'd better stay alert toward the end of this game if you hope to arrive at the rather unusual ending.

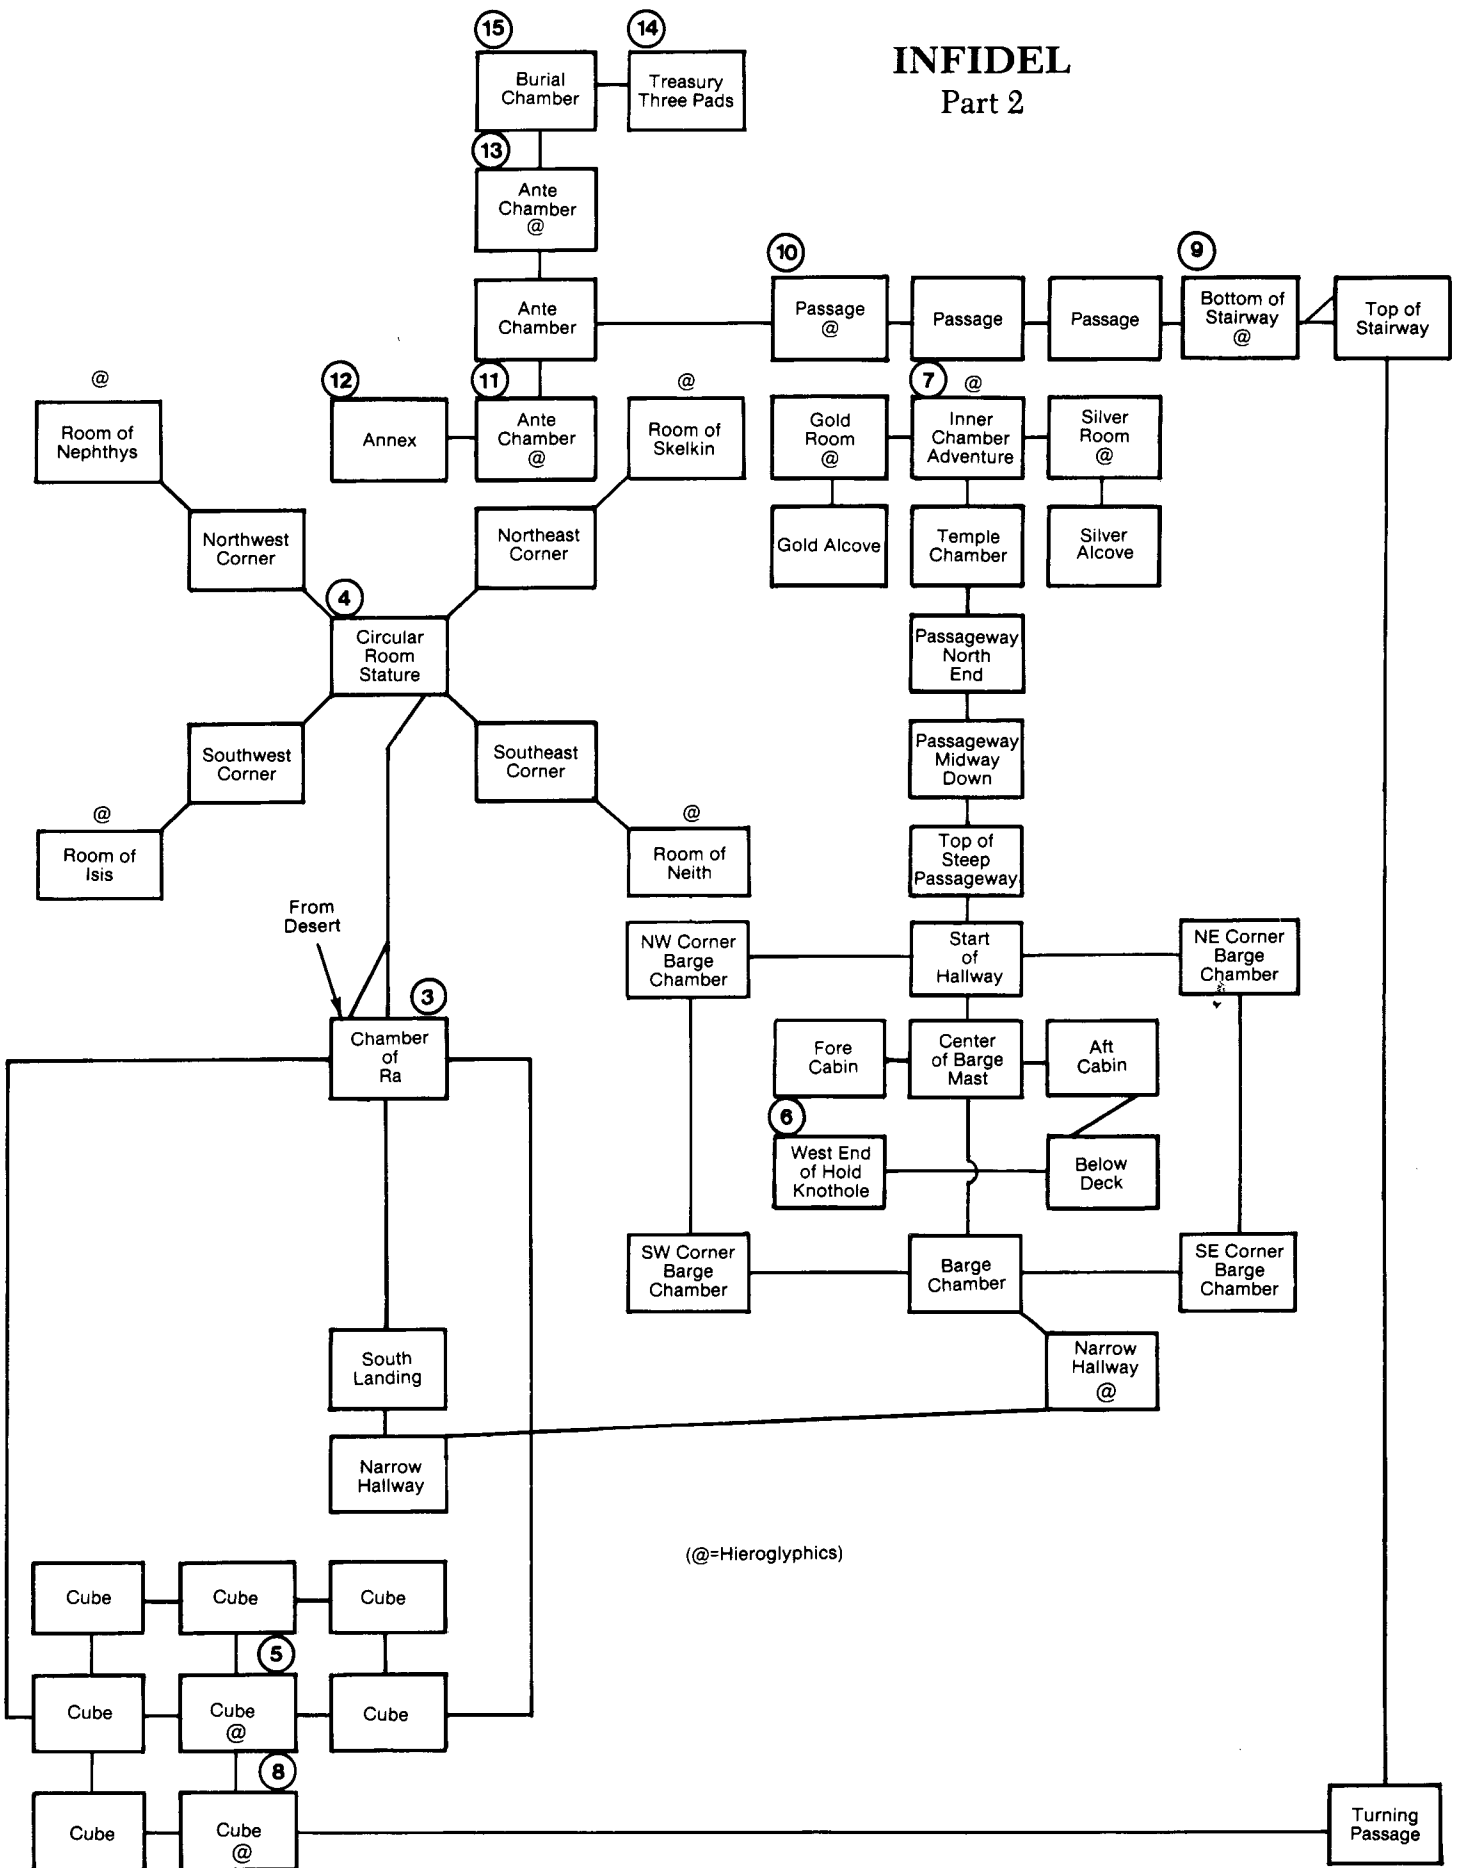

## INFIDEL

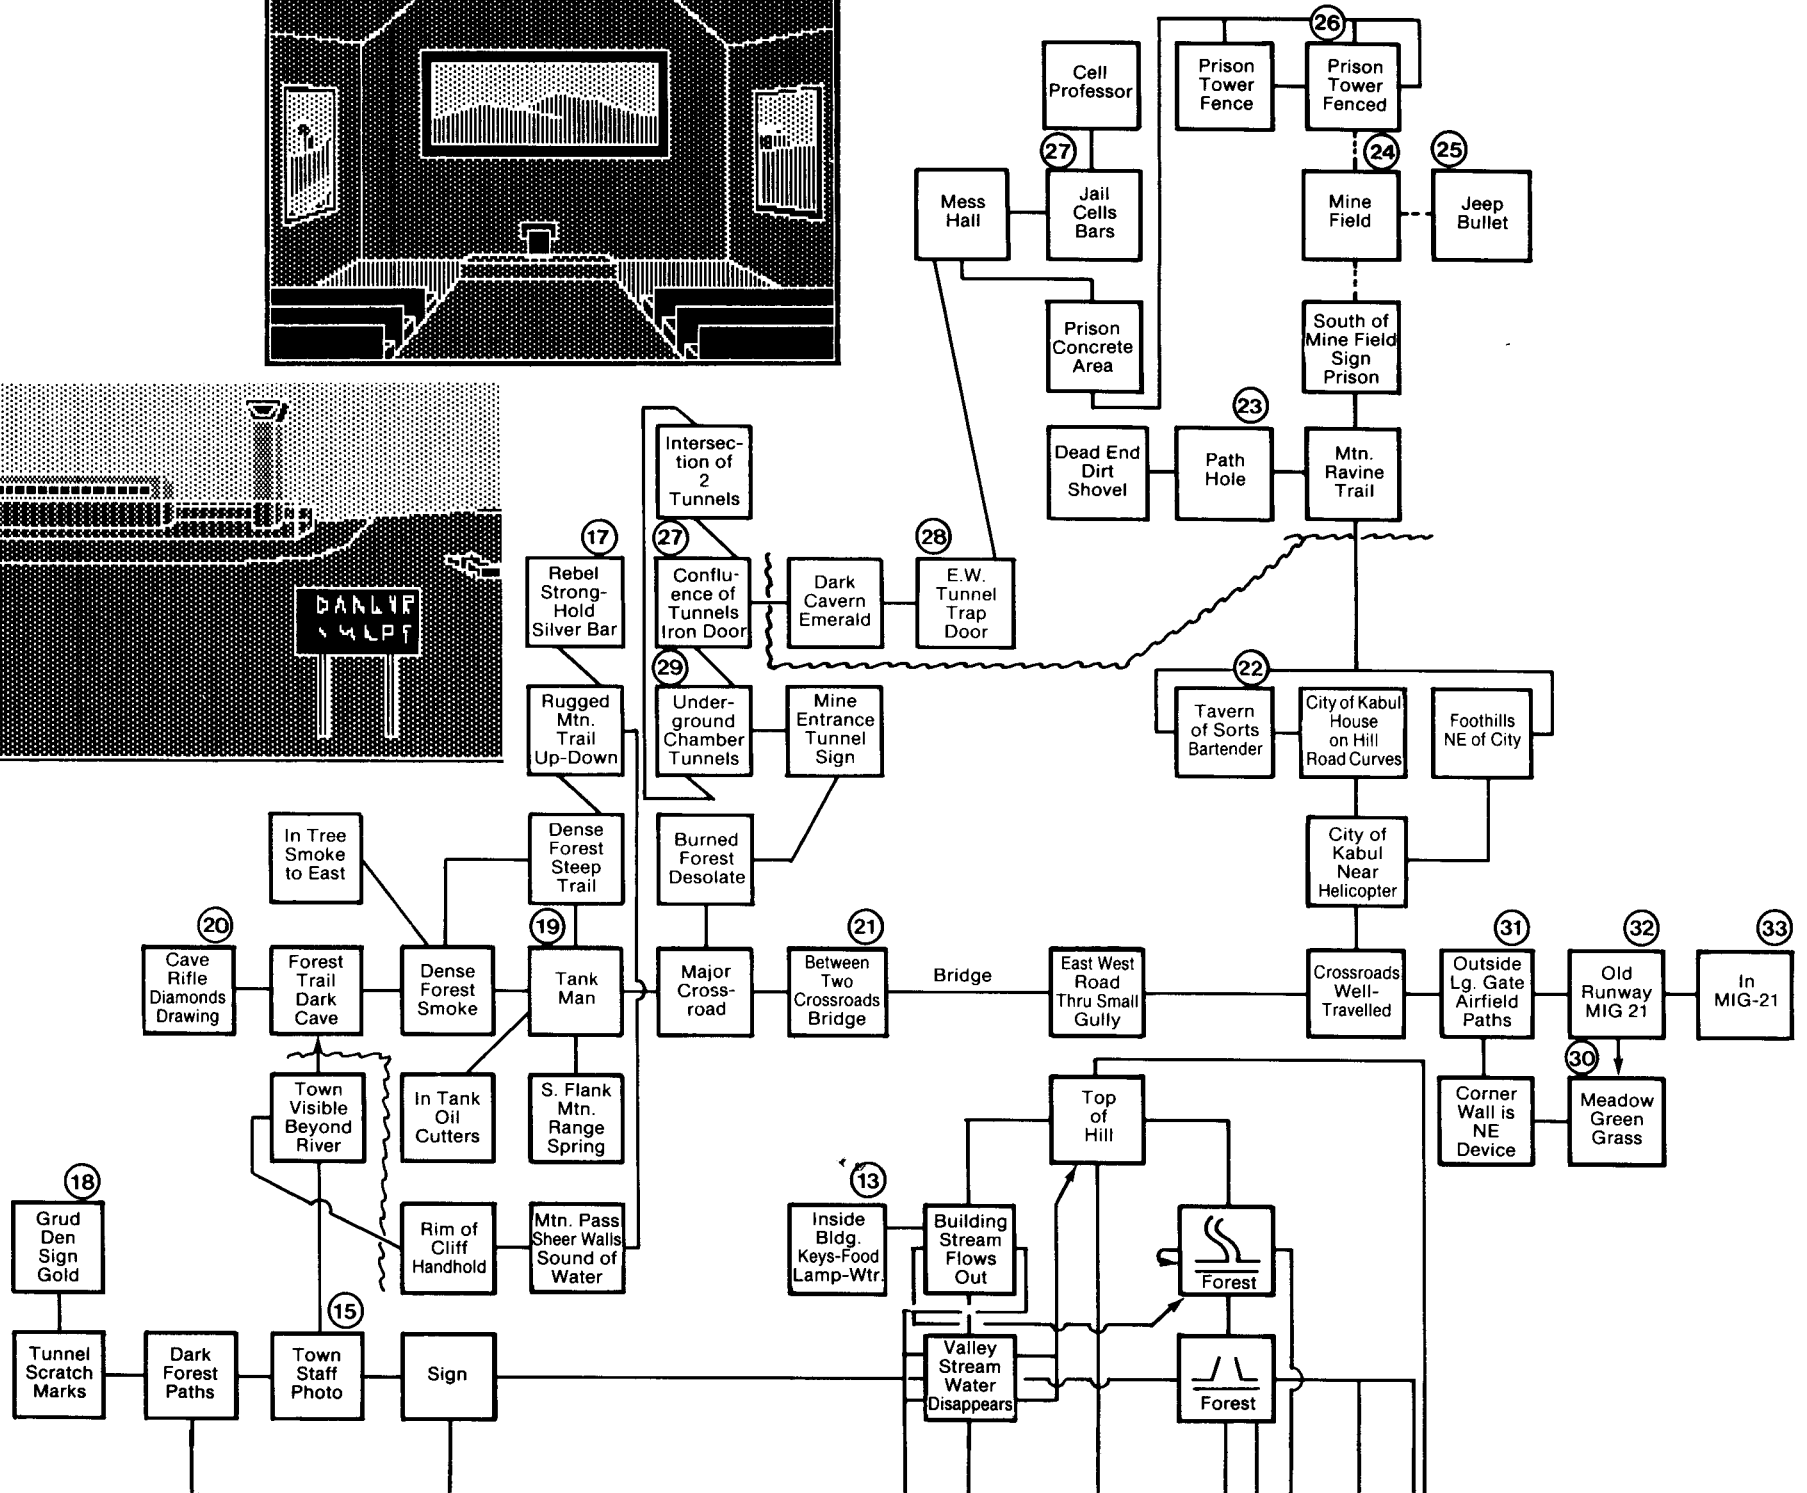

### Part 1

# INFIDEL

## Part 2

# KNIGHT OF DIAMONDS

**Company:** Sir-Tech Software, Inc.

**Suggested Retail:** \$34.95

**Type:** Hi-Res fantasy adventure, a mapmaker's delight.

**Description:**

The second scenario in the already classic *Wizardry* series. You must find and return the Staff of Gnilda to the City of Llylgamyn. To get started, you need developed characters from the Proving Grounds, whom you transfer to the new scenario. In the dungeon you will meet with the No-See-Ums before too long. Worse than these pests are some of the evil creatures that love to take all but one hit point away from your favorite characters.

**Playability:**

No specific way of solving *Knight of Diamonds* exists, so don't look in the book for one. Map carefully, grow in strength, get to the sixth level. When you're there, remember The Knight of Diamonds and Shield. Don't tackle this one unless you are a *Wizardry* expert and have at least Level 13 characters. *Knight of Diamonds* is the maze-type adventure at its best. You can play with one to six people (with one person acting as the Dungeon Master at the keyboard). It will provide many interesting hours of game fantasy, albeit somewhat repetitive.

## KNIGHT OF DIAMONDS

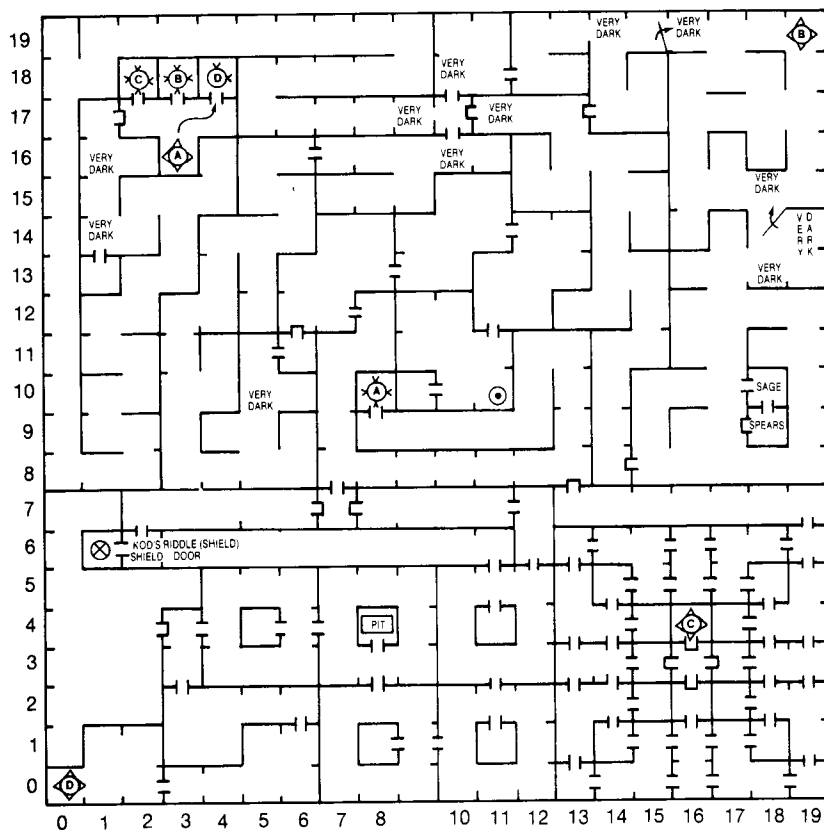

(Level 1)

**THE BEASTS**

- Weretiger
- Fuzz Ball
- Dink
- Lefestealer
- Troll
- No-See-Um
- Fluffy Thing
- Mottled Figure
- Were Amoebae
- Carriers
- Magic Armor
- Chimeras

# KNIGHT OF DIAMONDS

(Level 2)

## THE BEASTS

- Rhind Beetle
- Scorpion
- Nightstalker
- Evil Eyes
- Ogres
- Ogre Lords
- Gaunt Figure
- Magic Shield
- Gorgons
- Wyverns
- Lesser Demons
- Flame Rod
- Jeweled Amulet
- Amulet of Skill
- Dreamers Stone

(Level 3)

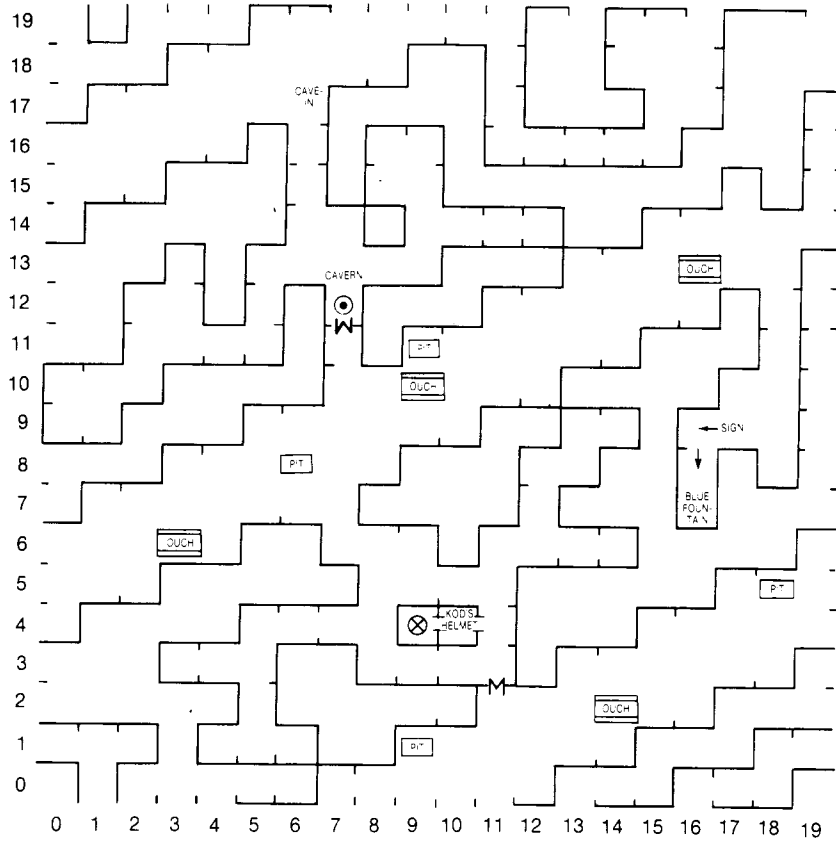

## THE BEASTS

- Giant Vipers
- Murphy's Ghost
- Bleepers

## OBJECTS:

- Broad Sword—Hrathnir

# KNIGHT OF DIAMONDS

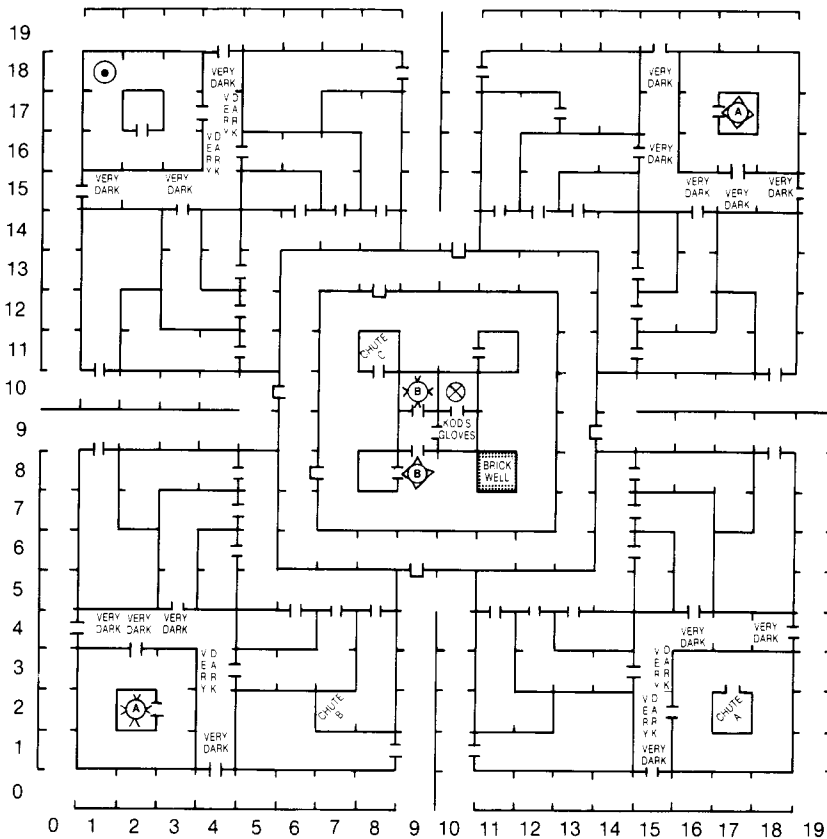

(Level 4)

## THE BEASTS

- Acid Slimes
- Will O'Wisps
- Giant Zombies
- Were Bats
- Giant Bats
- Foaming Molds
- Succubi
- Constrictors
- Magic Helmet (Kod's)

## OBJECTS:

- Amulet of Skill
- Mace Pro Poison
- Amulet/Makanito

# LABYRINTH OF CRETE

**Company:** Adventure International

**Suggested Retail:** \$29.95

**Type:** All-text adventure.

**Description:**

Two independently controlled characters, Jason and Hercules, represent your alter ego. Your mission: to recover the Golden Fleece. Doing so, you earn the respect of the inhabitants of Mount Olympus, who grant you access to that exclusive area. You'll explore three different worlds, solve a plethora of puzzles, and encounter most of the gods, goddesses, and creatures of Greek mythology. You don't have to know anything about mythology, nor will you learn anything about it from the game.

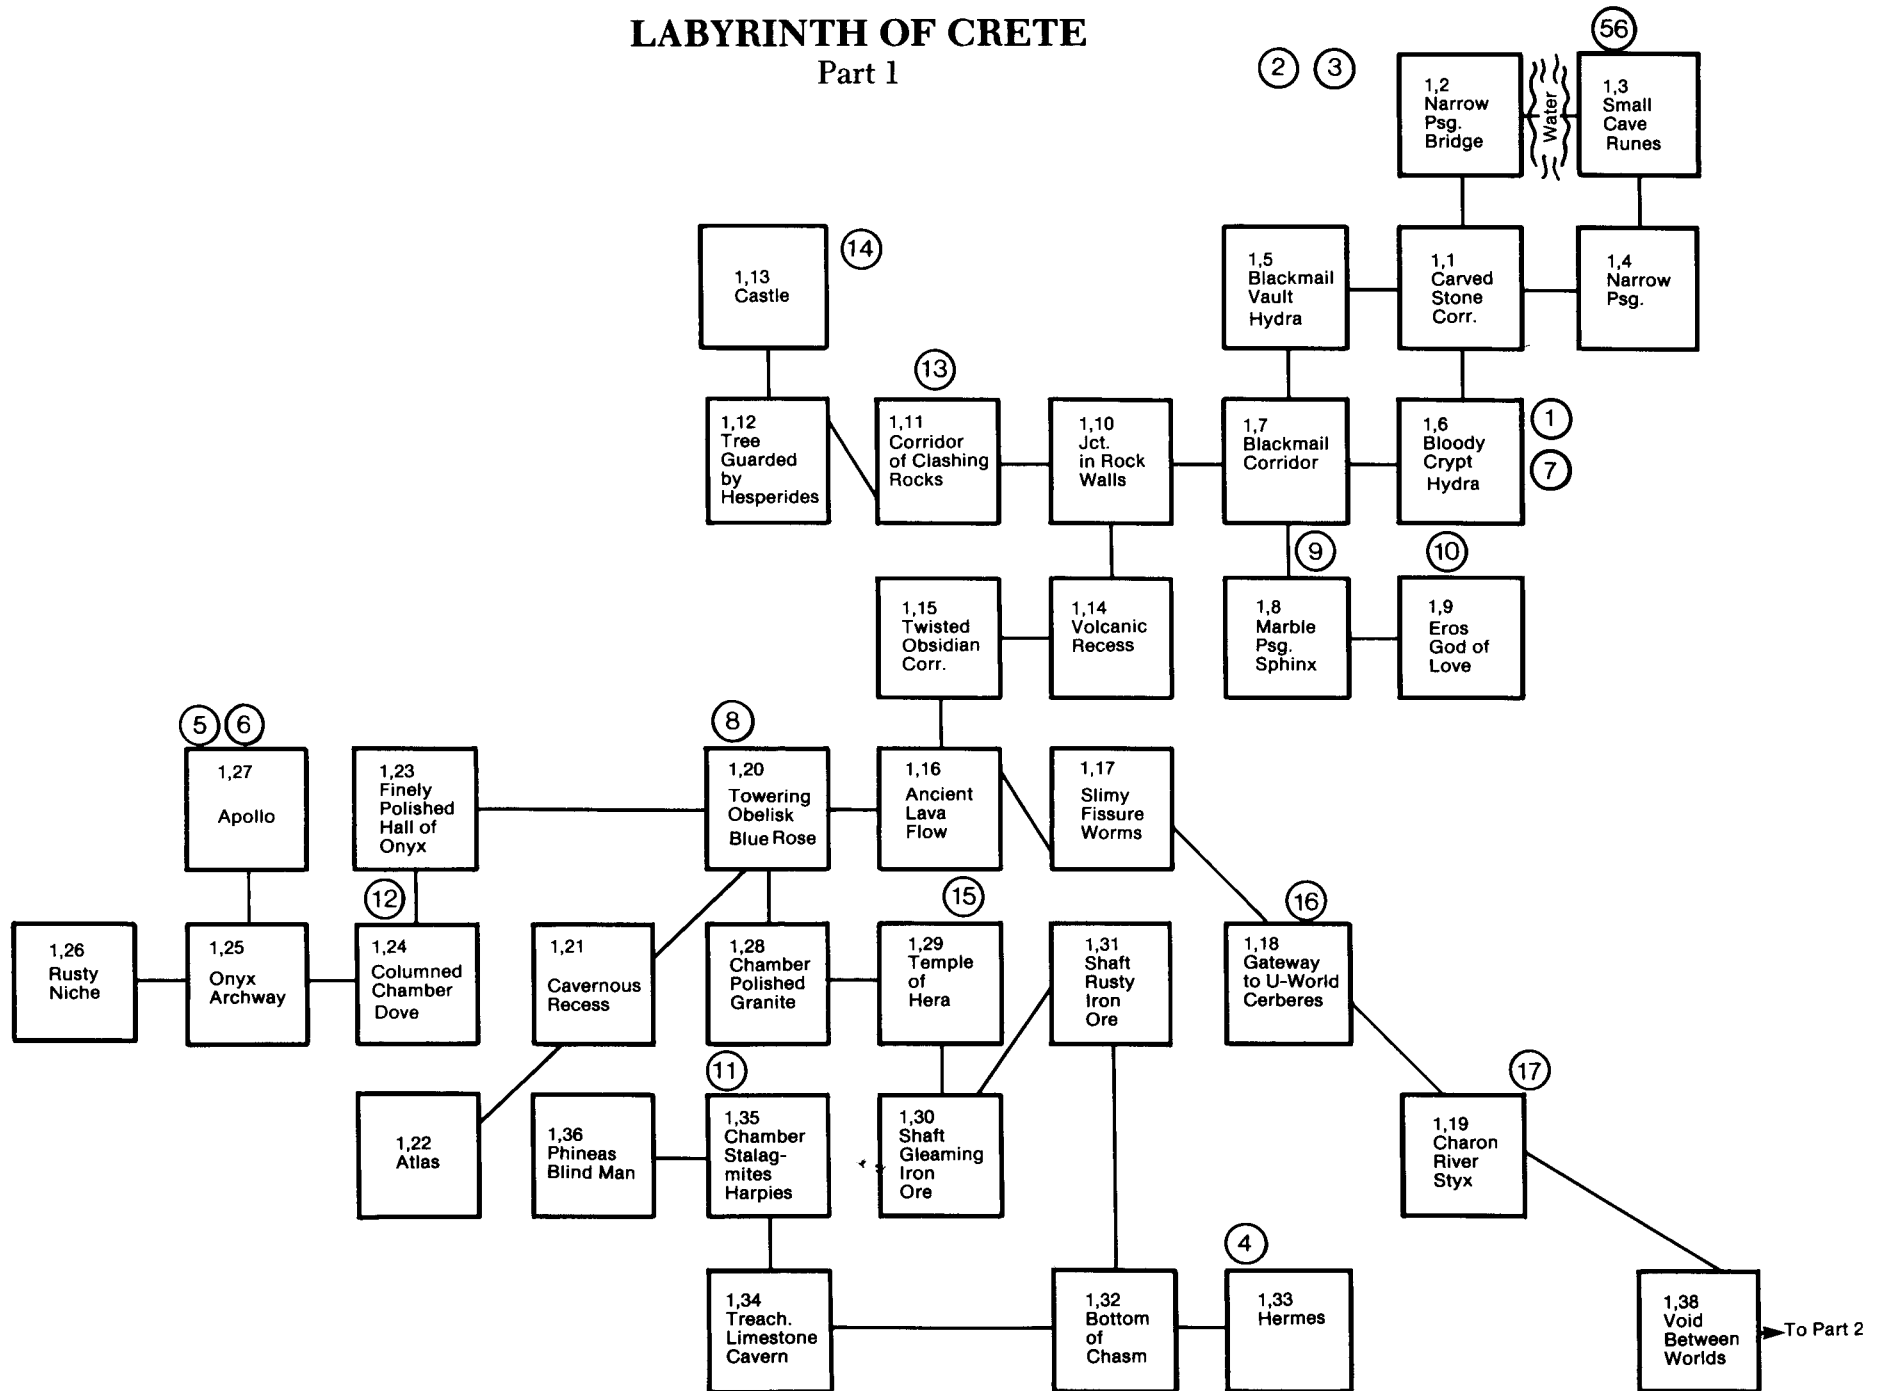

**Playability:**

The concept of interacting characters who can combine their talents to solve a given puzzle is an innovation in adventure games. Unfortunately, this game's implementation falls short of its conceptual promise. You can solve the majority of puzzles simply by Giving or Dropping the right object at the right location; you can only use most objects in the world in which you find them. The game is long and not too difficult, but reasonably fun to play and has more puzzles than you can shake a stick at.

# LABYRINTH OF CRETE

## Part I

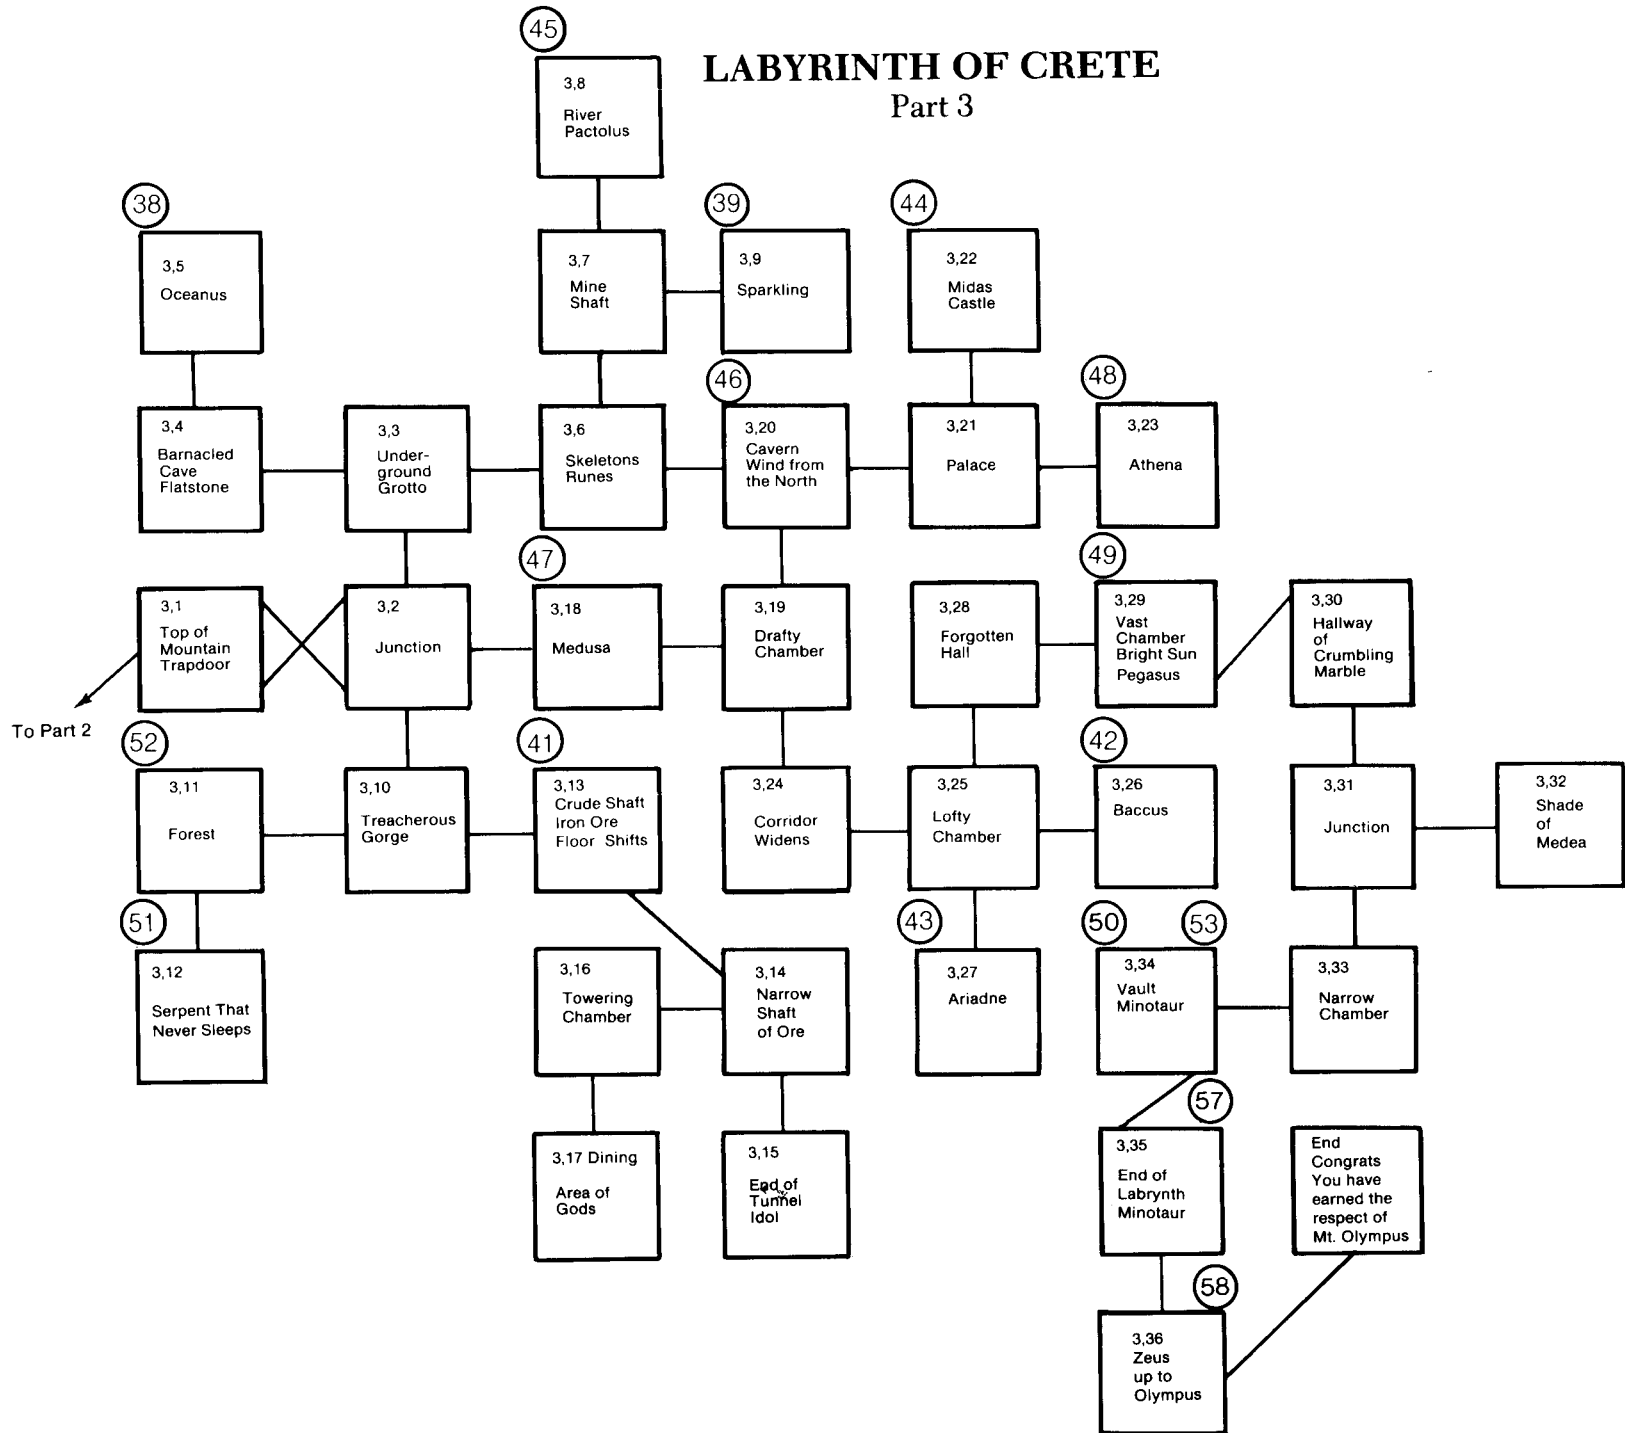

# LABYRINTH OF CRETE

## Part 2

# LABYRINTH OF CRETE

## Part 3

# LEGACY OF LLYLGAMYM

**Company:** Sir-Tech Software, Inc.

**Suggested Retail:** \$39.95

**Type:** A Hi-Res fantasy.

**Description:**

Third in the *Wizardry* series, and another map-maker's delight with six additional levels. Evil times have again befallen the kingdom and famed warriors, such as yourself, are called on to find the mystical orb hidden deep within a dragon's mountain lair. The orb possesses the power to reveal the source of danger, and therein lies the hope of the world. The graphics look better than ever, and those of the introduction are nifty indeed. A few more puzzles appear in *Llylgamyn* than did before, mostly in the form of not-too-difficult riddles.

**Playability:**

You need the basic *Wizardry* disk in order to create characters, who must then undergo the Rite of Passage Ceremony. Then you can enjoy the fine graphics. If you've played prior games with a single alignment, you'll need to change your thinking as both "good" and "evil" parties of characters are required for success. There's still no way to save the game in the bowels of the dungeon.

## LEGACY OF LLYLGAMYN

**(Level 1)**

**THE BEASTS:**

- High Corsair
- Garian Raiders
- Giant Serpents
- Slimy Thing
- Garin Priests
- Anacondas
- Garian Captains
- Giant Slug
- Strange Plants
- Crawling Kelp
- Dusters
- Shadowy Figures
- Garian Mages
- Moat Monsters
- Large Snakes
- Unseen Entities
- Poltergeists
- Garian Guards
- Corsairs

# LEGACY OF LLYLGAMYN

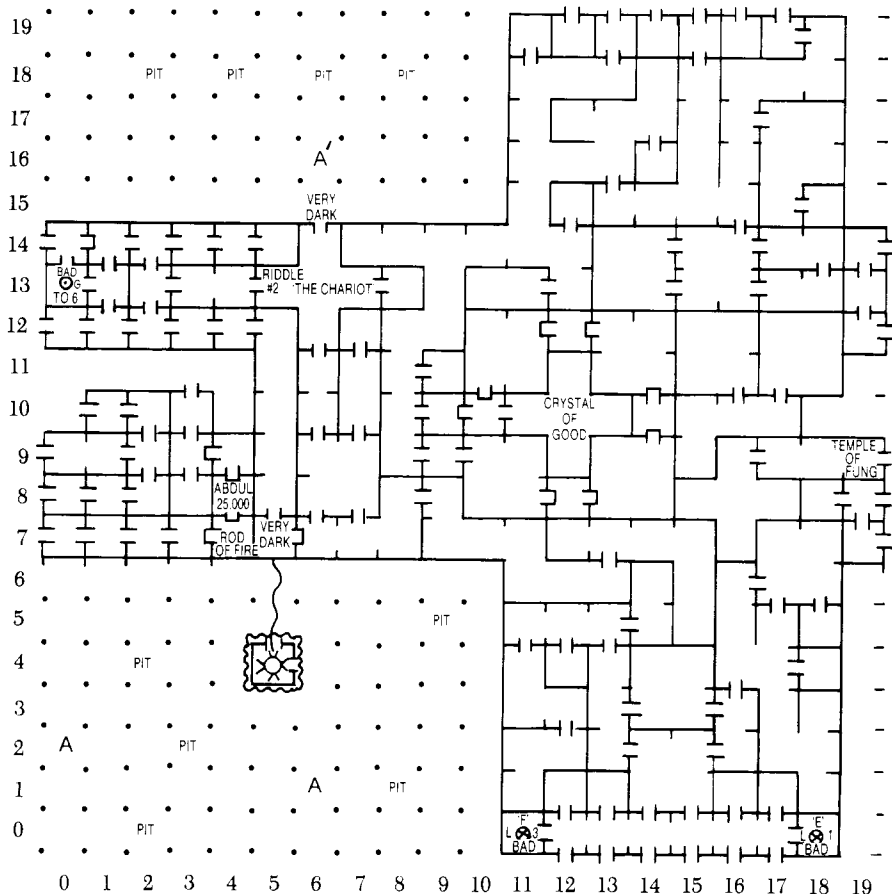

## (Level 4) GOOD ALIGNMENT

### THE BEASTS

- Wights
- Ronin
- Necromancers
- Delf's Minions
- Delf
- Friars
- Master Ninja
- 2-Headed Snakes
- Romodo Dragons
- Dark Steed
- Dark Rider
- Banshees
- Men at Arms
- Giant Ants
- Goblin Princes
- Dwarf Fighters
- Strangler Vines
- Goblins
- Hobgoblins
- Goblin Shamans
- Cockatrice
- Acolytes

- Were Tiger
- Bengal Tigers
- Strange Animals
- Burglars

# MADVENTURE

**Company:** Micro Lab

**Suggested Retail:** \$34.95

**Type:** All-text adventure.

**Description:**

First, get fifteen treasures to the theater lobby and visit those locations that contribute points to the maximum of 400. Next, accomplish the above in less than 185 moves. This game contains the author's choice of the best single puzzle in all adventuredom.

**Playability:**

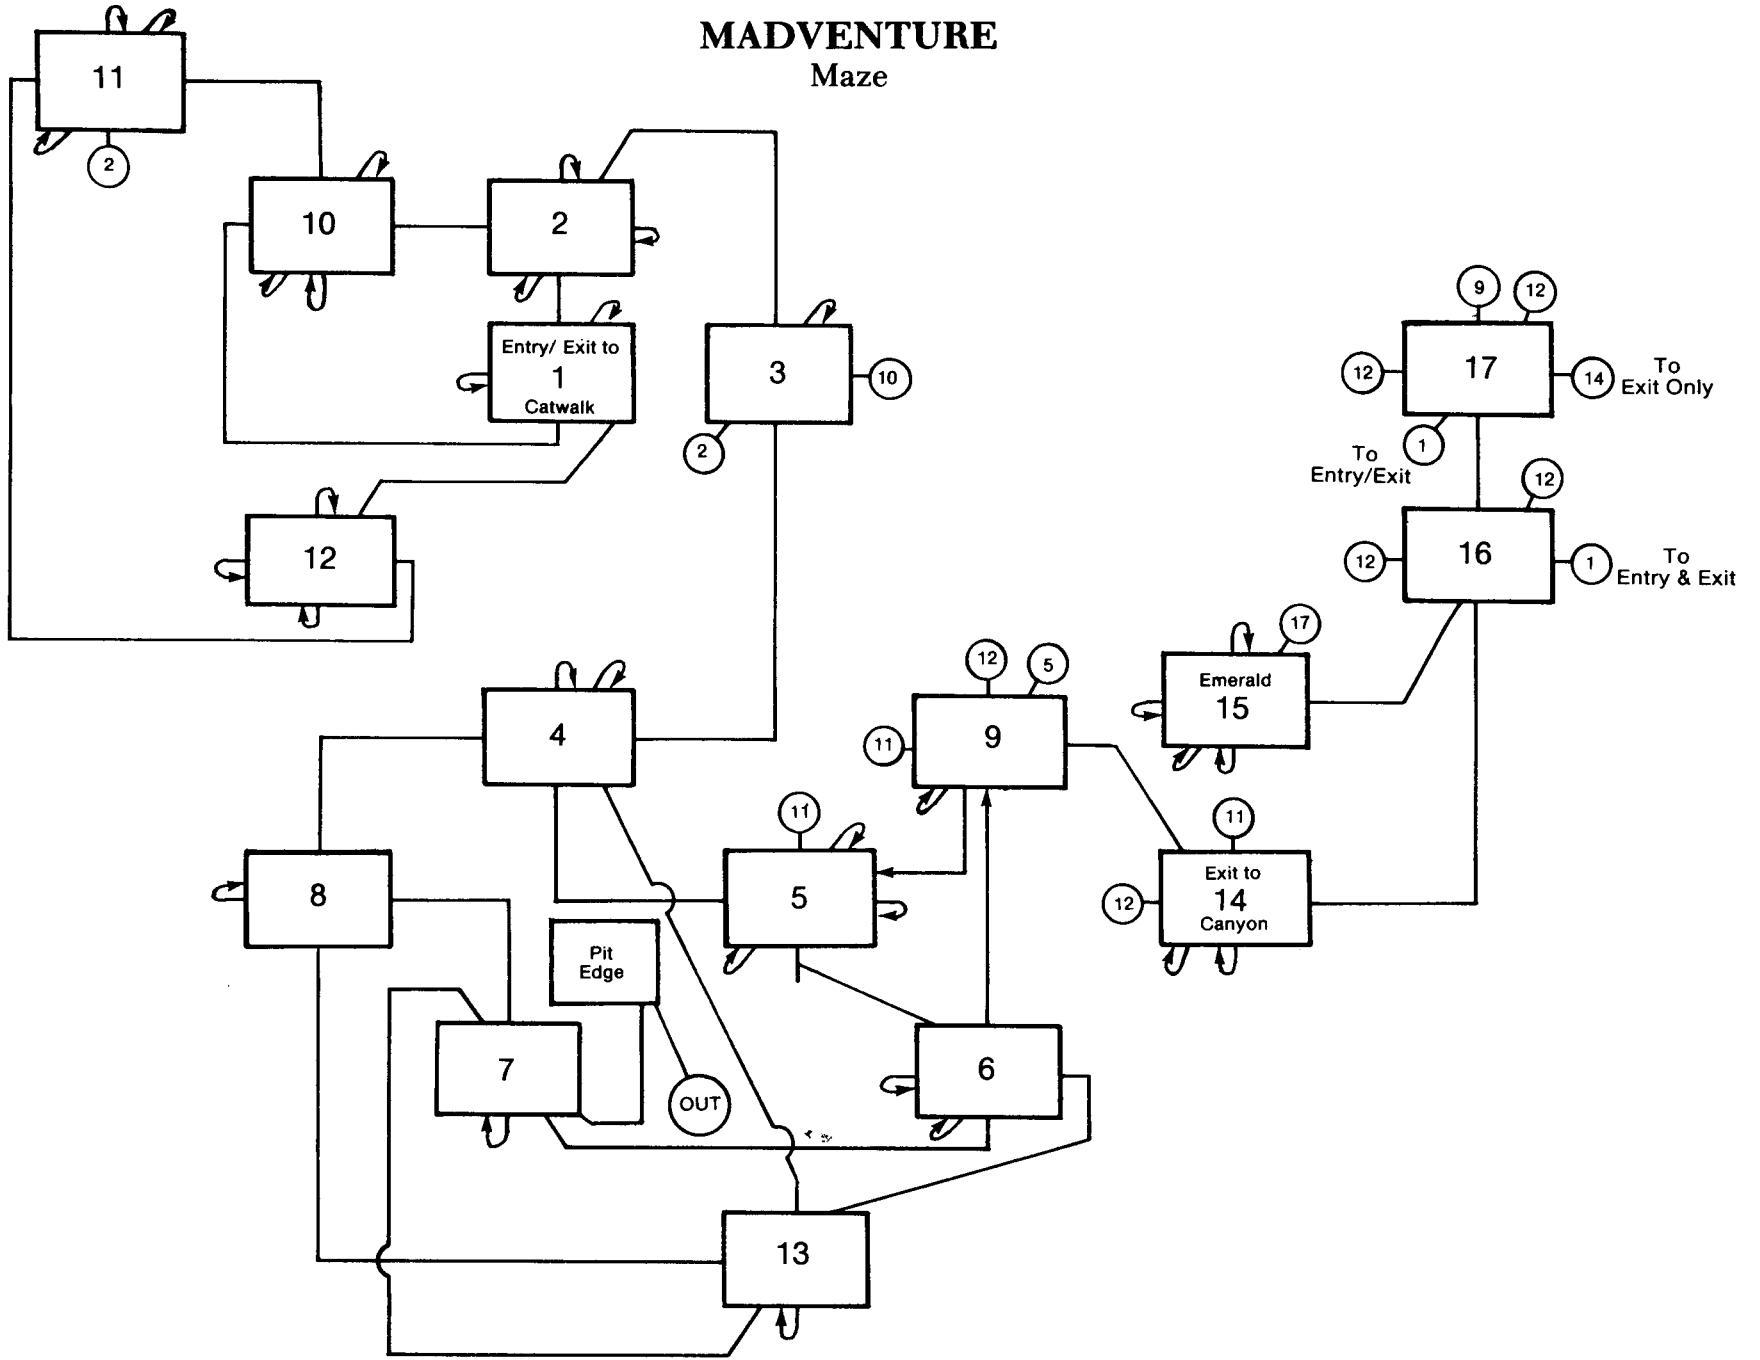

Not recommended for beginning or intermediate puzzle-game players. Perhaps the most challenging set of puzzles yet combined into one program, it is some three times the size of typical Scott Adams puzzlers. The system will load a saved-game from a scratch disk. This is a super-tough, crisp game for the puzzle nut!

# MADVENTURE

# MADVENTURE Maze

# MASK OF THE SUN

**Company:** Ultrasoft

**Suggested Retail:** \$39.95

**Type:** An animated Hi-Res adventure with color graphics and Hi-Res text.

**Description:**

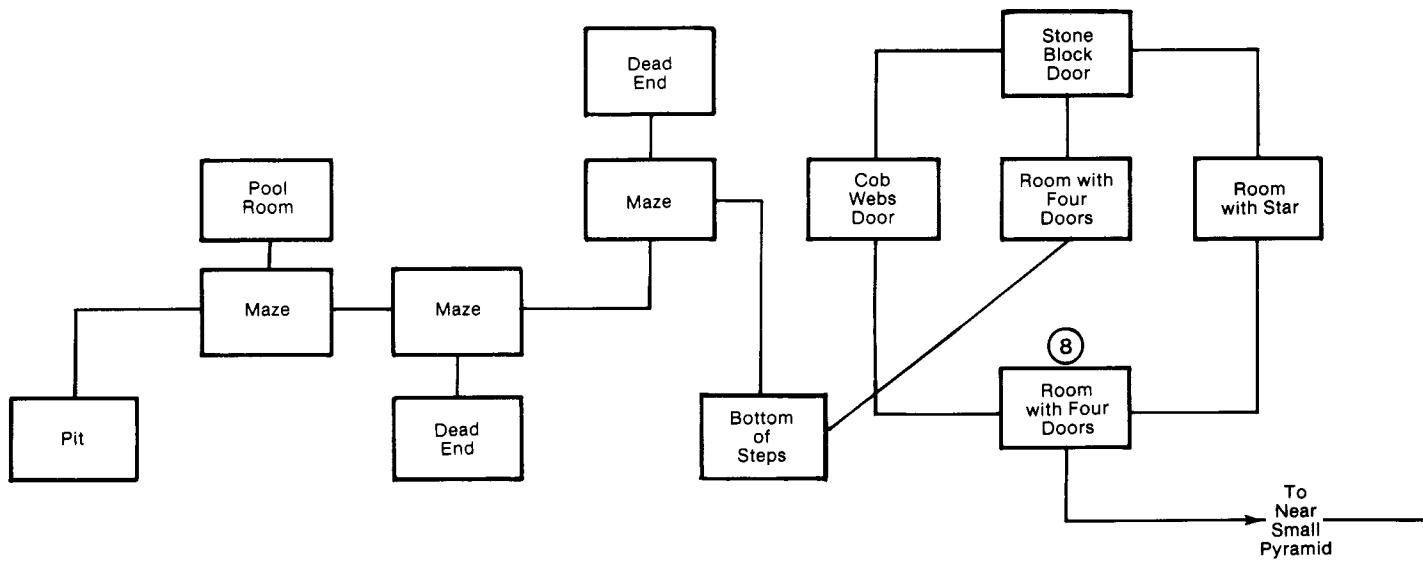

You as Mac Steele must find the legendary Mask to cure your mysterious malady, held in check only by the pills which you must always carry. You spend much time on the road in a bouncing jeep, and even more time in a bouncing sort of walk through drab tunnels. You must hurdle a Real-time, semi-arcade like lava pit and correctly answer any one out of three riddles in order to get through two locations.

**Playability:**

The *Mask of the Sun* offers several challenges not found too often in adventures. By far the most difficult task is unraveling the mystery of the maze, actually two mazes separated by a room ready to fall in on your ears. An average adventure, with a higher than average degree of difficulty.

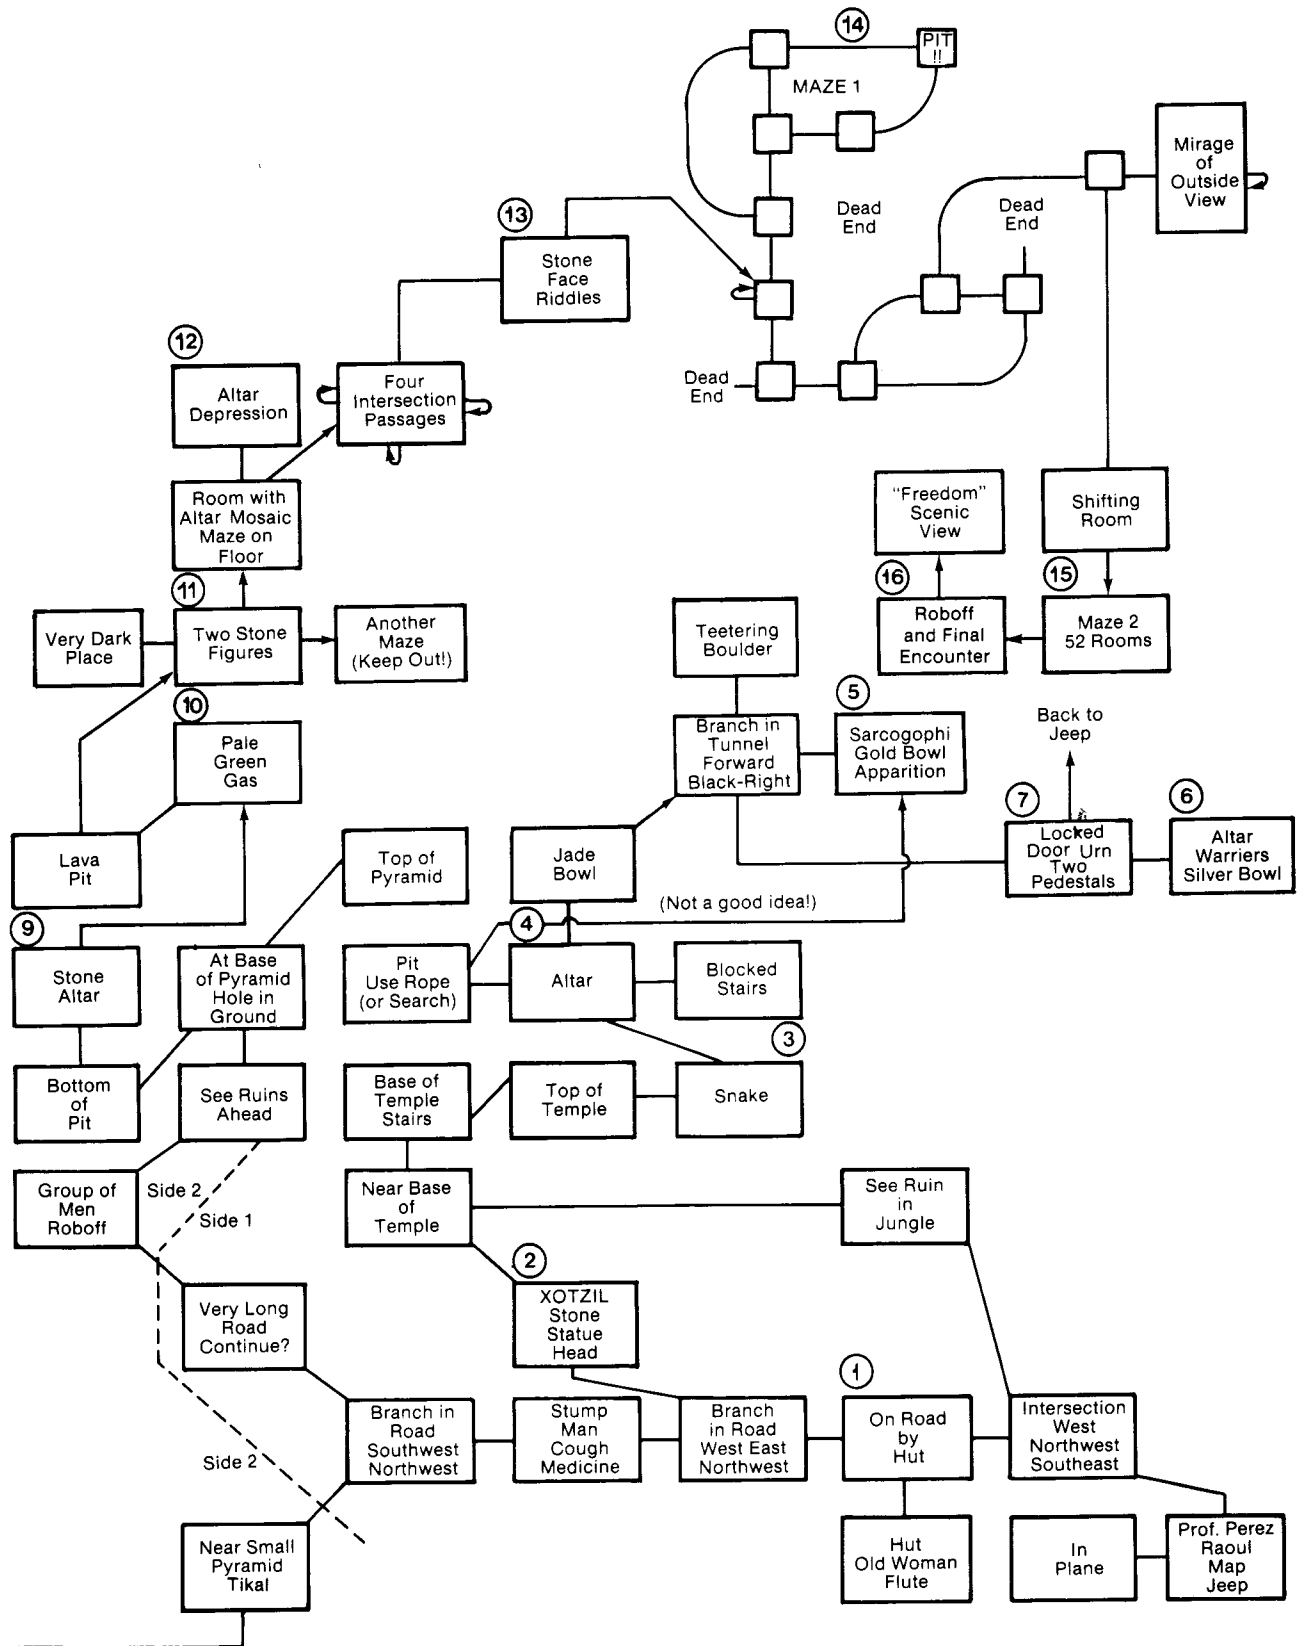

# MASK OF THE SUN

# MASK OF THE SUN

# MISSION: ASTEROID

**Company:** Sierra On-Line Systems

**Suggested Retail:** \$19.95

**Type:** A Hi-Res adventure with color graphics.

**Description:**

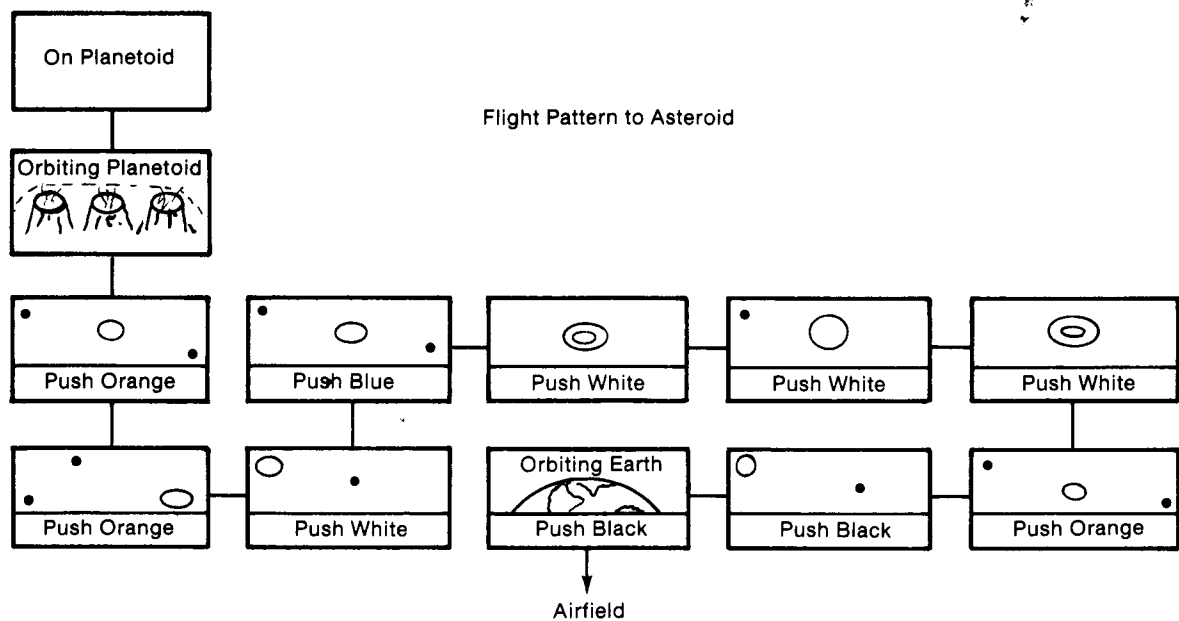

Your mission: to destroy an approaching asteroid before it collides with the planet Earth. Yes, there's a time limit.

**Playability:**

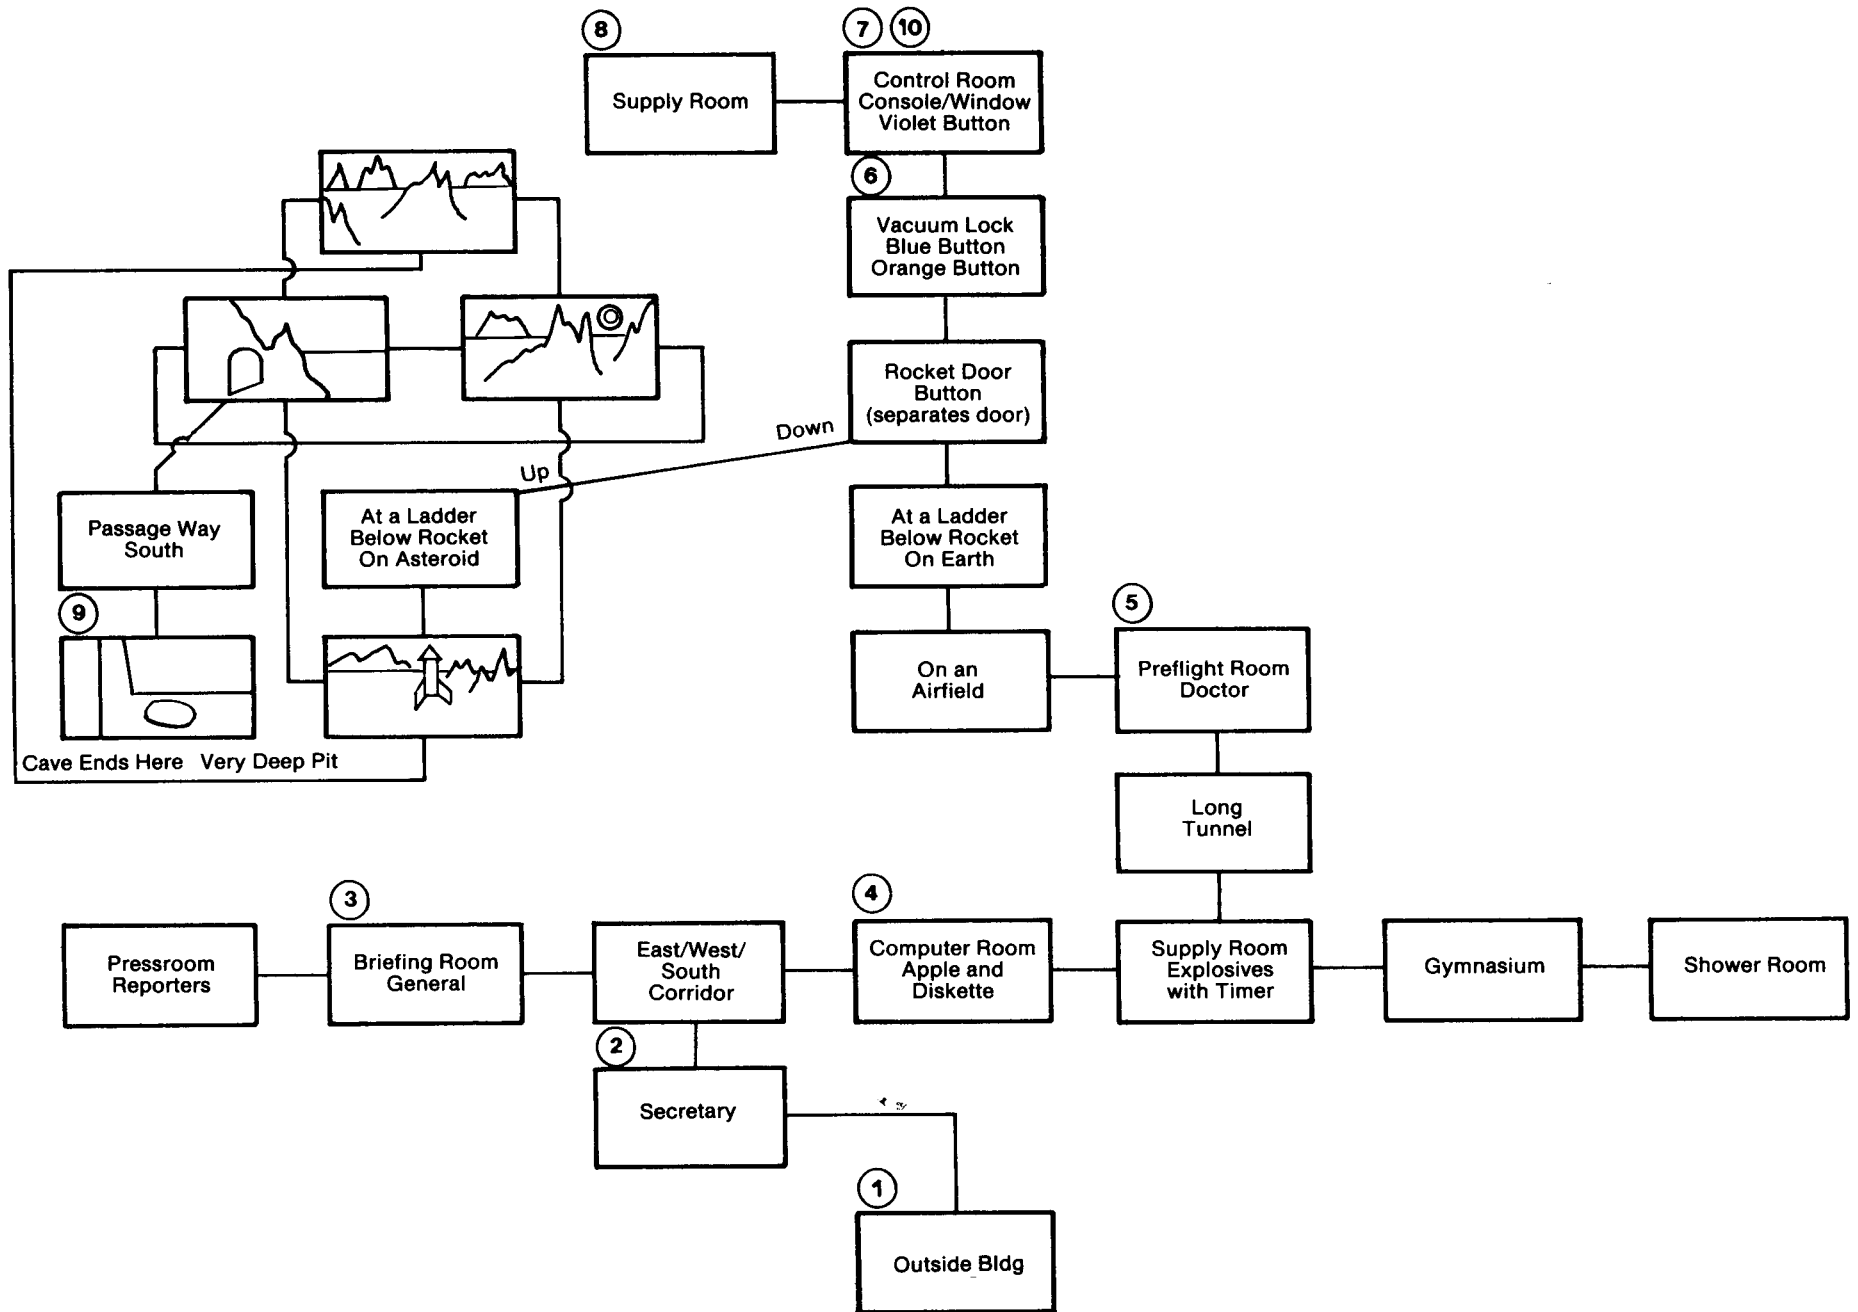

The elements of the puzzles prove easy to solve individually. In fact, this game is very easy right up to (almost) the very end. However, you have a fixed number of moves and a time limit of five minutes per move. Saving a game requires you to use a move. *Mission. Asteroid* is a winner: totally straightforward and solvable while presenting the challenge of completing it within the tough time constraint.

## MISSION: ASTEROID

### Continuation

# MISSION: ASTEROID

# MISSION IMPOSSIBLE

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** Originally an all-text game, recently re-released in Hi-Res form.

**Description:**

You must stop the Saboteur from bombing the Nuclear Reactor. To complicate matters, you are a walking time-bomb, and the saboteur dies before you get very far. You must enter three differently colored rooms in a specific sequence. The ending can be a real blast.

**Playability:**

One of the easier games in the series, with not too difficult and quite straightforward puzzles. The game is sort of fun while it lasts, but it doesn't last all that long. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game offers a single, easily made or recalled saved-game.

# MISSION IMPOSSIBLE

# MUMMY'S CURSE

**Company:** Highland Computer Service

**Suggested Retail:** \$30.00

**Type:** Hi-Res adventure with color graphics.

**Description:**

Find the solid gold burial mask and return it to the starting point. Doing so involves finding and using three amulets, a little woodwork, and the waving of a scepter.

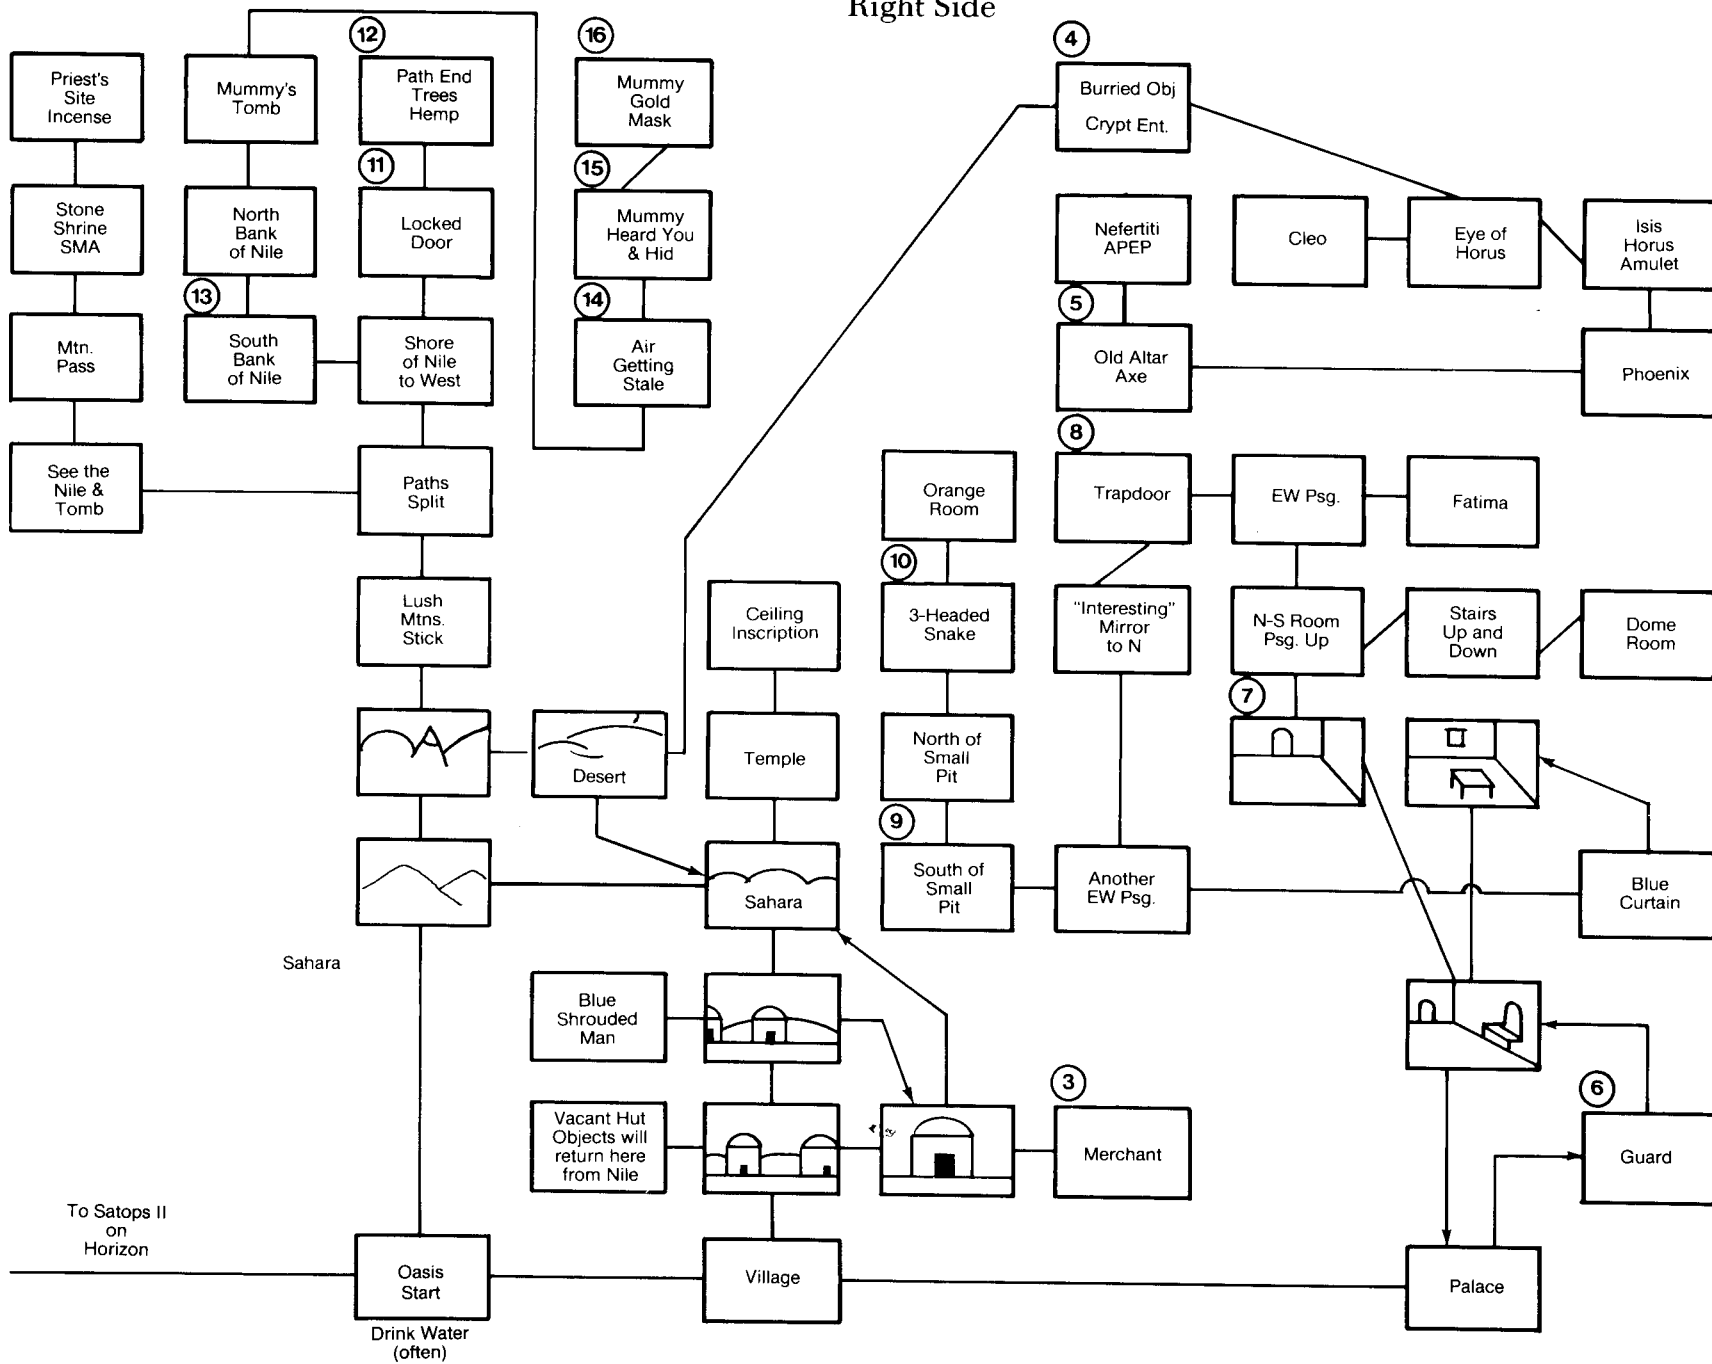

**Playability:**

The mummy and a few fixed traps pose little difficulty once you have mapped and understood the game. The game holds your interest easily, largely because of the excellent save-game implementation. The game has little in the way of plot, and the vocabulary is poor, but all in all it rates as an average adventure suitable for beginning to intermediate players.

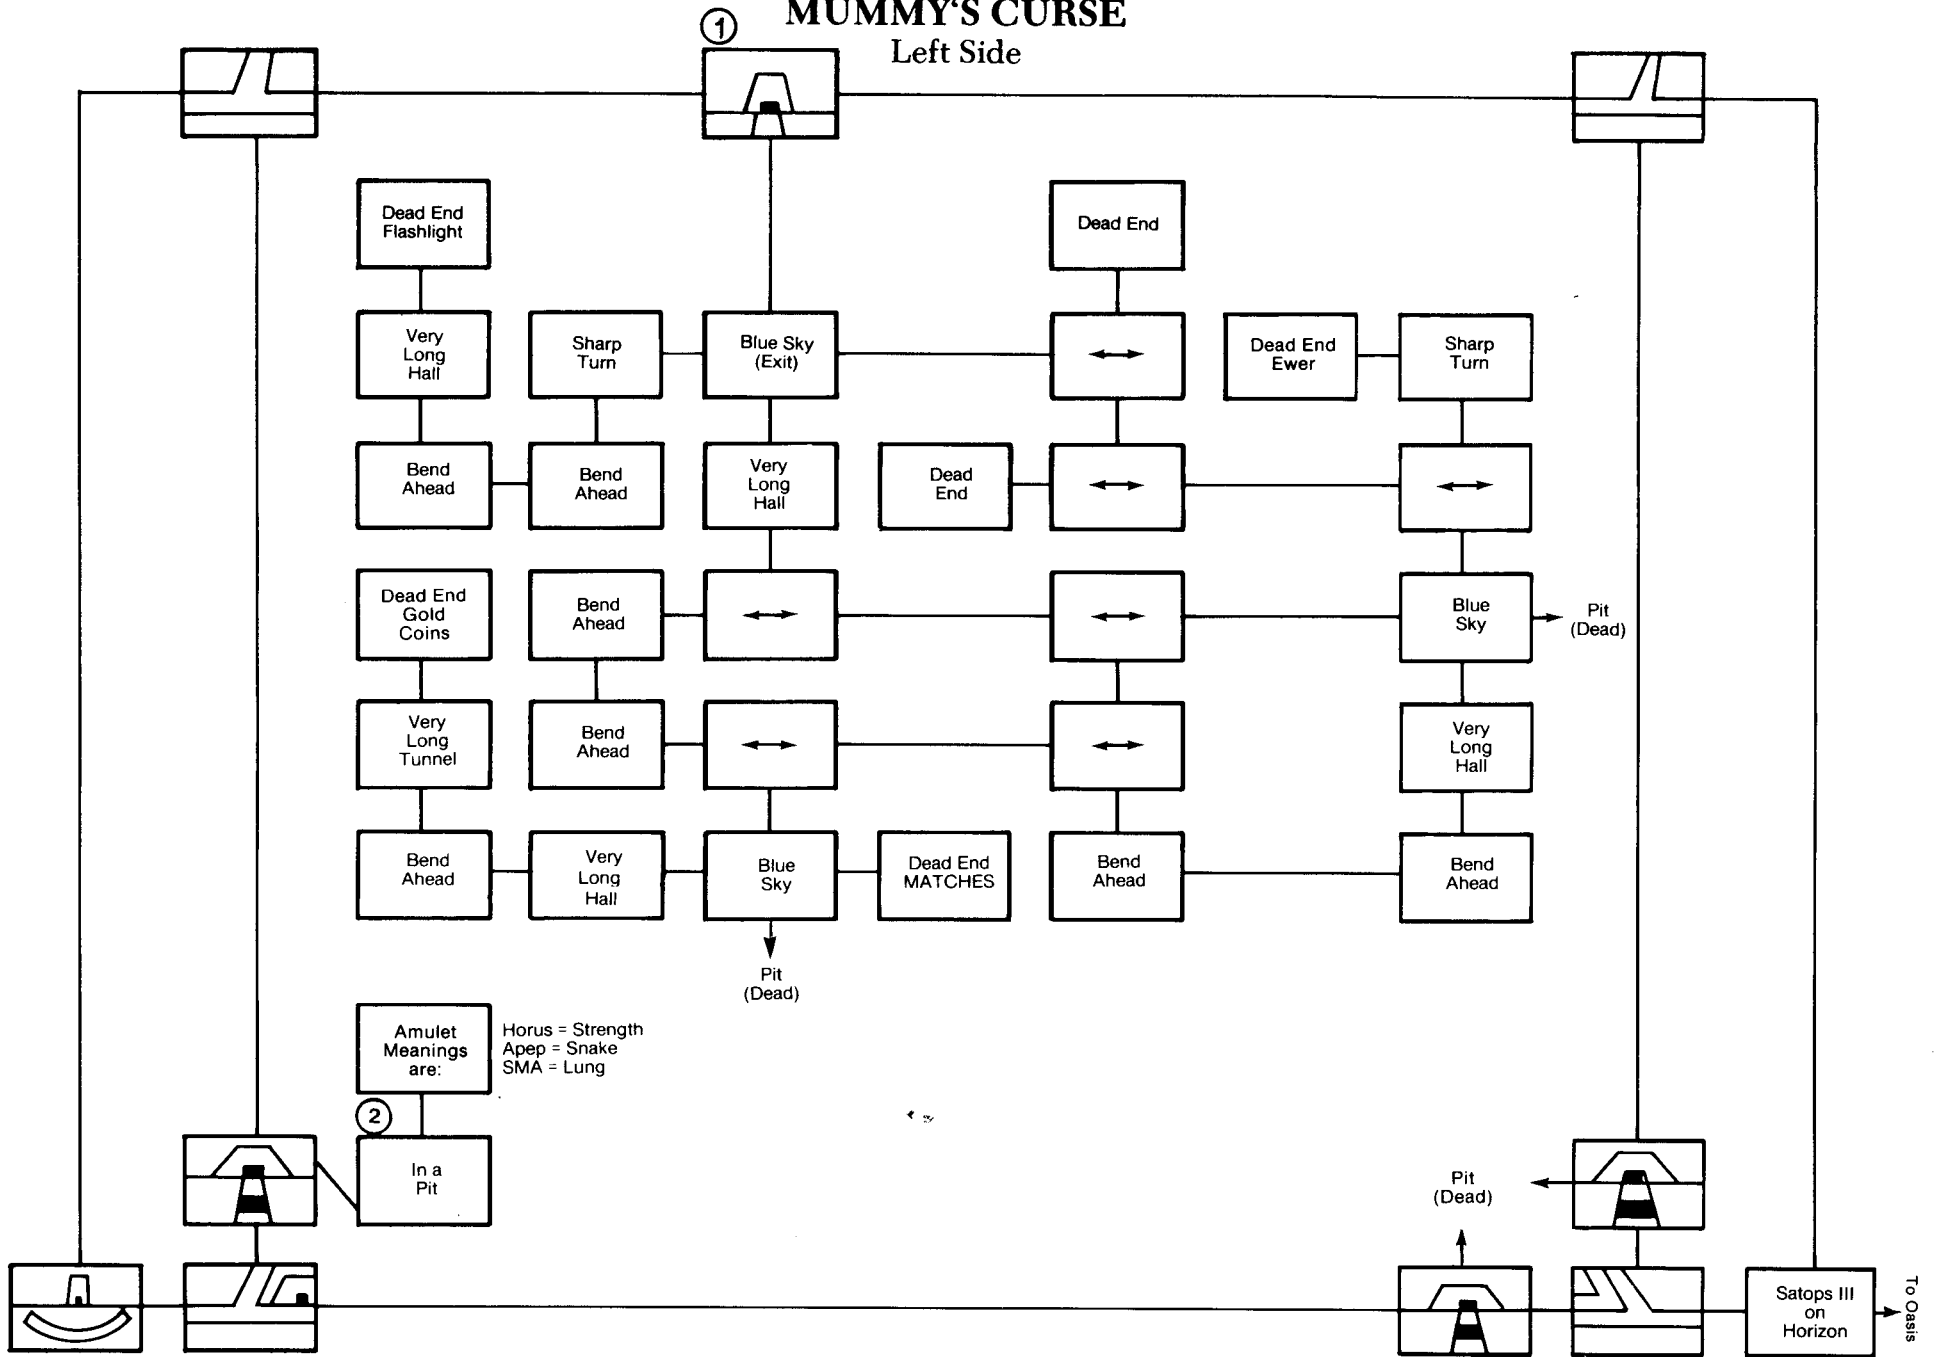

# MUMMY'S CURSE

## Right Side

# MUMMY'S CURSE

Left Side

# MYSTERY FUN HOUSE

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, soon to be revised into a Hi-Res version. Price also includes *Pyramid of Doom* and *Ghost Town*.

**Description:**

Spies have hidden secret plans that you must retrieve from a carnival Fun House. Water Maidens, Shooting Galleries, Carousels, Weird Windows and a slew of locked doors await you. The puzzles, marked by a high degree of imagination, are devilishly clever.

**Playability:**

A lot of fun to play, challenging to unravel, difficult to bring to a successful conclusion—and my choice for the best of Scott Adams' twelve original games. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game provides a single, easily made or recalled saved-game.

# MYSTERY HOUSE

**Company:** On Line Systems

**Suggested Retail:** \$24.95

**Type:** Hi-Res adventure.

**Description:**

Based loosely on the Agatha Christie novel, *The Ten Little Indians*. You have the dual task of trying to find the treasure hidden somewhere in the house and deducing the identity of the baddy. Unfortunately, he keeps murdering the other suspects and even tries to kill you.

**Playability:**

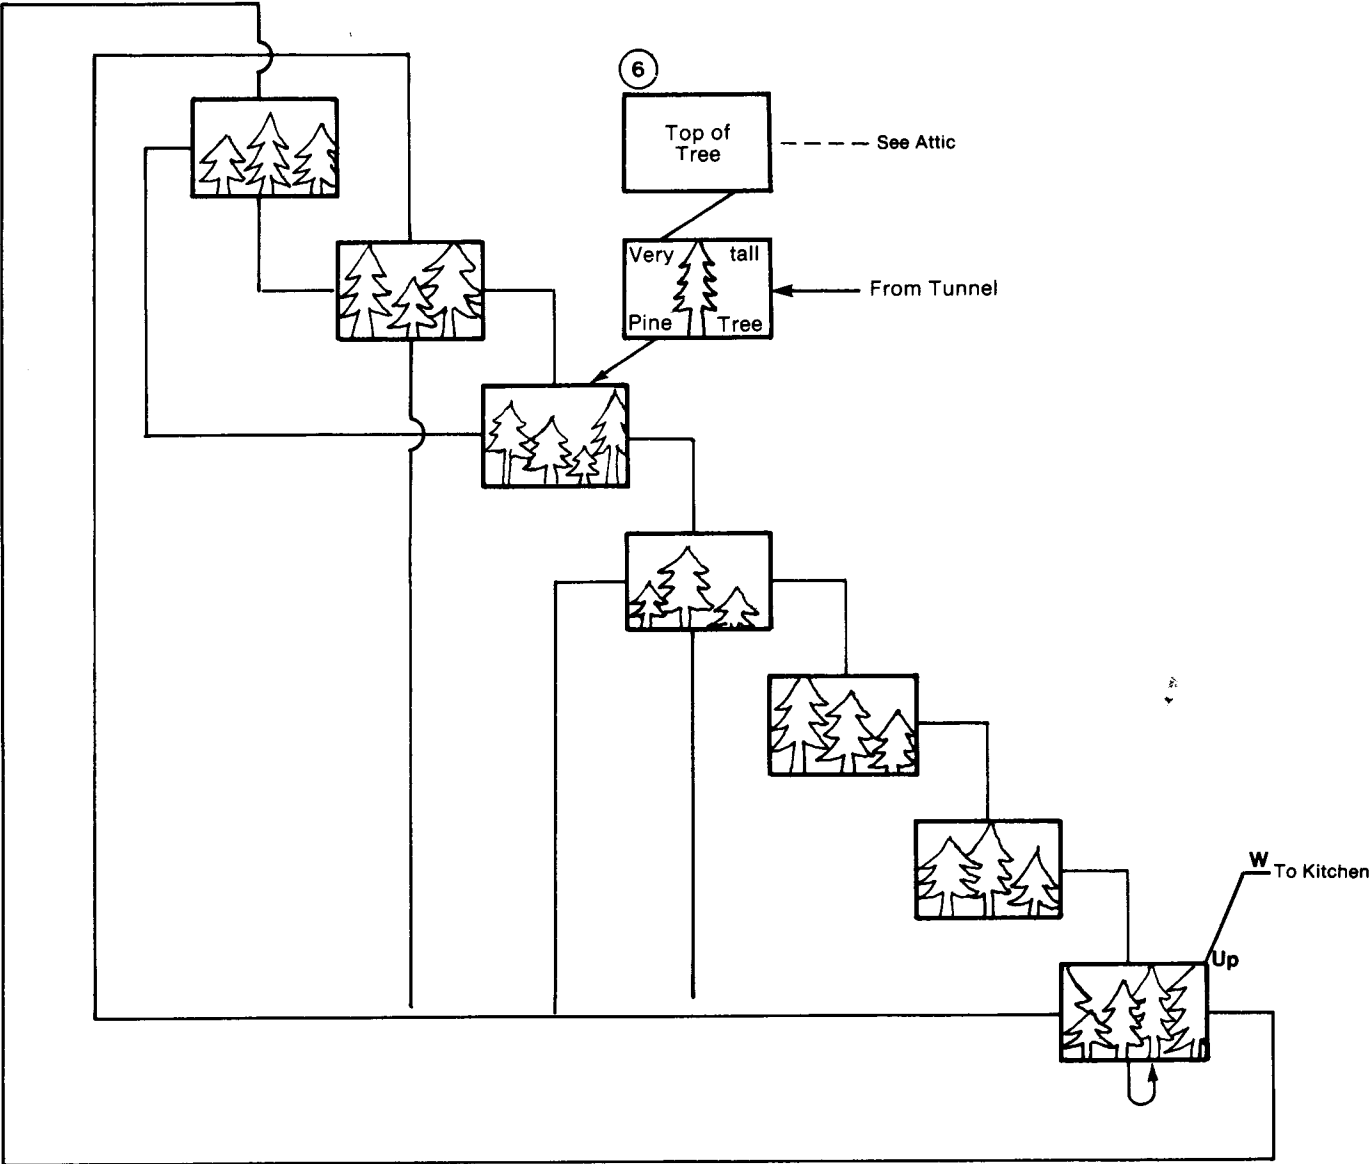

Not a long game. The mansion has only two stories. The vocabulary is limited and uses only a standard two-word parser. The graphics of rooms and objects appear as black and white line drawings. You do get a save-game option, however. All in all, it's a fun game for beginning and intermediate adventurers, and is noteworthy as the first of the Hi-Res adventures.

# MYSTERY HOUSE

## Forest Maze

# OLDORF'S REVENGE (WIZARD I)

**Company:** Highland Computer Services

**Suggested Retail:** \$19.95

**Type:** Black and white Hi-Res adventure.

**Description:**

You simply need to find the fourteen scattered treasures that lie about in the four linked, but otherwise independent, game segments. You must choose which of the seven types of characters you wish to become in order to solve specific puzzles. The management of each character's limited "lives" makes up a large part of the challenge. The graphics are only average, but the text gets rather clever in places, especially at the end.

**Playability:**

A barely average adventure, but a good one for first time adventurers. It will serve the more experienced player as a pleasant way to pass time. After reaching the second segment of the game, you may save it. The vocabulary is not very good; in fact, it's very poor, but at least you don't get killed off at every corner.

# OLDORF'S REVENGE

## Part 2

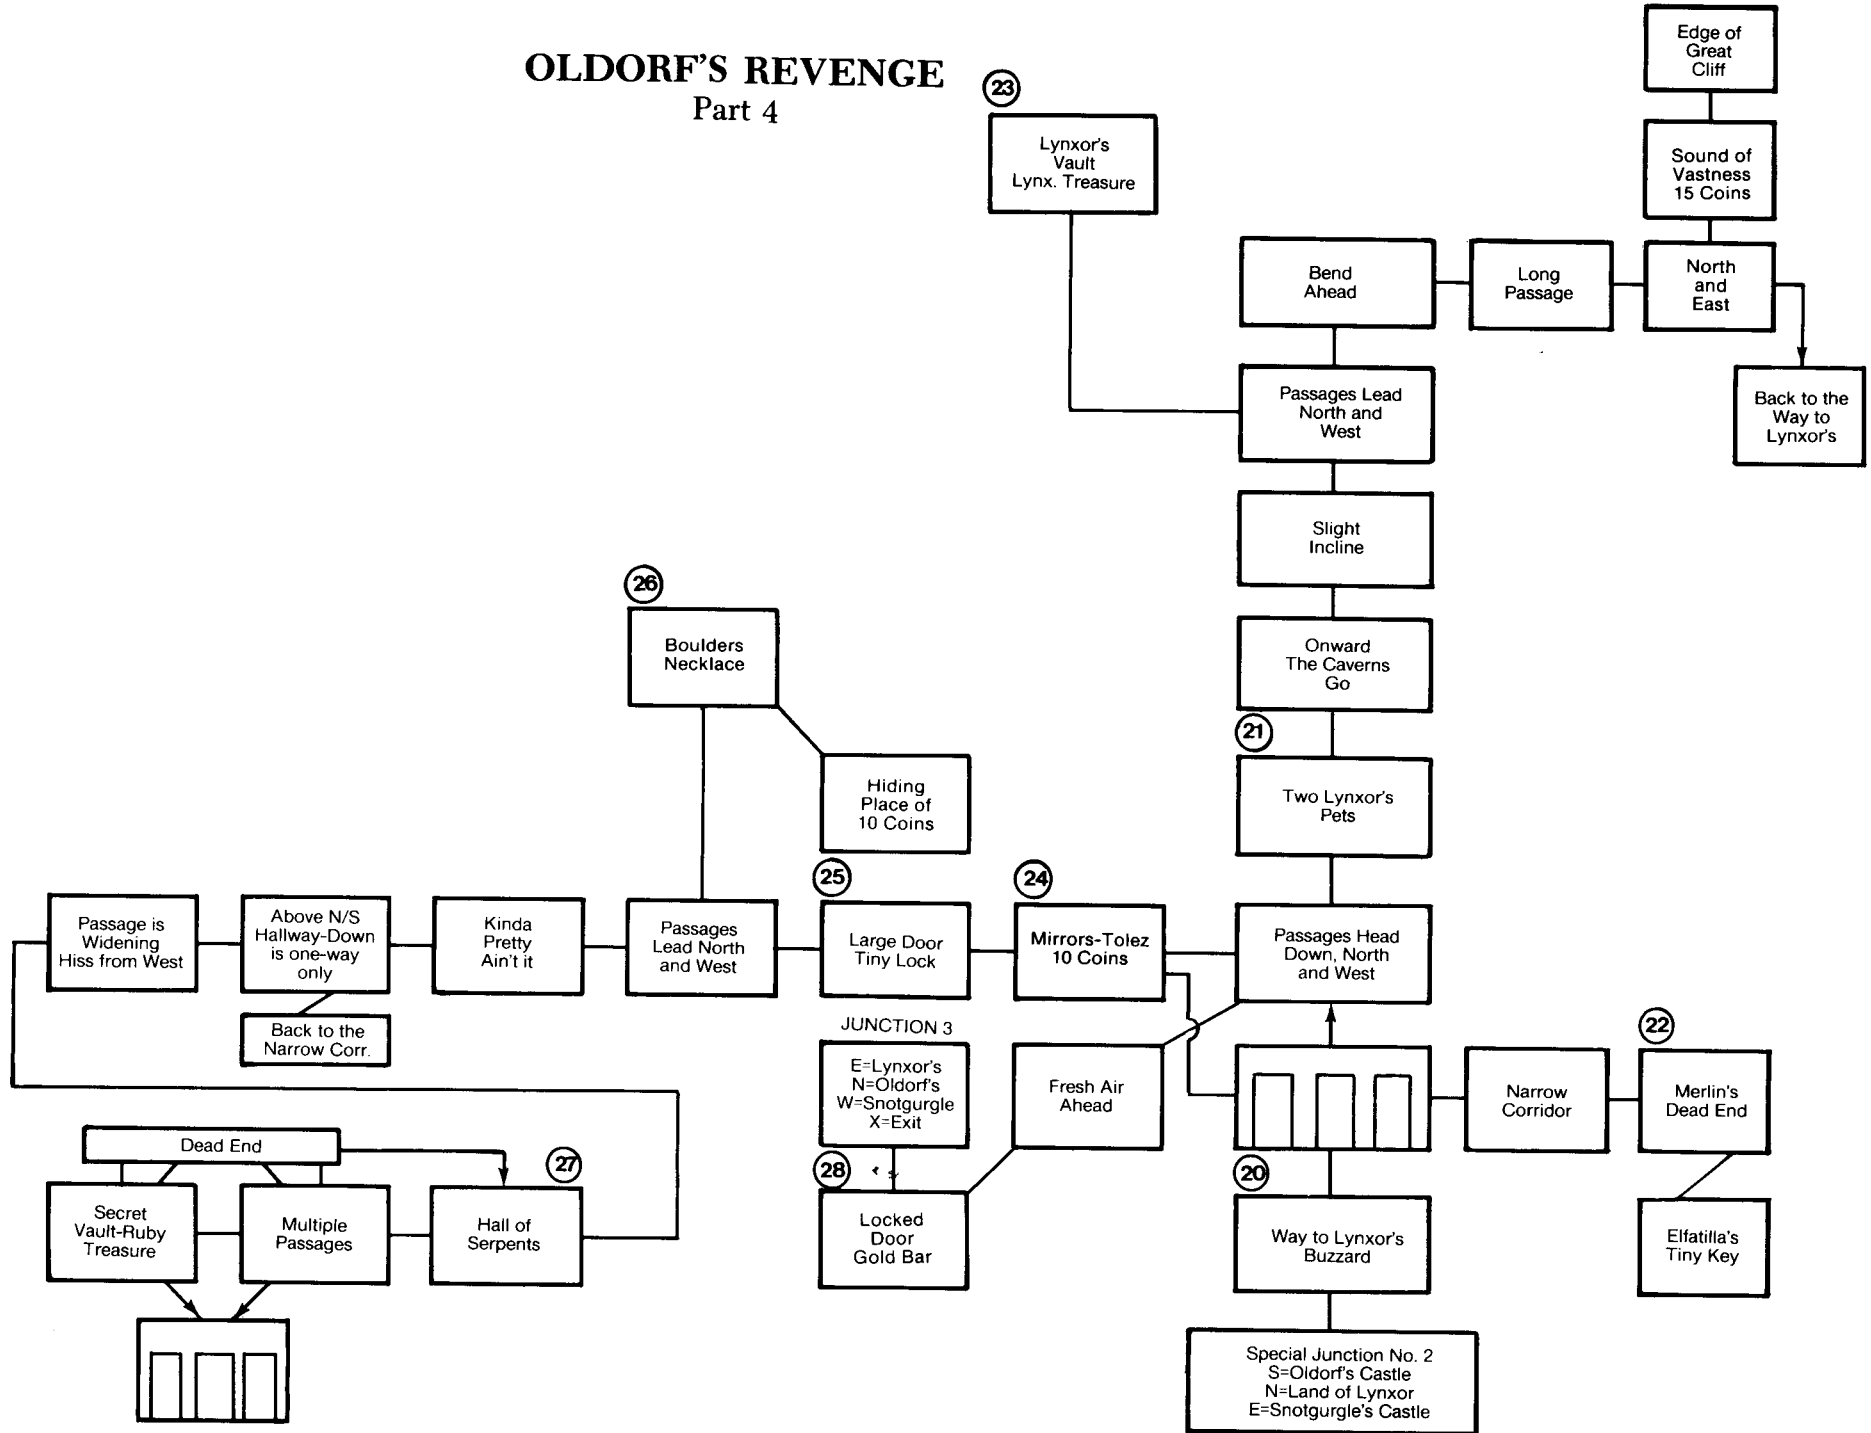

# OLDORF'S REVENGE

## Part 3

# OLDORF'S REVENGE Part 4

# OO-TOPOS

**Company:** Sentient Software

**Suggested Retail:** \$32.95

**Type:** All-text adventure of the futuristic variety. Like, way out!

**Description:**

Escape from an alien planet and return to Earth after reassembling the widely scattered parts of your spacecraft and finding the various treasures which were in the spacecraft at the time of your capture. The jungle maze, one of five in the game, is excellent.

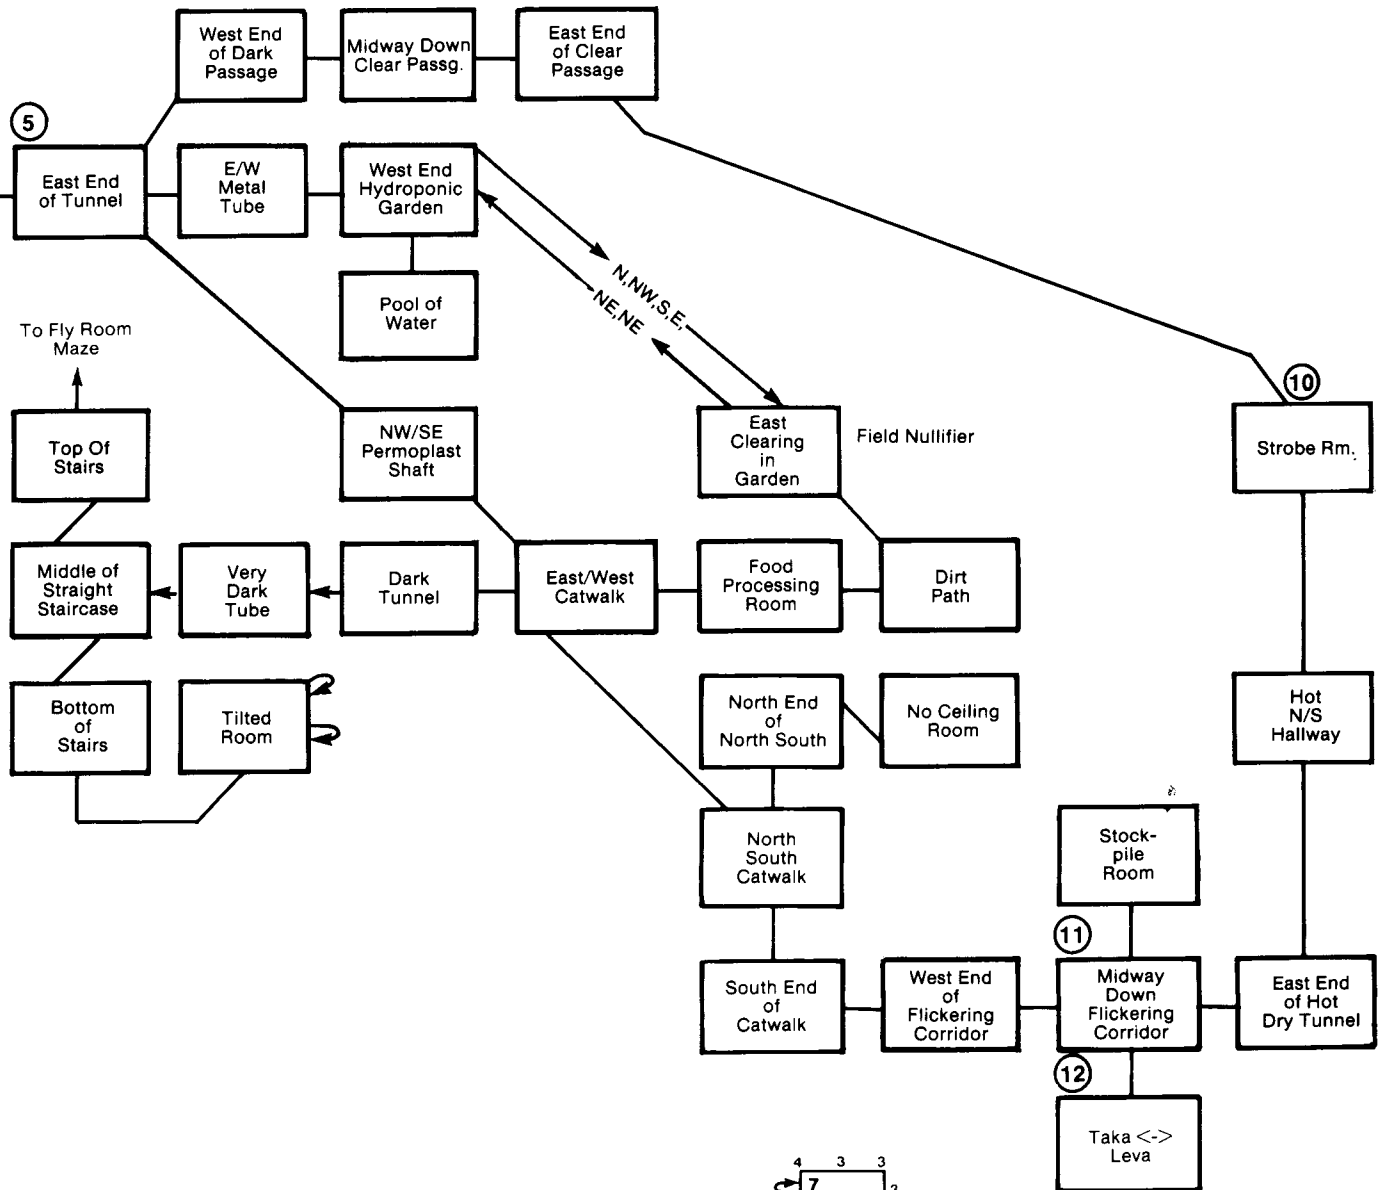

**Playability:**

A high degree of disk interaction slows *OO-Topos*, already lengthy and somewhat difficult, largely because of its size and the number of discrete objects. Most likely, only experienced adventurers will have the patience to play it through. The vocabulary is limited, and the scoring a complete mystery. Still, overall, it's an above average game, a challenging adventure with excellent scope and story line.

# OO-TOPOS Part 1

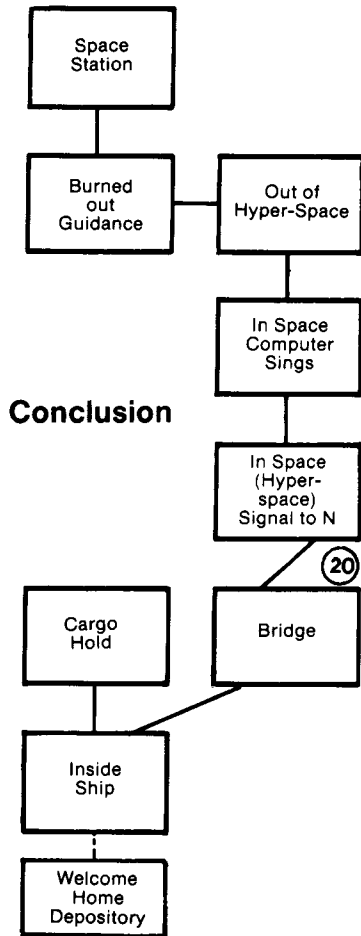

**Hydroponic Garden Maze**

# OO-TOPOS

## Part 2

# PALACE IN THUNDERLAND

**Company:** Micro Lab

**Suggested Retail:** \$24.95

**Type:** All-text adventure.

**Description:**

*Palace in Thunderland*, Micro Lab's second adventure, follows the successful *Madventure*. You must find eight treasures and resolve several puzzles. The story follows an *Alice in Wonderland* theme, very much tongue-in-cheek, with lots of humor. Who knows, you may become the King!

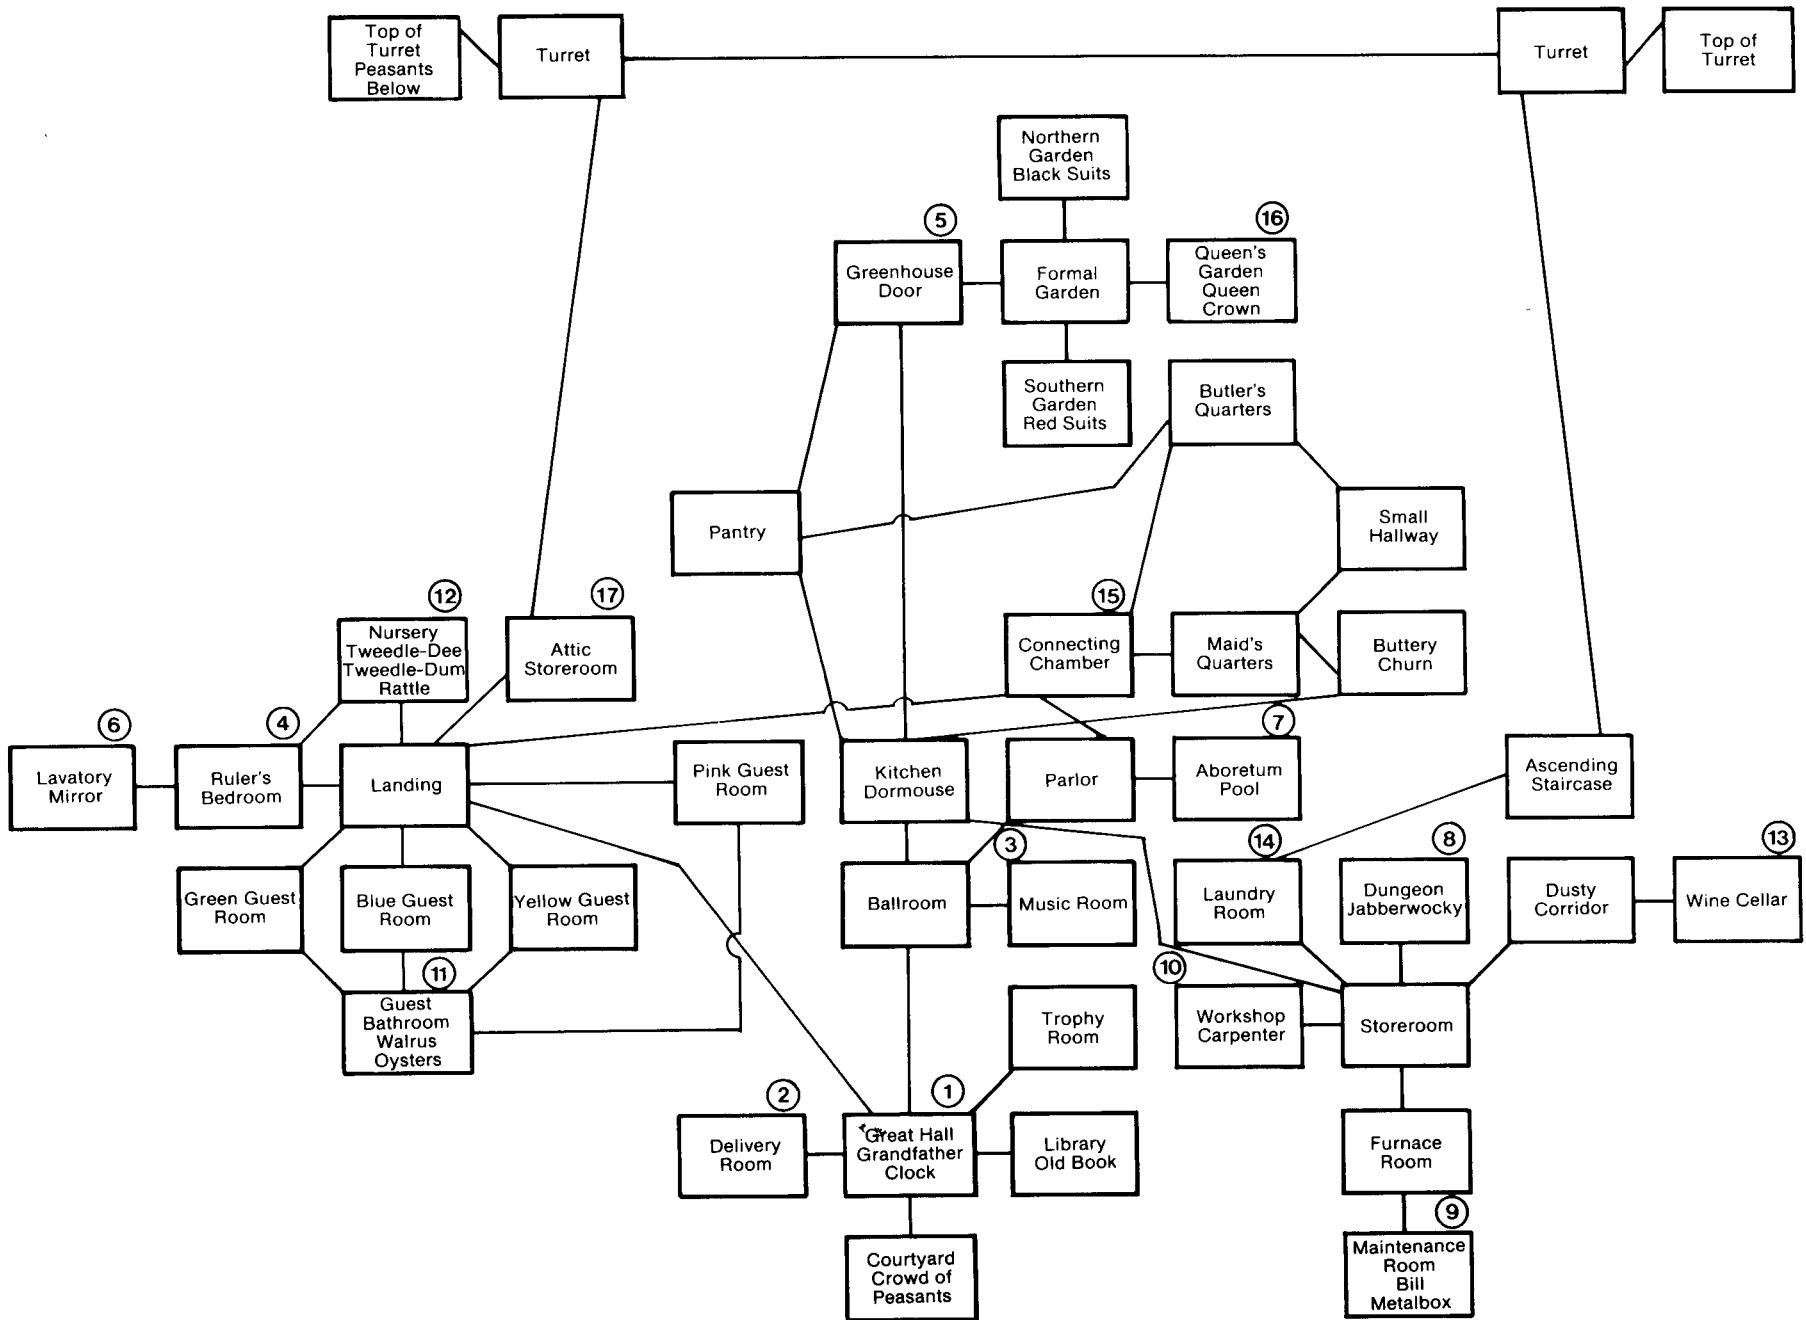

**Playability:**

An excellent game. Humor, a reasonable vocabulary and one puzzle in particular that has several viable alternatives, but only one answer that will permit a perfect game. Beginners can handle *Palace*, but even more experienced adventurers will take a good weekend to get through it.

# PALACE IN THUNDERLAND

# PIRATE ADVENTURE

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** Originally an all-text game, recently re-released in Hi-Res form.

**Description:**

You must magically travel between a London flat and an island on your way to locating two treasures. It has a smooth storytelling style, and rooms are populated by such wacky characters as a talkative parrot, alligators, a mongoose that's a failure in life, and a drunken pirate who is forever wandering off.

**Playability:**

A good game to cut the young adventurer's teeth on; not too tough, and a lot of fun. The task of building a ship on the first island presents a good example of a well done interactive puzzle. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game offers a single, easily made or recalled saved-game.

# PLANETFALL

**Company:** Infocom, Inc.

**Suggested Retail:** \$49.95

**Type:** A science fiction, all-text adventure.

**Description:**

After surviving an interstellar spaceship explosion, you find yourself on a strange planet, deserted except for a friendly robot named Floyd, who gives you his utmost devotion. The purpose of the game doesn't become clear until well into it, when you come across the computer-within-the-computer. To succeed, you need to repair four subsystems, overcome hunger and disease, battle a huge microbe, avoid radiation poisoning, and cope with a room full of dangerous mutants.

**Playability:**

Perhaps not as "tight" as some other games that Infocom has done, but reasonably challenging nevertheless. What with the "standard" superlative parser and save-game capability, it's a pleasure to play. You also get a few red-herring puzzles that are reasonably well developed, scads of objects to wonder about, and alternative endings that may make you wonder if you have achieved the optimum solution.

Floyd 'n Me

# PLANETFALL

## Part 2

# PYRAMID OF DOOM

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, scheduled for revision into Hi-Res form. Price also includes *Mystery Fun House* and *Ghost Town*.

**Description:**

Thirteen treasures lie scattered in an unexplored Egyptian pyramid. Your task: to get in, stay alive, and haul all thirteen back to a particular location. The game features cobras, mummies, pharoahs, decapitated statues, a huge purple worm, and a multitude of objects.

**Playability:**

This game starts out simply enough, but gets very difficult in a few spots; one treasure, for example, occupies a logical spot where you cannot see it, while another is guarded by a stone-hearted Iron Pharaoh. Have fun, and good luck with the purple worm. The two-word syntax has a limited but adequate vocabulary, and the text is brief and to the point. You also have a single easily made or recalled saved-game.

# QUEEN OF PHOBOS

**Company:** Phoenix Software

**Suggested Retail:** \$34.95

**Type:** A black and white science fiction Hi-Res adventure.

**Description:**

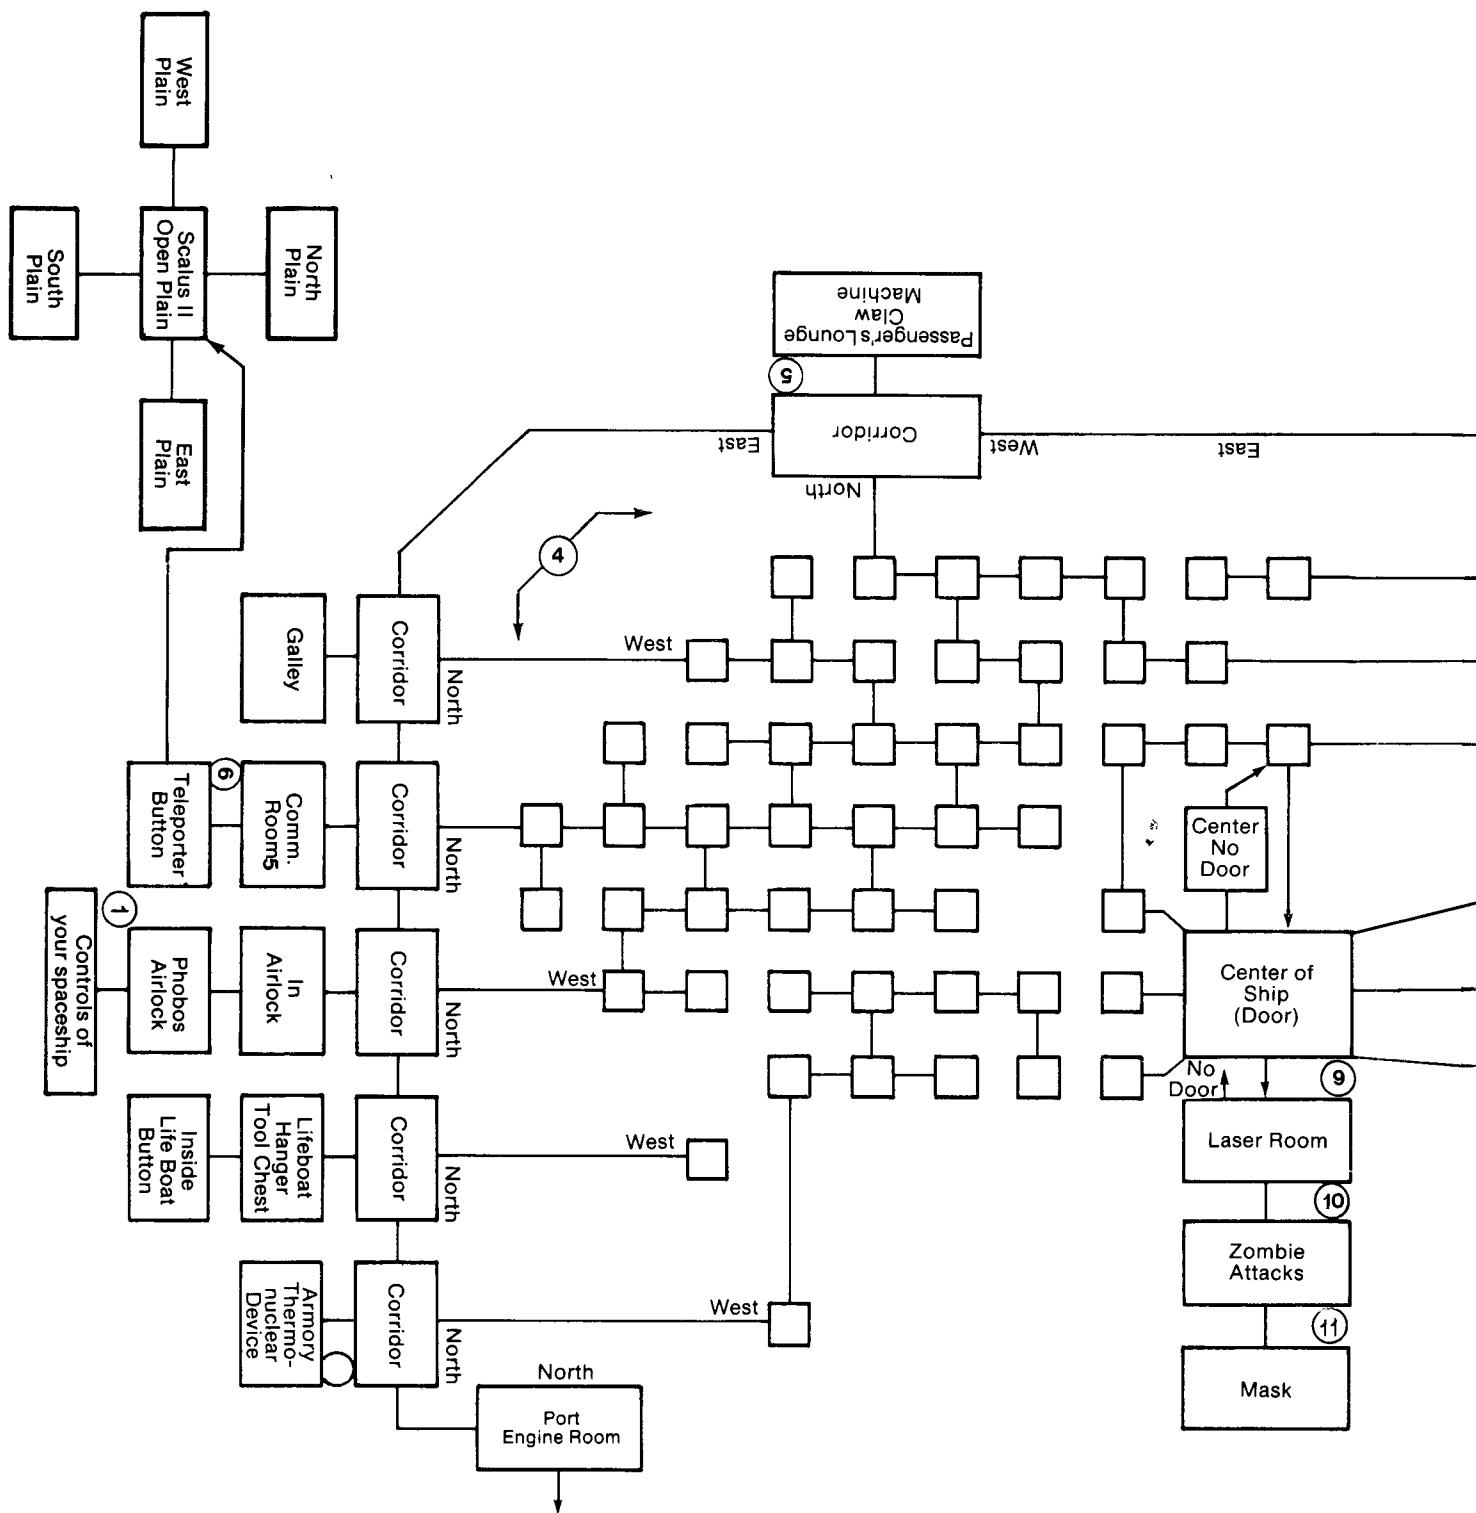

As the sole occupant of a small spaceship, you must board a derelict Martian spaceship and obtain the fabled golden mask of Kuh-Thu-Lu. You must find it and make good your escape before the four looters who are also on board decide to do you in. If you can piece together some of the early-on puzzles, you can do them in before they conclude that you have to go. The graphics are crisp and well detailed.

**Playability:**

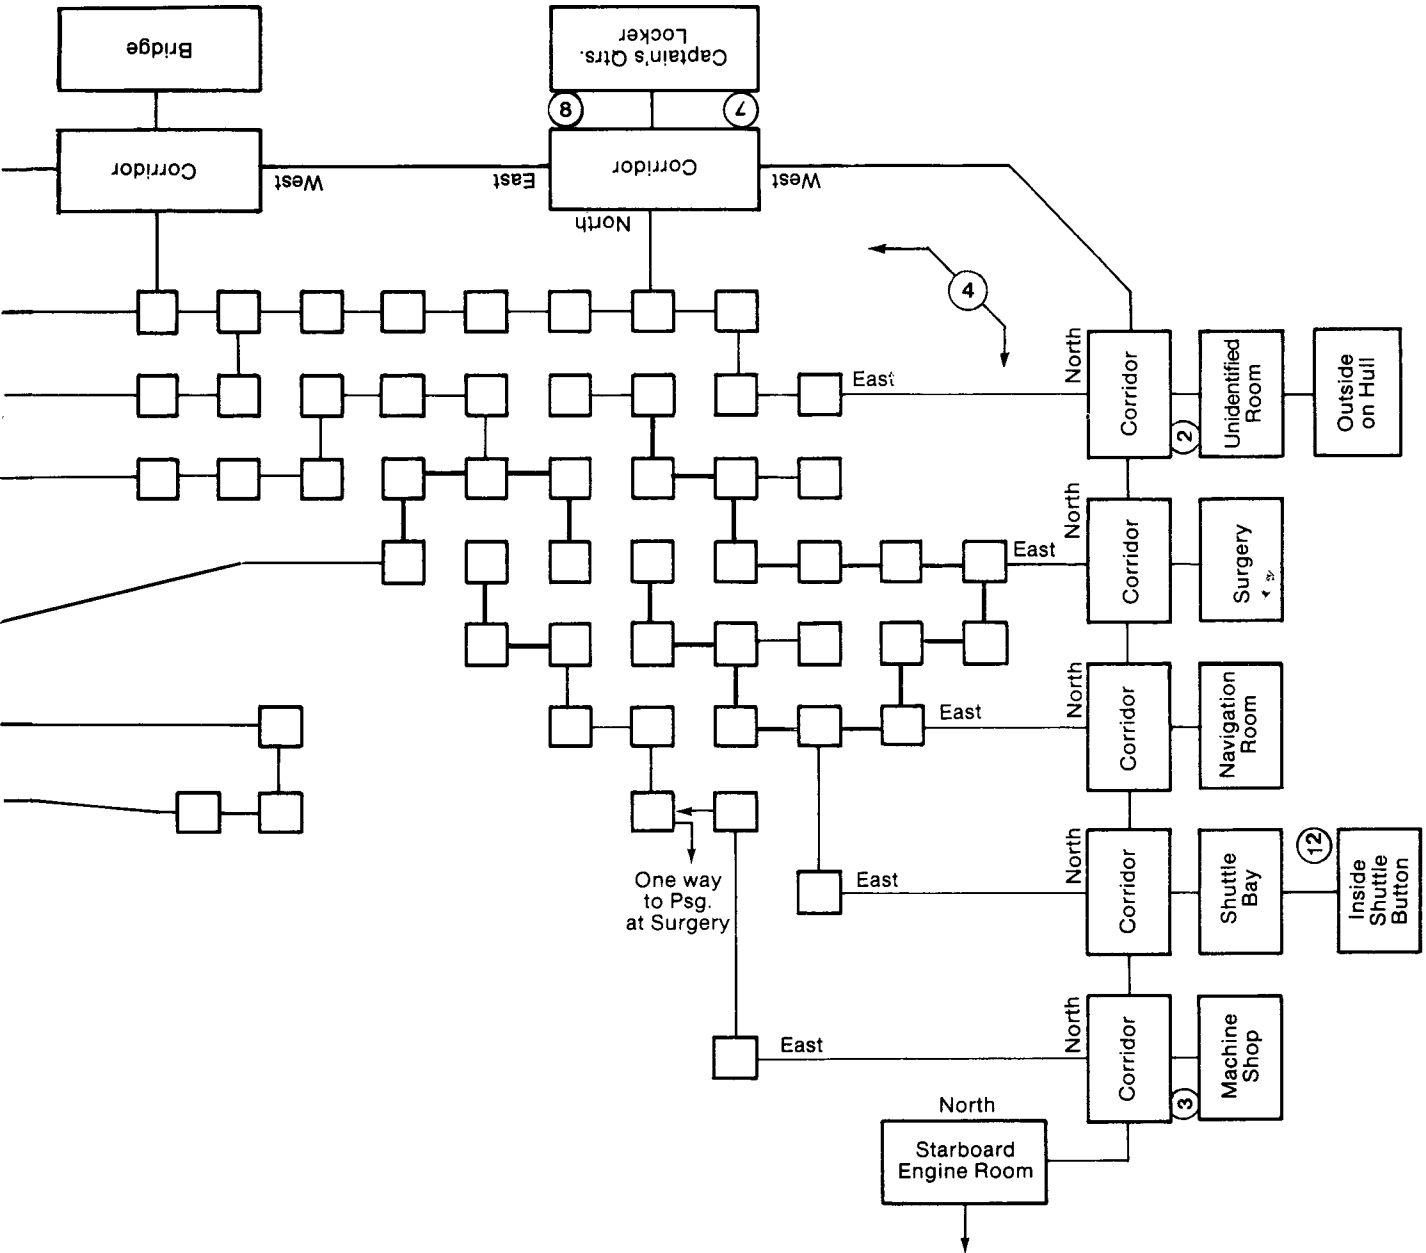

A well implemented, nicely paced, fast acting adventure of average difficulty. Beginners will find it challenging and interesting, and more experienced players will find an enjoyable weekend in store. You must traverse a good-sized maze in order to get to the center of the spaceship, where the real action takes place and a scary bit of animation occurs. The vocabulary proves quite adequate for the game, and clear responses answer unknown words.

2  
1

# QUEEN OF PHOBOS

# QUEEN OF PHOBOS

# THE QUEST

**Company:** Penguin Software

**Suggested Retail:** \$19.95

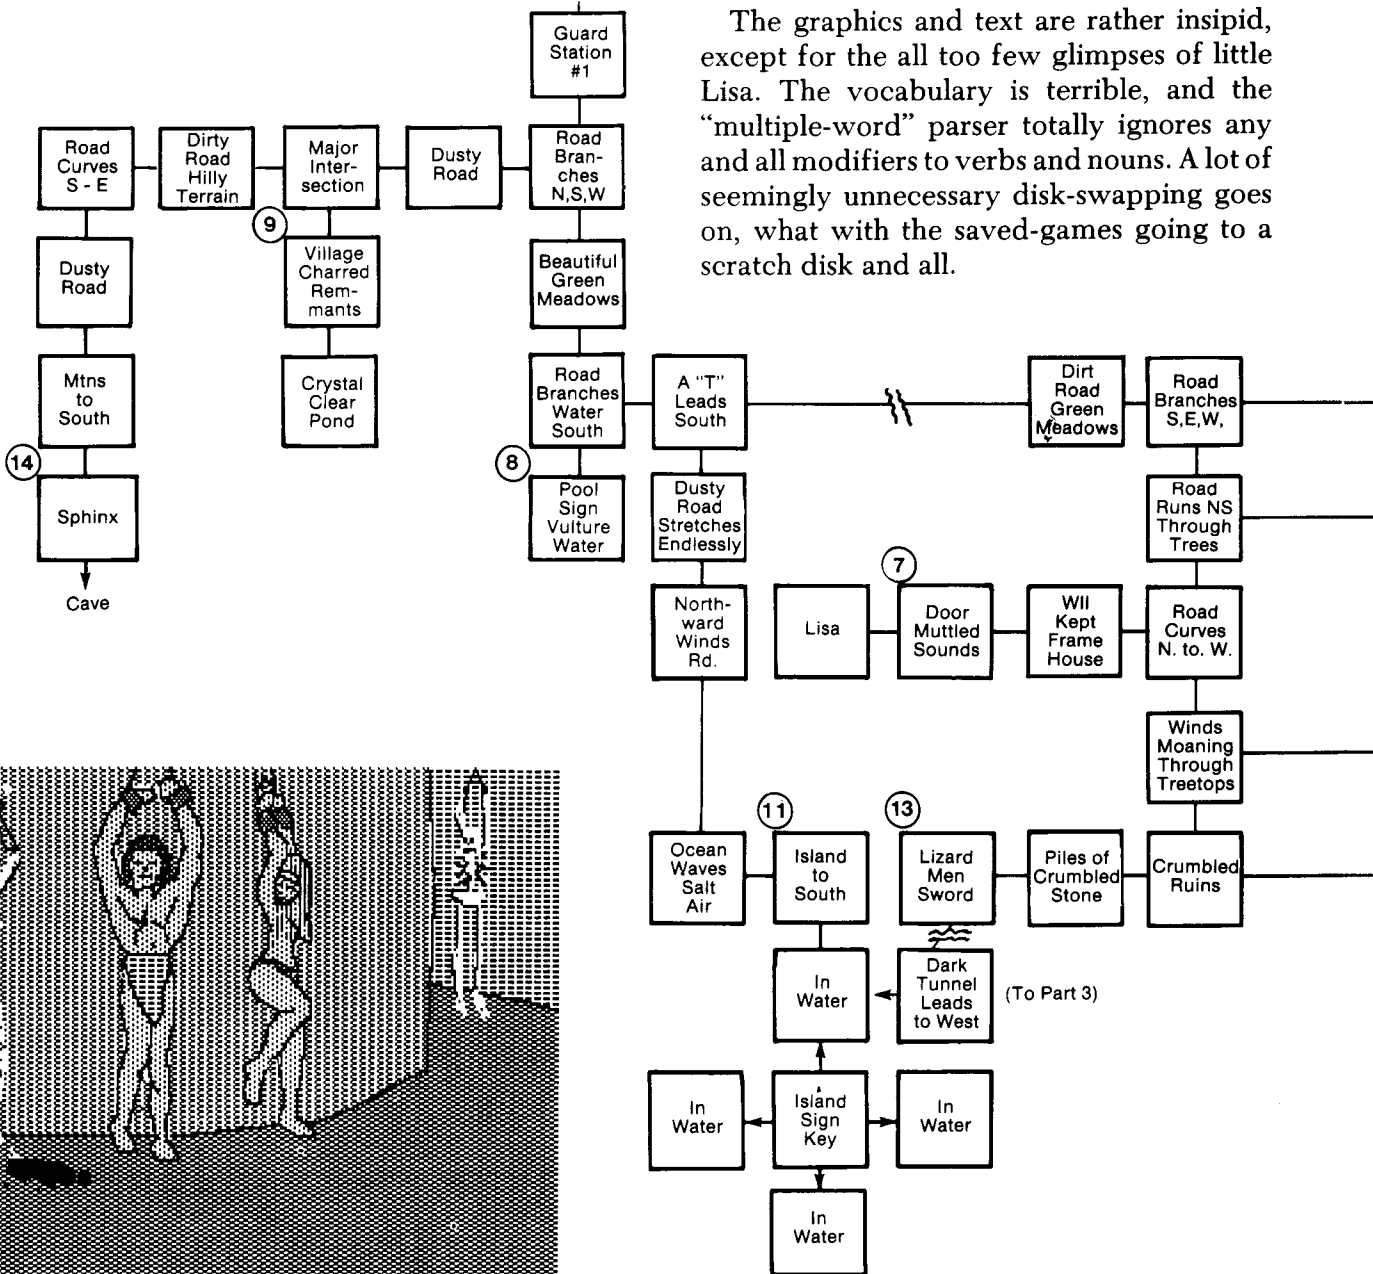

**Type:** A Hi-Res adventure with color graphics.

**Description:**

This two-sided disk offers immense proportions, but little content. As the King's advisor, you been ordered to rid the kingdom of a rampaging dragon. Gorn, the King's loyal but slow-witted champion, accompanies you on this mission, which will have you ranging among blazing deserts, dark tunnels, and near endless plains.

**Playability:**

The graphics and text are rather insipid, except for the all too few glimpses of little Lisa. The vocabulary is terrible, and the "multiple-word" parser totally ignores any and all modifiers to verbs and nouns. A lot of seemingly unnecessary disk-swapping goes on, what with the saved-games going to a scratch disk and all.

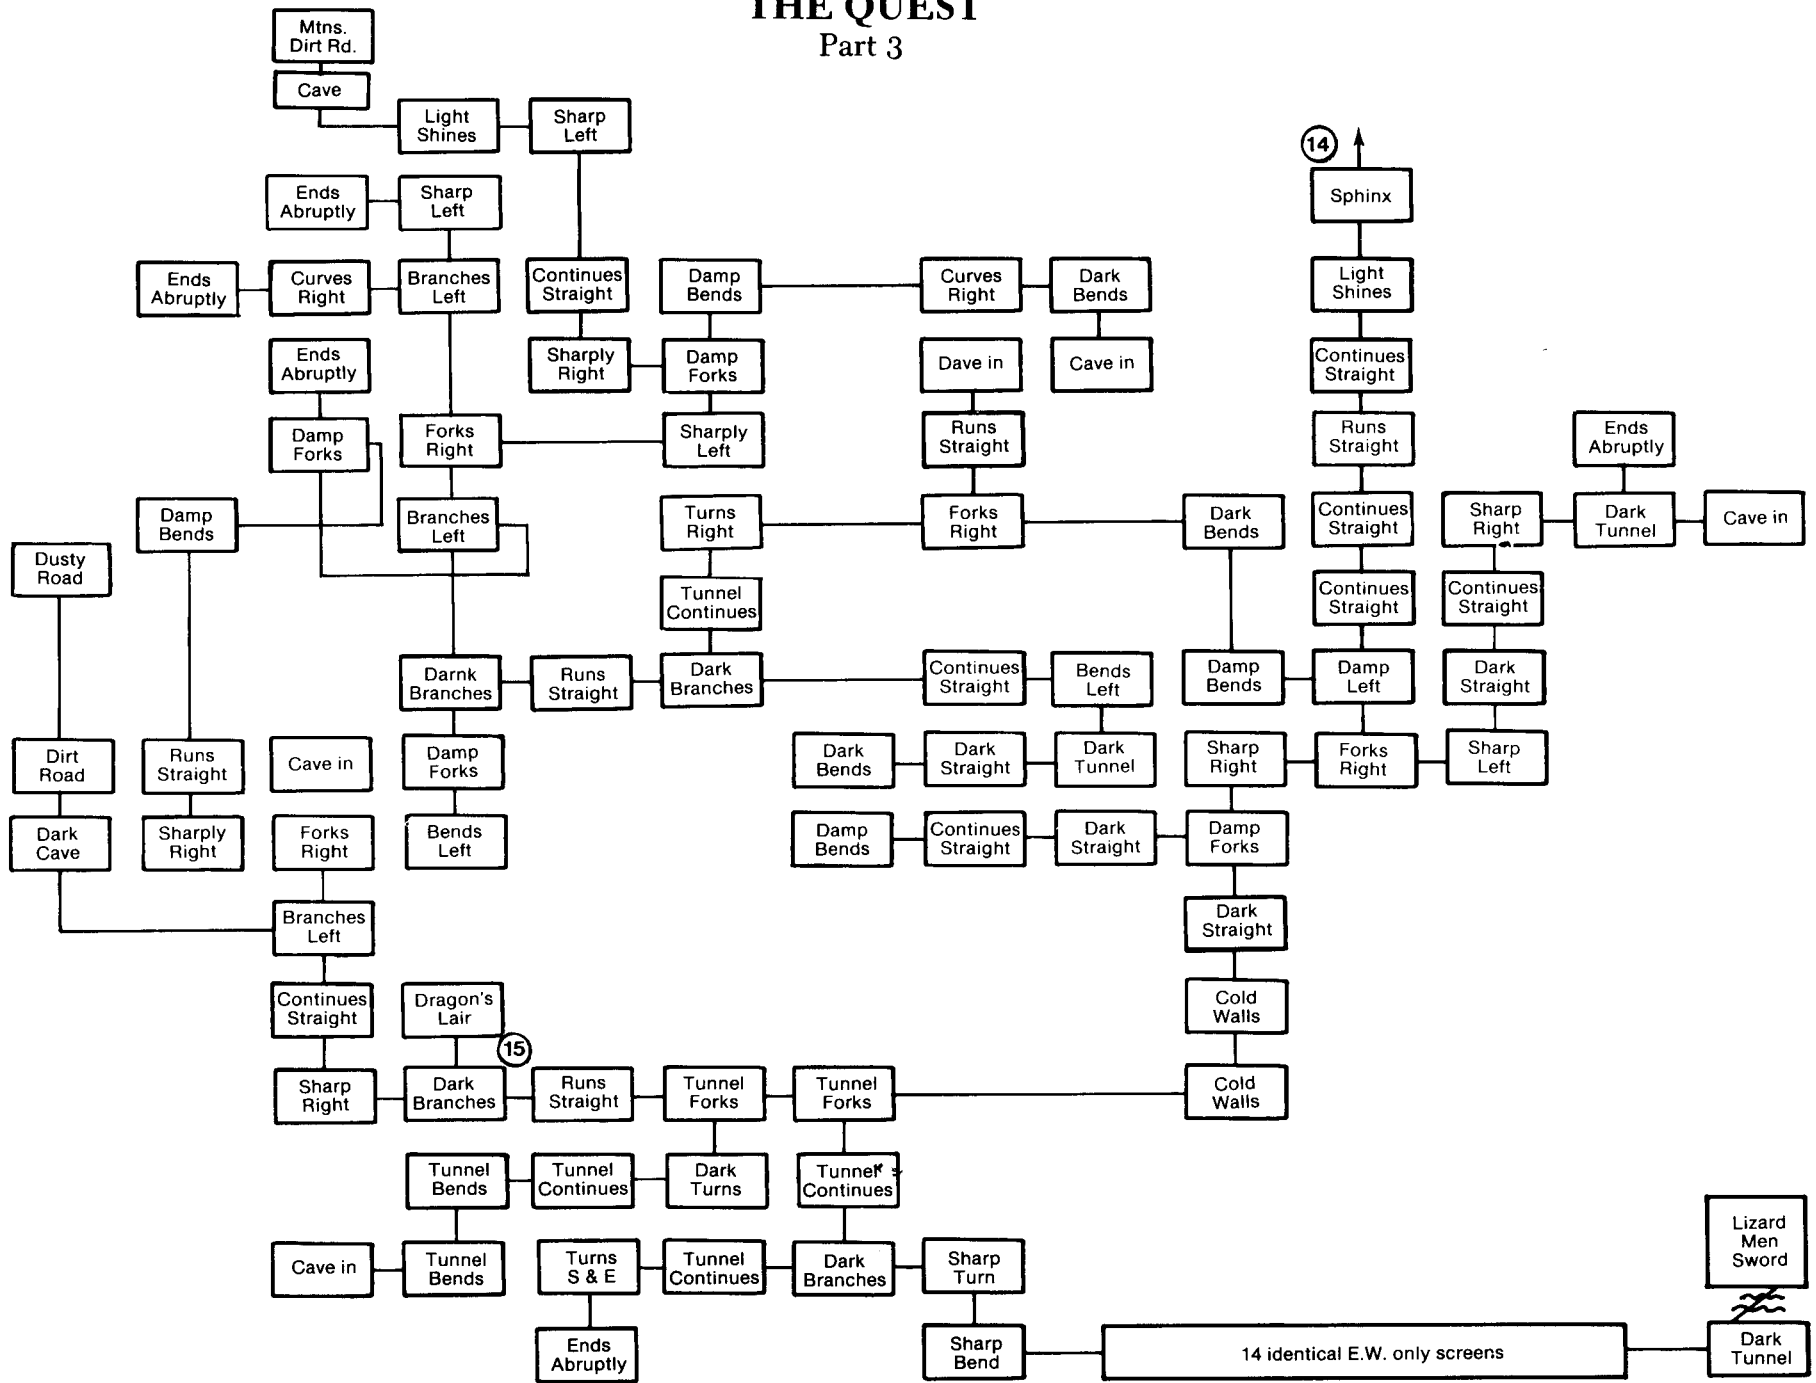

# THE QUEST

## Part 3

# THE SANDS OF EGYPT

**Company:** Datamost

**Suggested Retail:** \$29.95

**Type:** A Hi-Res adventure with color graphics and animation.

**Description:**

You are a world famous archaeologist, now lost in the desert, near what you believe to be a hidden burial chamber. Thirst be damned! You have a reputation to uphold, so it's on to the hoped-for treasure.

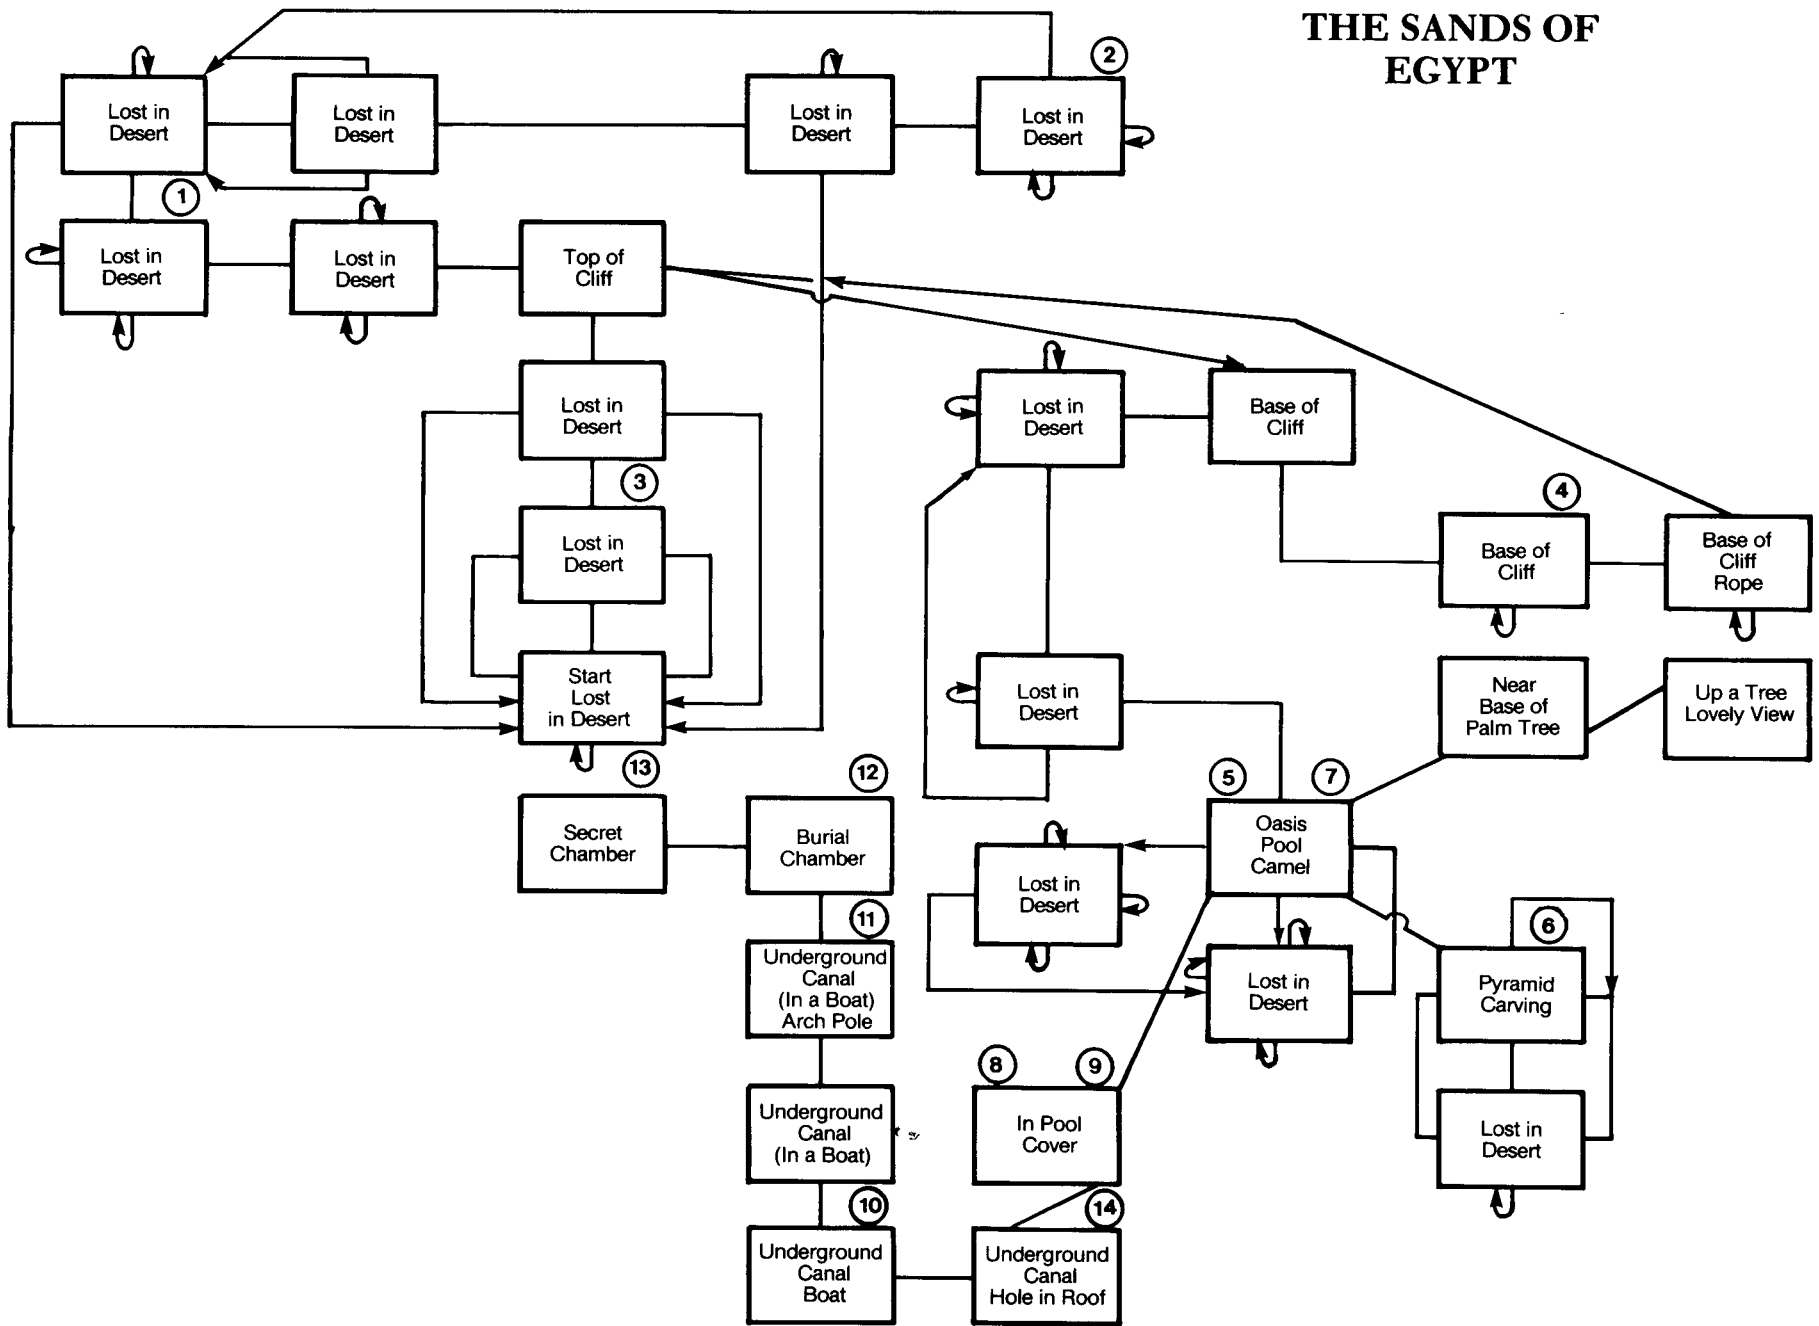

**Playability:**

Some nicely animated graphics and fast color fill. For the most part, however, the graphics are just average. An amusing internal (H)elp message comes in handy. The puzzles aren't tough once you understand the sand maze, which is quite well done. You can make saved-game scenarios to the program disk and call them at any time. Kids may need help with the mapping.

# THE SANDS OF EGYPT

# SAVAGE ISLAND PART I

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, now being revised into a Hi-Res version. Price includes *Savage Island, Part II* and *Golden Voyage*.

**Description:**

You try in this game to obtain the password that permits you to enter *Savage Island, Part II*. To do so, you must survive a tropical hurricane and a sickly bear, find a mysterious looking pirate, cope with a Neanderthal Man, and push the right buttons.

**Playability:**

A toughie, meant for those who breezed through *Mystery Fun House* and casually solved *Ghost Town*. Unfortunately, the save game feature is (perhaps) disabled during the toughest sequence of this game, where your early demise is left in the hands of the computer's randomizer. If not already familiar with the Scott Adams' series, you should not start with this game. While some parts move easily and quickly, the difficulty lies in staying alive long enough to get to them. The two-word syntax has a limited but adequate vocabulary. The text is a bit more expansive than the others, but not by much. It has a single, easily made or recalled saved-game.

# SAVAGE ISLAND

## Part I

# SAVAGE ISLAND PART II

**Company:** Adventure International

**Suggested Retail:** \$39.95

**Type:** An all-text game, soon to be revised into Hi-Res form. Price includes *Savage Island, Part I* and *Golden Voyage*.

**Description:**

A toughie, full of a curious mix of prehistoric and space age entanglements. If you can get through the game, you get the code needed to decipher the secret message sheet that came with the game. Except for a few characters, the two *Savage Islands* have little in common and do not resemble each other. In the process of trying to solve this jewel you will encounter vacuums, force fields, atomic blocks, four consoles with levers, dials and buttons, and your old friends, the Neanderthal Man and the Pirate.

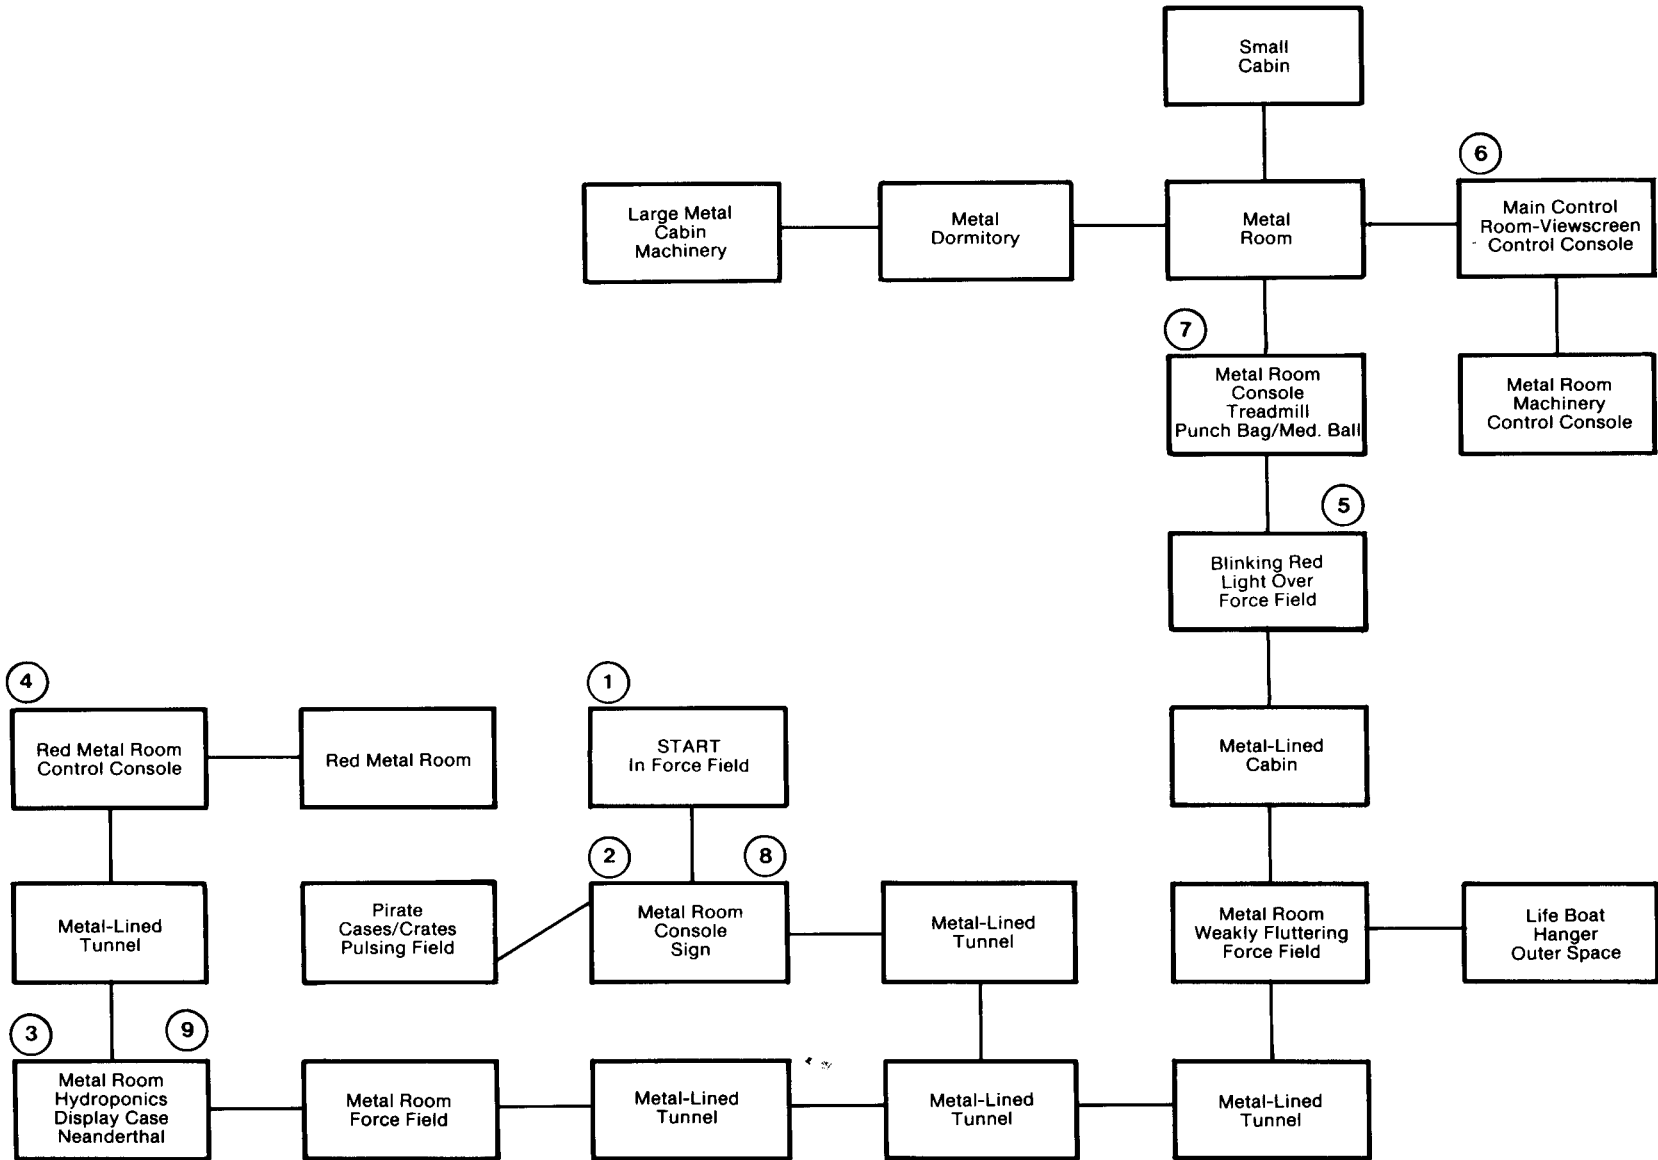

**Playability:**

This game starts out with a bang, so to speak, and that bang is most likely you! The game lives up to the first sign that you see, which says "Part I was a piece of cake compared to what you are about to go through." It does ease up a bit after the first move puzzle. The two-word syntax has a limited but adequate vocabulary. The text is brief and to the point. The game permits a single easily made or recalled saved-game.

»  
▼

# SAVAGE ISLAND

## Part II

# SECRET AGENT: MISSION ONE

**Company:** Jor-And

**Suggested Retail:** \$32.95

**Type:** Black and white Hi-Res adventure, the first in a series.

**Description:**

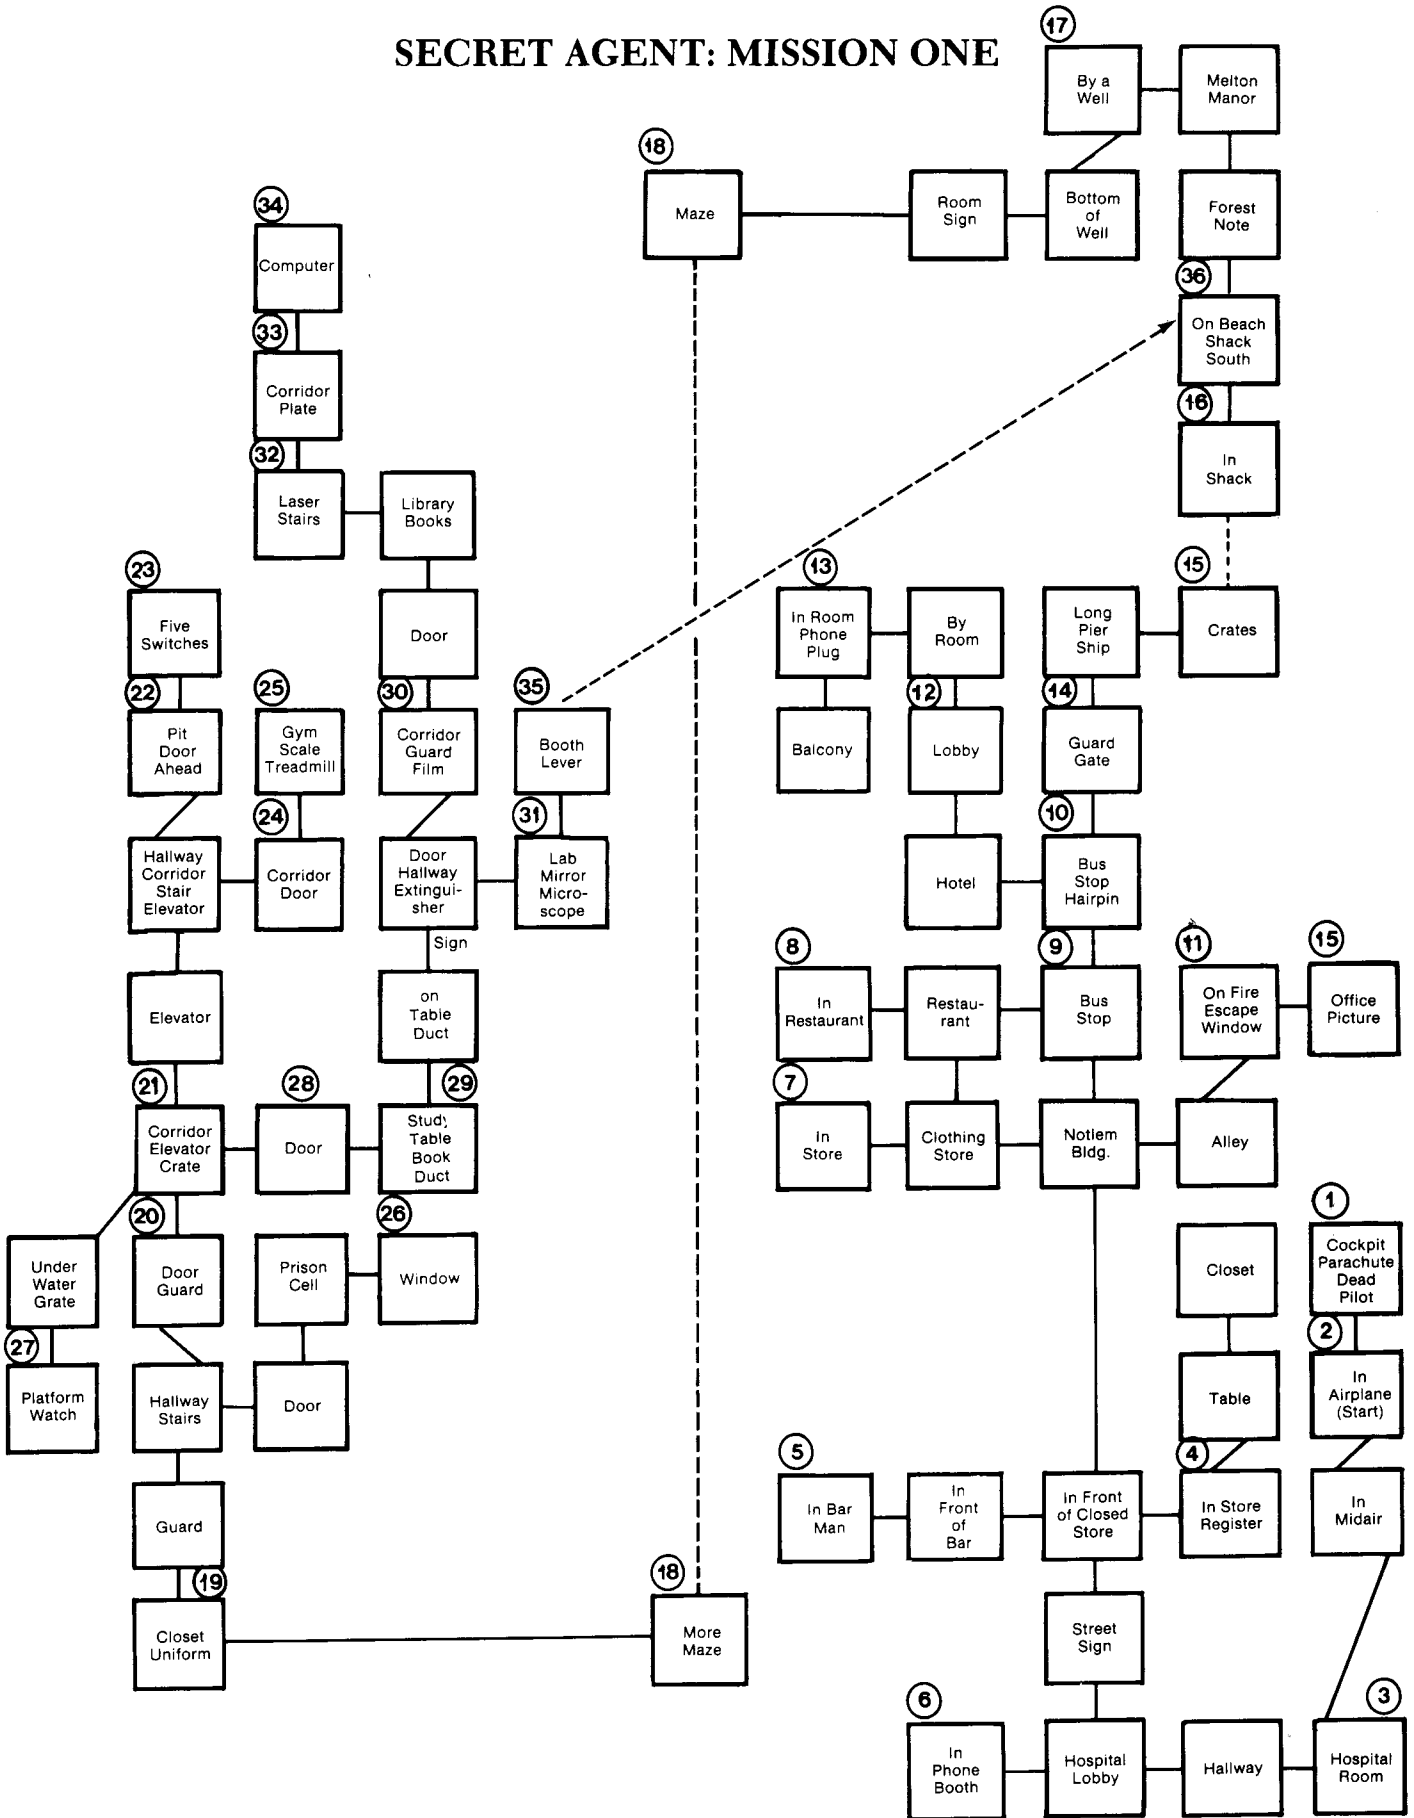

Your mission: to locate and deactivate a near-ultimate weapon and escape before the waiting bombers pound the island (and you) into dust. Many puzzles crop up between the beginning, where you're in an airplane about to get shot down, and the end, where you reach the waiting helicopter and safety. The game includes a difficult maze and many straightforward puzzles.

**Playability:**

The graphics are neat and crisp, but the text, somewhat sparse. Although the plot won't win any awards, it does hold your interest throughout the game, presenting several interesting twists along the way. The two-word syntax and limited vocabulary are unusually well-integrated into the game's design. You get a single save-game position, written to or recalled from the disk any time the command cursor is available.

SECRET AGENT: MISSION ONE

# SERPENT'S STAR

**Company:** Ultrasoft

**Suggested Retail:** \$39.95

**Type:** An animated Hi-Res adventure with color graphics and Hi-Res text.

**Description:**

The setting: Tibet. Your mission: find the last three scrolls which lead to the fabled Serpent's Star gem and steal it. To accomplish this dastardly deed, you must visit two monasteries, buy and give away objects, initiate a few quick actions, dodge through an avalanche, answer five riddles, navigate the maze, and even solve a puzzle or two.

**Playability:**

Three of the five riddles are a basic test of Buddhist and Yogi tenets, and you only get one chance to answer each question correctly. You get no clues to the tougher puzzles. *Serpent's Star* is a game that many have started but few have completed (before giving up in frustration). This book should help a lot!

Vision returns. You are standing amidst the monastery's ruins. The Serpent's Star rests in the remnants of the wall.  
[ waiting ]

# SHERWOOD FOREST

**Company:** Phoenix Software

**Suggested Retail:** \$34.95

**Type:** Hi-Res adventure with color graphics and animation.

## Description:

As Robin Hood, it's your wedding day. But several puzzles lie between the wedding and your shooting off to the Honeymoon Suite with the fair Maid Marion. You have lost your pretty green uniform, and your old friends don't recognize you. Find that, get something to amuse your merry men, and you'll be on your way. A bit of animation adds a nice touch.

## Playability:

Extremely well implemented. Aimed at the beginning to intermediate adventurer, it moves quickly. Not too tough, but cleverly interactive puzzles have several amusing twists. The command parser supports more than two words, and the save-game feature is excellent. A very light-hearted and cheery game. Great for kids.

# SHERWOOD FOREST

# SOFTPORN ADVENTURE

**Company:** On-Line Systems

**Suggested Retail:** \$29.95

**Type:** An all-text adventure.

**Description:**

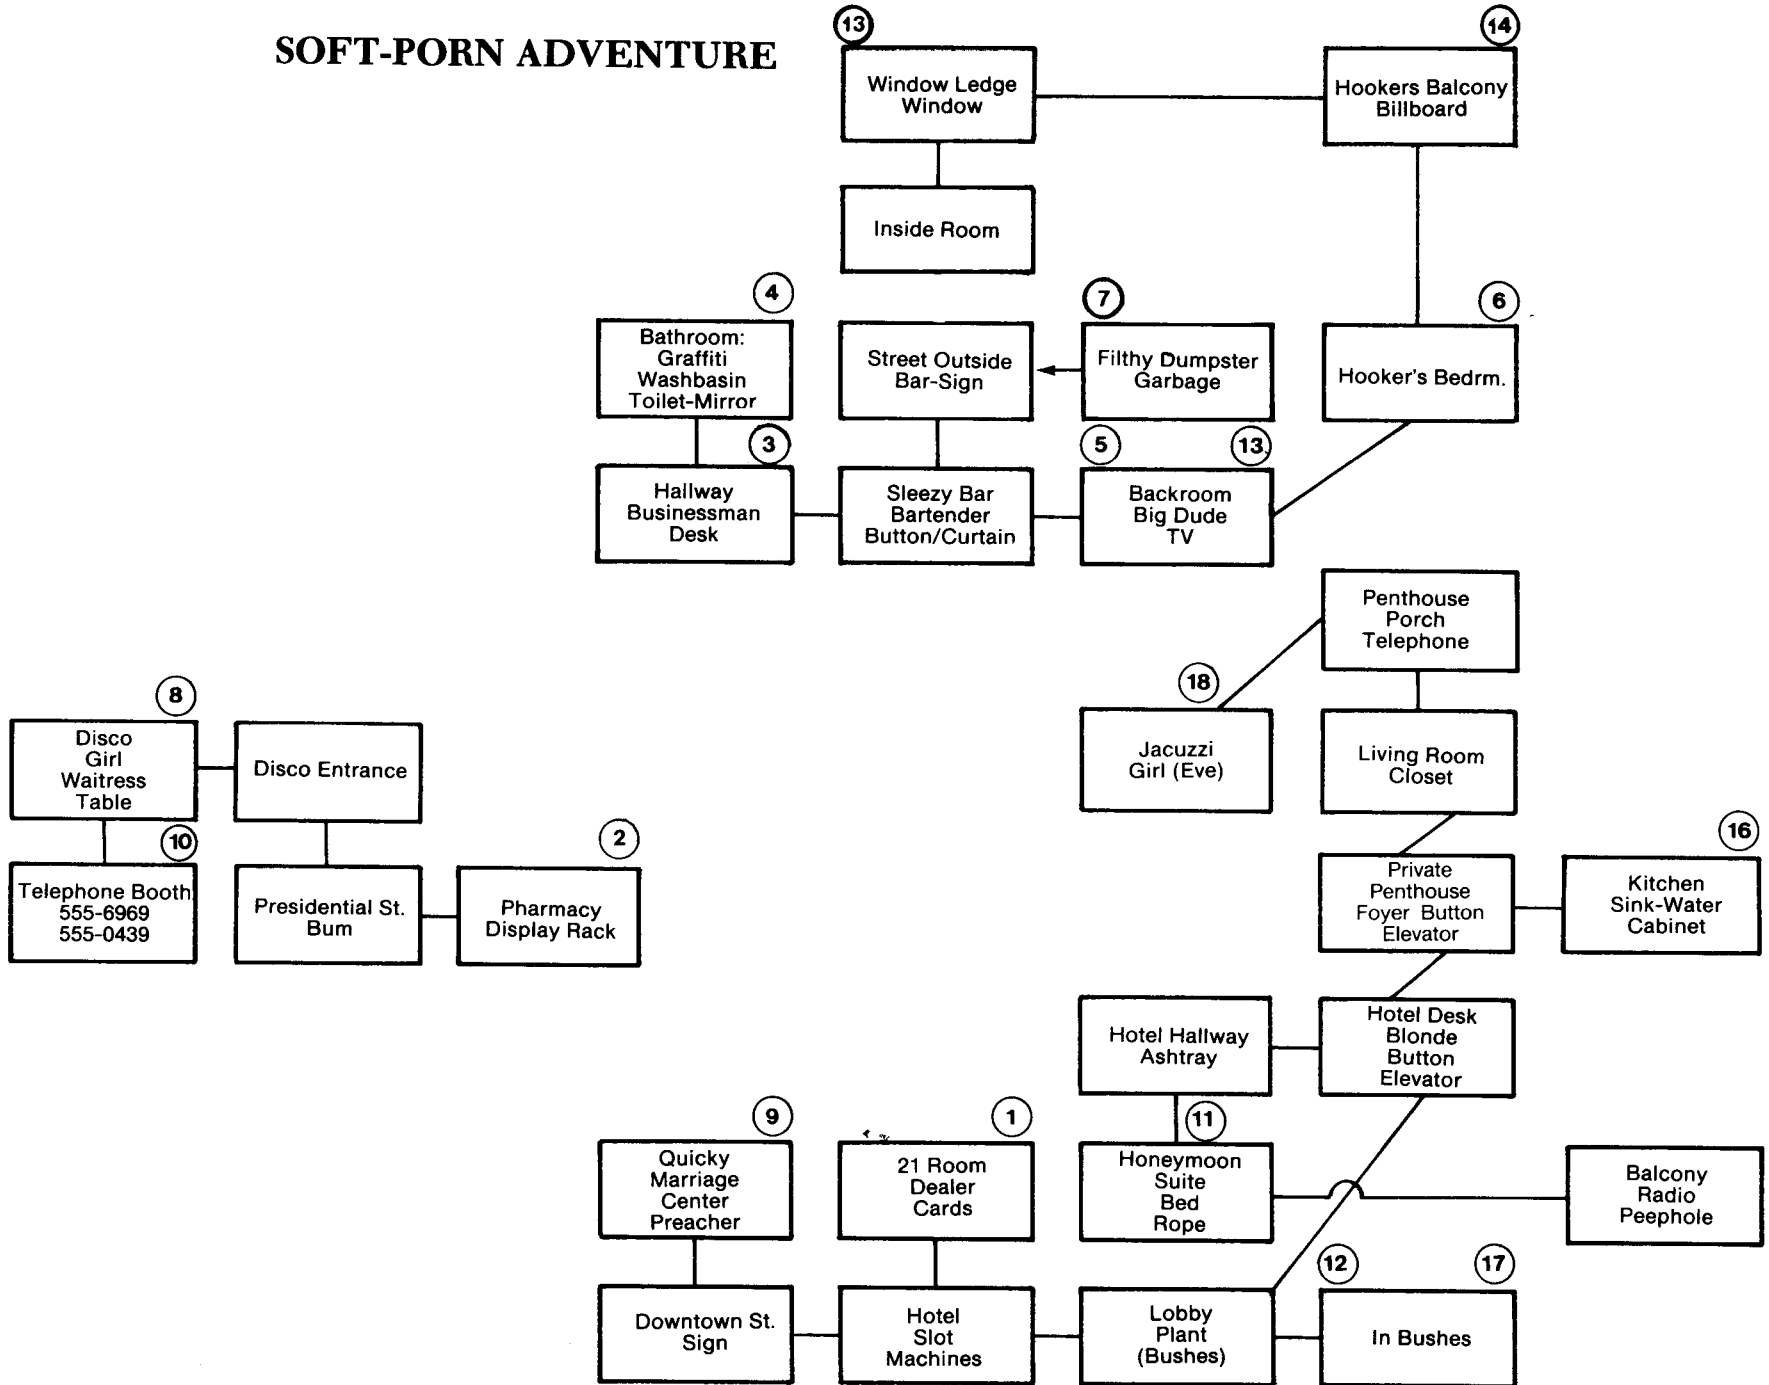

Your goal, bizarrely enough, is to find and seduce three women. The game also incorporates both blackjack and slot machine games—these broads are expensive! Descriptions are PG rated, while user input can be X-rated.

**Playability:**

A moderately difficult but quite challenging and solvable puzzle game good for would-be adventurers. You can save the game on a scratch disk, but you can't recall it from within the game. Lots of tongue-in-cheek humor.

# SOFT-PORN ADVENTURE

# SORCERER

**Company:** Infocom, Inc.

**Suggested Retail:** \$49.95

**Type:** An all-text adventure, a follow-up to *The Enchanter*.

**Description:**

Remember taking the role of neophyte wizard in *The Enchanter*? Well, you're back again, this time armed with seven spells at the outset. Seems that your mentor, the aged and wise Belboz, has gone off on a secret mission to rid the world of an evil force so sinister that he dare not reveal it to any in the Circle of Enchanters. You must find and rescue him, which you can accomplish only by doing in the evil force known as Jeearr. You'd better find the nine other spell scrolls or you won't have a chance.

**Playability:**

A worthy successor, with the promise of a third. Interactive puzzles and reasonably jazzy text, though not as golden or expansive as some others from Infocom. The parser and save-game capability don't get any better—they can't. The difficulty factor is well chosen, not too tough for a novice (with lots of patience) and plenty challenging for the experienced dungeon trekker.
